### Salesforce Certified Identity and Access Management Architect Sample Questions (Q41-Q46):

#### NEW QUESTION # 41

Universal Containers (UC) has Active Directory (AD) as their enterprise identity store and would like to use it for Salesforce user authentication. UC expects to synchronize user data between Salesforce and AD and Assign the appropriate Profile and Permission Sets based on AD group membership. What would be the optimal way to implement SSO?

- A. Use Microsoft Access control Service as the Authentication provider.
- B. Use Active Directory Federation Service (ADFS) as the Identity Provider.
- C. Use Salesforce Identity Connect as the Identity Provider.
- D. Use Active Directory with Reverse Proxy as the Identity Provider.

**Answer: C**

#### NEW QUESTION # 42

In an SP-Initiated SAML SSO setup where the user tries to access a resource on the Service Provider, What HTTP param should be used when submitting a SAML Request to the Idp to ensure the user is returned to the intended resource after authentication?

- A. RedirectURL
- B. RelayState
- C. DisplayState
- D. StartURL

**Answer: B**

#### NEW QUESTION # 43

How should an Architect force users to authenticate with Two-factor Authentication (2FA) for Salesforce only when not connected to an internal company network?

- A. Use Custom Login Flows with Apex to detect the user's IP address and prompt for 2FA if needed.
- B. Apply the "Two-factor Authentication for User Interface Logins" permission and Login IP Ranges for all Profiles.
- C. Use an Apex Trigger on the UserLogin object to detect the user's IP address and prompt for 2FA if needed.
- D. Add the list of company's network IP addresses to the Login Range list under 2FA Setup.

**Answer: A**

#### NEW QUESTION # 44

Universal Containers (UC) rolling out a new Customer Identity and Access Management Solution will be built on top of their existing Salesforce instance.

Several service providers have been setup and integrated with Salesforce using OpenID Connect to allow for a seamless single sign-on experience. UC has a requirement to limit user access to only a subset of service providers per customer type.

Which two steps should be done on the platform to satisfy the requirement?

Choose 2 answers

- A. Use Profiles and Permission Sets to assign user access to Admin Pre-Approved Connected Apps.
- B. Set each of the Connected App access settings to Admin Pre-Approved.
- C. Assign the connected app to the customer community, and enable the users profile in the Community settings.
- D. Manage which connected apps a user has access to by assigning authentication providers to the user's profile.

**Answer: A,B**

Explanation:

Explanation

To limit user access to only a subset of service providers per customer type, the identity architect should use Profiles and Permission Sets to assign user access to Admin Pre-Approved Connected Apps. Connected apps are frameworks that enable external applications to integrate with Salesforce using APIs and standard protocols, such as OpenID Connect. By setting each of the Connected App access settings to Admin Pre-Approved, the identity architect can control which users can access which connected apps by assigning profiles or permission sets to the connected apps. The other options are not relevant for this scenario.

#### NEW QUESTION # 45

Northern Trail Outfitters (NTO) uses the Customer 360 Platform implemented on Salesforce Experience Cloud. The development team in charge has learned of a contactless user feature, which can reduce the overhead of managing customers and partners by creating users without contact information.

What is the potential impact to the architecture if NTO decides to implement this feature?

- A. Contactless user feature is available only with the External Identity license, which can restrict the Experience Cloud functionality available to the user.
- B. Passwordless authentication can not be supported because the mobile phone receiving one-time password (OTP) needs to match the number on the contact record.
- C. Custom registration handler is needed to correctly assign External Identity or Community license for the newly registered contactless user.
- D. If contactless user is upgraded to Community license, the contact record is automatically created and linked to the user record, but not associated with an Account.

**Answer: A**

#### NEW QUESTION # 46

.....

There are three different kinds of our Identity-and-Access-Management-Architect exam questions: the PDF, Software and APP online. And i love the Software for the best for no matter how many software you have installed on your computers, our Identity-and-Access-Management-Architect learning materials will never be influenced. Also, our Identity-and-Access-Management-Architect Study Guide just need to be opened with internet service for the first time. Later, you can freely take it everywhere as long as you use it in the Windows system.
