- A. A Lightning component in Salesforce Classic and a Lightning component in Lightning Experience
- B. A Lightning page in Salesforce Classic and a Visualforce page in Lightning Experience
- C. A Visualforce page in Salesforce Classic and a Lightning component in Lightning Experience
- D. A Visualforce page in Salesforce Classic and a Lightning page in Lightning Experience

Answer: C

NEW QUESTION # 25

A developer is asked to write helper methods that create test data for unit tests.

What should be changed in the Testutils class so that its methods are only usable by unit test methods?

- A. Remove static from line 03.
- B. Add @IsTest above line 01.
- C. Change public to private on line 01.
- D. Add @IsTest above line 03,

Answer: D

NEW QUESTION # 26

A developer created this Apex trigger that calls MyClass.myStartmethod:

The developer creates a test method that calls MyClass.myStartmethod directly, resulting in 81% overall code coverage.

What happens when the developer tries to deploy the ... and two classes to production, assuming no other code exists?

- A. The deployment fails because the Apex-MQ has no code coverage.
- B. The deployment fails because no assertions were made in the test method.
- C. The deployment passes because both classes and the trigger were included in the deployment.
- D. The deployment passes because the Apex code has the required 75% code coverage.

Answer: A
