H12-725_V4.0 Valid Test Dumps & H12-725_V4.0 Valid Exam Guide

The ExamDiscuss Huawei H12-725_V4.0 PDF questions file, desktop practice test software, and web-based practice test software, all these three Huawei H12-725_V4.0 practice test questions formats are ready for instant download. Just download any Huawei H12-725_V4.0 Exam Questions format and start this journey with confidence. Best of luck with exams and your career!!!

Huawei HCIP-Security V4.0 Sample Questions (Q34-Q39):

NEW QUESTION # 34

Huawei iMaster NCE-Campus is a web-based centralized management and control system in the CloudCampus Solution. It supports user access management and can function as multiple types of authentication servers. Which of the following servers can iMaster NCE-Campus not be used as?

- A. AD server
- B. Portal server
- C. HWTACACS server
- D. RADIUS server

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

- * iMaster NCE-Campus functions as multiple authentication servers, including:
- * Portal Server# For web-based authentication.
- * RADIUS Server# For centralized authentication and policy enforcement.

- * HWTACACS Server# For administrative command authorization.
 - * Why is B correct?
 - * iMaster NCE-Campus cannot function as an Active Directory (AD) server. It can integrate with an external AD server but does not replace it.
- HCIP-Security References:
- * Huawei HCIP-Security Guide # iMaster NCE-Campus Authentication

NEW QUESTION # 35

Which of the following statements is false about HTTP behavior?

- A. You can set an alarm threshold and a block threshold to limit the size of the upload file if file upload is allowed.
- B. When the size of the uploaded or downloaded file or the size of the content obtained through the POST operation reaches the block threshold, the system blocks the uploaded or downloaded file or POST operation.
- C. The POST method of HTTP is commonly used to send information to the server through web pages. For example, use this method when you post threads, submit forms, and use your username and password to log in to a specific system.
- **D. When the size of the uploaded or downloaded file or the size of the content obtained through the POST operation reaches the alarm threshold, the system generates a log to notify the device administrator and block the behavior.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

- * Threshold settings in firewalls allow administrators to define:
- * Alarm threshold# When exceeded, logs are generated.
- * Block threshold# When exceeded, the action is blocked.
- * Why is B false?
- * The alarm threshold does not block traffic; it only generates logs.
- * Only the block threshold enforces blocking actions.

NEW QUESTION # 36

Which of the following statements is false about web rewriting in web proxy?

- A. Images may be misplaced.
- B. The intranet server addresses can be hidden, ensuring high security.
- C. The fonts may be incomplete.
- **D. Internet Explorer controls are required.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

- * Web rewriting in web proxy modifies web page content for security and access control.
- * Issues with web rewriting include:
- * A is true# Server addresses can be hidden.
- * B is true# Images may be misaligned due to rewriting.
- * C is true# Fonts may be incomplete.
- * D is false# Web rewriting does not require Internet Explorer controls.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Web Proxy and Web Rewriting

NEW QUESTION # 37

Which of the following is not a response action for abnormal file identification?

- A. Block
- **B. Allow**

- C. Alert
- D. Delete

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

* Response actions for abnormal file identification in Huawei firewalls include:

- * A. Alert# Logs the event but does not stop the file.
- * B. Block# Prevents the file from being accessed or downloaded.
- * D. Delete# Removes the malicious file before it reaches the user.

* Why is C incorrect?

* Allowing an identified abnormal file defeats the purpose of security enforcement.

HCIP-Security References:

* Huawei HCIP-Security Guide # File Anomaly Detection & Response

NEW QUESTION # 38

In a Huawei network security environment, which of the following is a key advantage of using HWTACACS over RADIUS for device management authentication?

Options:

- A. HWTACACS encrypts only passwords, while RADIUS encrypts the entire payload.
- **B. HWTACACS provides per-command authorization, allowing different privilege levels for different users.**
- C. HWTACACS operates over UDP, ensuring faster communication than RADIUS.
- D. HWTACACS does not support accounting, while RADIUS does.

Answer: B

Explanation:

Understanding the Differences Between HWTACACS and RADIUS:

* HWTACACS (Huawei Terminal Access Controller Access-Control System) is a Huawei-enhanced version of TACACS+ used for AAA (Authentication, Authorization, and Accounting).

* RADIUS (Remote Authentication Dial-In User Service) is also an AAA protocol but is mainly designed for network access authentication, such as VPNs and wireless authentication.

Why is Option B Correct?

* HWTACACS supports per-command authorization, meaning administrators can assign different command privileges to different users.

* For example, a junior network engineer may be allowed to view configurations but not modify them, while a senior engineer has full access.

* RADIUS does not support granular command authorization, as it primarily controls network access rather than device management.

NEW QUESTION # 39

.....

The HCIP-Security V4.0 H12-725_V4.0 certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your HCIP-Security V4.0 H12-725_V4.0 certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role. The HCIP-Security V4.0 H12-725_V4.0 Certification enables you to move ahead in your career later.
