ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q86-Q91):

NEW QUESTION # 86

Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.

What should Alison do to get the information he needs.

- A. Alison should use SmartWhois to extract the required website information.
- B. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- C. Alison should run the Web Data Extractor tool to extract the required website information.
- D. Alison should use https://archive.org to extract the required website information.

Answer: D

Explanation:

To retrieve historical information about a company's website, including content that may have been removed or altered, Alison should use the Internet Archive's Wayback Machine, accessible at https://archive.org. The Wayback Machine is a digital archive of the World Wide Web and other information on the Internet, providing free access to snapshots of websites at various points in time. This tool is invaluable for researchers and analysts looking to understand the evolution of a website or recover lost information. References:

NEW QUESTION # 87

Which of the following components refers to a node in the network that routes the traffic from a workstation to external command and control server and helps in identification of installed malware in the network?

- A. Gateway
- B. Repeater
- C. Hub
- D. Network interface card (NIC)

Answer: A

NEW QUESTION # 88

An organization suffered many major attacks and lost critical information, such as employee records, and financial information. Therefore, the management decides to hire a threat analyst to extract the strategic threat intelligence that provides high-level information regarding current cyber-security posture, threats, details on the financial impact of various cyber-activities, and so on. Which of the following sources will help the analyst to collect the required intelligence?

- A. Human, social media, chat rooms
- B. Campaign reports, malware, incident reports, attack group reports, human intelligence
- C. OSINT, CTI vendors, ISAO/ISACs
- D. Active campaigns, attacks on other organizations, data feeds from external third parties

Answer: C

Explanation:

For gathering strategic threat intelligence that provides a high-level overview of the current cybersecurity posture, potential financial impacts of cyber activities, and overarching threats, sources such as Open Source Intelligence (OSINT), Cyber Threat Intelligence (CTI) vendors, and Information Sharing and Analysis Organizations (ISAOs)/Information Sharing and Analysis Centers (ISACs) are invaluable. OSINT involves collecting data from publicly available sources, CTI vendors specialize in providing detailed threat intelligence services, and ISAOs/ISACs facilitate the sharing of threat data within specific industries or communities.

These sources can provide broad insights into threat landscapes, helping organizations understand how to align their cybersecurity strategies with current trends and threats. References:
