Free PDF Quiz 2026 Reliable Pegasystems PEGACPLSA23V1 Exam Vce Free

Are you tired of feeling overwhelmed and unsure about how to prepare for the Certified Pega Lead System Architecture (LSA) Exam 23 (PEGACPLSA23V1) exam? Are you ready to take control of your future and get the PEGACPLSA23V1 certification you need to accelerate your career? If so, it's time to visit TestKingFree and download real Pegasystems PEGACPLSA23V1 Exam Dumps. Our team of experts has designed a PEGACPLSA23V1 Exam study material that has already helped thousands of students just like you achieve their goals. We offer a comprehensive PEGACPLSA23V1 practice exam material that is according to the content of the Pegasystems PEGACPLSA23V1 test.

Pegasystems PEGACPLSA23V1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Pega Platform Design: Understand the value of Center-out architecture in building scalable Pega solutions. Explore how deployment options influence app design, and apply performance monitoring. Work with distributed case designs and know when to include other Pega tools. Learn about multi-tenant systems, high availability, and features like Pega Mobile, IVA, and Process Fabric. Gain insight into containerization, Hazelcast, and cloud architecture. Understand Agile Workbench and Agile Studio tools.

Topic 2	<ul style="list-style-type: none"> • Deployment and Testing Design: Follow best practices for production deployment. Plan and build CI CD pipelines. Design testing strategies and use automation to maintain quality. Track and assess release performance effectively.
Topic 3	<ul style="list-style-type: none"> • Pega Platform Design Extended: Use App Studio for app development. Understand features of Prediction Studio and Admin Studio. Reuse relevant components efficiently. Grasp the basics of UX design, DX API, and Constellation. Design accessible and user-friendly experiences.
Topic 4	<ul style="list-style-type: none"> • Application Design: Learn how Microjourneys guide app design. Understand case structure, Pega Express methods, and best practices. Create case hierarchies, and use rulesets, classes, and specialisation wisely. Apply layered design for scalable solutions.
Topic 5	<ul style="list-style-type: none"> • Data Model Design: Understand how data relationships work. Build new data models or extend existing ones. Use data pages and virtualization to manage information. Design reusable and reliable data structures. Learn dynamic class referencing and polymorphism. Extend and benefit from Pega's industry foundation models.
Topic 6	<ul style="list-style-type: none"> • Security Design: Choose the right authentication and access models based on the situation. Configure access groups, roles, and role hierarchies. Understand rule-level security. Spot and prevent security threats. Apply best practices to secure applications and use event logging for monitoring.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q41-Q46):

NEW QUESTION # 41

You are a Pega developer working on a large-scale application. You need to manage different settings that control the behavior of your application. These settings need to be easily configurable by production users, should be able to vary between different environments, and should be packaged with the application when it is migrated. Which Pega feature is the most appropriate to use in this scenario?

- A. Configuration Sets
- **B. Application Settings**
- C. Rule System Settings
- D. Dynamic System Settings

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Pega's configuration management features, as outlined in Pega Academy's Lead System Architect Mission and the Pega Certified Lead System Architect Study Guide, provide various options for managing application settings. Application Settings are specifically designed for environment-specific, user-configurable settings that are packaged with the application during migration.

* Option A (Incorrect): Configuration Sets are used for managing test configurations in Pega's testing framework, not for runtime application behavior settings, per the Testing Configuration module.

* Option B (Incorrect): Dynamic System Settings (DSS) are system-wide settings managed by administrators, not easily configurable by production users. They are not packaged with the application, as noted in the System Configuration guidelines.

* Option C (Incorrect): Rule System Settings is not a standard Pega feature. The term may confuse with DSS or other rule types, but it does not apply here, per the Configuration Management module.

* Option D (Correct): Application Settings are rule-based, user-configurable settings that can vary by environment (e.g., via ruleset versioning) and are packaged with the application during migration. They are ideal for production user access, as documented in the Application Settings section of Pega Community.

:

Pega Academy: Lead System Architect Mission (covers configuration options).

Pega Community: Application Settings (details on user-configurable settings).

Pega Certified Lead System Architect Study Guide (v23): Section on Pega Platform Architecture (emphasizes Application Settings for configuration).

NEW QUESTION # 42

To accommodate changes to integration Rules, a Lead System Architect (LSA) performs which two of the following actions? (Choose Two)

- A. Develop custom rules to encapsulate the integration Data Model and the complexity of versioning.
- B. Create new Ruleset versions using the existing integration base class.
- C. Version the application when certain integration Rulesets become obsolete.
- D. Specify a new integration base class when using a wizard by using dynamic class referencing (DCR) to get the class name at run time.

Answer: C,D

NEW QUESTION # 43

When is it appropriate to use a spin-off?

- A. When you wish to run calculations in a separate thread from the current process
- B. When you wish to make a long-running SOAP service call asynchronously
- C. When you wish to start another flow execution while continuing down the current process path
- D. When you wish to call multiple connector rules concurrently

Answer: C

NEW QUESTION # 44

What is the purpose of a restore point in Pega Platform™?

- A. To enable the rollback of a deployment to a previous state.
- B. To save metadata during a product import.
- C. To create a backup of the entire system.
- D. To allow for the creation of new applications.

Answer: A

NEW QUESTION # 45

Which of the following terms refers to the total experience of a user, whether intended or not?

- A. AI
- B. UI
- C. IT
- D. UX

Answer: D

NEW QUESTION # 46

.....

Pegasystems is one of the most powerful and rapidly growing fields nowadays. Everyone is trying to get the Pegasystems PEGACPLSA23V1 certification to improve their futures with it. Success in the test plays an important role in the up gradation of your CV and getting a good job or working online to achieve your dreams. The students are making up their minds for the Pegasystems PEGACPLSA23V1 test but they are mostly confused about where to prepare for it successfully on the first try. This confusion leads to choosing outdated material and ultimately failure in the test. The best way to avoid failure is using updated and real questions.
