

CASPO-001 Exam Actual Tests | New CASPO-001 Exam Guide

Họ và tên: Võ Nguyễn Minh Châu.....Lớp: L08.....

Nghiên cứu các hệ thống tích hợp với Core banking:

1. Bạn thường sử dụng các loại hệ thống tích hợp nào? Liệt kê và mô tả ngắn gọn về chúng.
2. Bạn muốn sử dụng hệ thống tích hợp nào nhất? Tại sao?
3. Theo thực trạng hiện nay, bạn quan ngại vấn đề nào của hệ thống ngân hàng? Tại sao?

Trả lời

Câu 1:

- Tích hợp core banking với NAPAS thông qua chuẩn ISO 8583 / API: Đây là lớp tích hợp cho phép kết nối trực tiếp giữa core banking và hệ thống chuyển mạch tài chính NAPAS. Luồng giao dịch thanh toán thẻ, chuyển khoản 24/7, QR và clearing được truyền và xác thực theo thời gian thực. Việc sử dụng ISO 8583 cho phép đảm bảo tính toàn vẹn message, cấu trúc data field chuẩn hóa và giảm sai lệch dữ liệu trong xử lý liên ngân hàng.

- Middleware/ESB phục vụ điều phối message đến NAPAS: Trong nhiều ngân hàng, lớp tích hợp ESB hoặc API Gateway đóng vai trò routing, transformation và load balancing nhằm giảm áp lực xử lý trực tiếp lên core banking và tránh tình trạng nghẽn giao dịch.

- Hệ thống reconciliation đối soát với NAPAS: Phục vụ đối chiếu file settlement, xử lý tra soát và bộ trữ giao dịch, đảm bảo dữ liệu khớp chính xác giữa số cái core và clearing report từ NAPAS. Điều này giúp ngân hàng hạn chế rủi ro kế toán và sai lệch số dư khách hàng.

Câu 2:

- Tối ưu hóa hiệu năng xử lý giao dịch (transaction throughput & latency):

+ Luồng giao dịch kết nối trực tiếp giữa core banking và NAPAS giúp giảm độ trễ (latency) so với mô hình qua nhiều tầng middleware.

+ Message chuẩn ISO 8583 giúp giảm overhead data, tăng tốc độ truyền.

+ Khi kết hợp Gateway middleware, có thể thực hiện load balancing, queue management, giúp hệ thống duy trì throughput ổn định trong giờ cao điểm giao dịch 24/7.

- Chuẩn hóa giao thức tích hợp và nâng cao tính tương thích hệ thống

CASPO-001 Test Guide - Certified Agile Scrum Product Owner (CASPO) Study Question & CASPO-001 Exam Questions

Our CASPO-001 learning guide boosts many advantages and it is worthy for you to buy it. You can have a free download and tryout of our CASPO-001 exam torrents before purchasing. After you purchase our product you can download our CASPO-001 study materials immediately. We will send our product by mails in 5-10 minutes. We provide free update and the discounts for the old client. Our CASPO-001 Exam Materials boost high passing rate. The CASPO-001 learning prep costs you little time and energy and you can commit yourself mainly to your jobs or other important things.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q47-Q52):

NEW QUESTION # 47

As the Sprint Planning meeting progresses, the Developers see that the workload is greater than they can handle. Which two are valid actions? (Choose the best two answers)

- A. The Developers work overtime during this Sprint.
- B. Recruit additional Developers before the work can begin.
- C. The Developers ensure that the Product Owner is aware, start the Sprint, and monitor progress.
- D. Remove or change selected Product Backlog items.
- E. Cancel the Sprint.

Answer: C,D

Explanation:

The Scrum Guide allows the Sprint Backlog to be adjusted during Sprint Planning if the Developers realize the scope exceeds capacity. "If the work turns out to be different than they expected, they collaborate with the Product Owner to negotiate the scope of the Sprint Backlog within the Sprint."

* D: Removing or changing items is valid to align with capacity while preserving the Sprint Goal.

NEW QUESTION # 48

How important is it for a Product Owner to order Product Backlog items by value points? (Choose the best answer)

- A. Calculating value points is an upfront approach that conflicts with the empiricism of Scrum, and is therefore not acceptable.
- B. It is a good practice, keeping in mind that market reception is the best measure of value.
- C. Using value points is the ultimate way for a Product Owner to predict the value that the product will provide.

Answer: B

Explanation:

The Scrum Guide tasks the Product Owner with ordering the Product Backlog to maximize value, but it doesn't mandate a specific method like "value points." Option B is correct—using value points (e.g., in techniques like WSJF-Weighted Shortest Job First) is a helpful practice, but empirical validation (market reception) remains the ultimate measure, aligning with Scrum's focus on inspection and adaptation. Option A overstates value points as "ultimate," ignoring real-world feedback. Option C is too rigid; Scrum allows flexibility in tools as long as empiricism is upheld. Thus, B is the best answer.

NEW QUESTION # 49

Holding a Sprint 0 is the most effective way to: (Choose the best answer)

- A. There is no Sprint 0 in Scrum
- B. Define a reference architecture
- C. Work on team development
- D. Create a complete Product Backlog

Answer: A

Explanation:

"Sprint 0" is a concept from pre-Scrum practices and isn't part of the official framework. The Scrum Guide mandates that Sprints deliver value: "A Sprint is a time-box of one month or less during which a 'Done', usable, and potentially releasable product Increment is created." A preparatory "Sprint 0" for architecture, team building, or backlog creation contradicts this by not producing an Increment.

* A, B, C: These may occur outside Sprints, but not as a "Sprint 0."

NEW QUESTION # 50

Who should know the most about the progress toward a business objective or a release? (Choose the best answer)

- A. The Project Manager
- B. The Developers
- **C. The Product Owner**
- D. The Scrum Master

Answer: C

Explanation:

The Scrum Guide states: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team" and for "developing and explicitly communicating the Product Goal." This makes them the primary person responsible for tracking progress toward business objectives or releases, as they align the Product Backlog with stakeholder needs and strategic goals. Option B (Developers) focuses on Sprint-level execution, not overarching objectives. Option C (Scrum Master) ensures process adherence, not business progress. Option D (Project Manager) isn't a Scrum role. Thus, A is correct.

NEW QUESTION # 51

Which of the following best describes an Increment of working software? (Choose the best answer)

- A. A new user interface design for functionality delivered in previous iterations.
- B. UML diagrams that describe how to deliver functionality in future iterations.
- C. A decomposition of all Product Backlog items into tasks for future Sprint Backlog lists.
- **D. Additional features in a usable state that complement those delivered in previous iterations.**
- E. An automated test suite to verify functionality delivered in previous iterations.

Answer: D

Explanation:

The Scrum Guide defines an Increment as "a concrete stepping stone toward the Product Goal" that is usable and meets the Definition of "Done": "Each Increment is additive to all prior Increments and thoroughly verified, ensuring that all Increments work together." Option E captures this-new, usable features that build on previous work. Option A (test suite) is a tool, not an Increment. Option B (UML diagrams) is documentation, not working software. Option C (task decomposition) is planning, not a product. Option D (UI design) isn't necessarily usable software. Thus, E best describes an Increment.

NEW QUESTION # 52

.....

The reason behind our confidence is the hard work of our professionals. We have hired a team who analyze past papers, GAQM Certified Agile Scrum Product Owner (CASPO) Exam examination syllabus and add the most probable GAQM CASPO-001 exam questions in three easy-to-use formats. These formats include CASPO-001 Pdf Dumps file, web-based Certified Agile Scrum Product Owner (CASPO) practice test, and desktop practice exam software. Keep reading to find the specifications of our CASPO-001 exam practice material's three formats.
