

Free PDF Quiz 2026 Huawei H12-711_V4.0–Valid Pdf Free

BONUS!!! Download part of VerifiedDumps H12-711_V4.0 dumps for free: <https://drive.google.com/open?id=1Myu8jXO2vJIsZNQKd9ORTIkOwjIqOfHZ>

Normally, you will come across almost all of the real test questions on your usual practice. Maybe you are doubtful about our H12-711_V4.0 training questions. We have statistics to tell you the truth. The passing rate of our products is the highest according to the investigation. Many candidates can also certify for our H12-711_V4.0 Study Materials. As long as you are willing to trust our H12-711_V4.0 preparation materials, you are bound to get the certificate.

Huawei H12-711_V4.0 Exam Syllabus Topics:

Section	Objectives
	- Access control and authentication • 1. NAC concepts • 2. AAA framework - VPN and secure communication
Topic 1: Network Security Technologies	• 1. SSL VPN overview • 2. IPsec VPN fundamentals - Firewall and perimeter defense • 1. Stateful inspection firewall principles • 2. Security zone concepts

- Cryptography basics

- 1. Symmetric and asymmetric encryption
- 2. Hashing and digital signatures

Topic 2: Security Fundamentals

- Information security concepts (CIA triad, risk, threats, vulnerabilities)

- 1. Security goals and principles
- 2. Common attack types and defense concepts

- Security monitoring and logging

- 1. Log analysis basics
- 2. Security event monitoring

Topic 3: Security Operations and Management

- Incident response

- 1. Security incident lifecycle
- 2. Basic troubleshooting and mitigation

- Huawei USG Firewall

- 1. Traffic filtering and NAT concepts
- 2. Basic configuration and security policies

Topic 4: Huawei Security Products

- Security solutions overview

- 1. Web security and threat protection
- 2. Anti-DDoS and intrusion prevention concepts

H12-711_V4.0 Instant Access | H12-711_V4.0 Exam Reviews

Some of our customers are white-collar workers with no time to waste, and need a Huawei certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills. So we try to meet different requirements by setting different versions of our H12-711_V4.0 question and answers. The special one is online H12-711_V4.0 engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can apply this version of H12-711_V4.0 exam questions on all electric devices.

Huawei HCIA-Security V4.0 Sample Questions (Q109-Q114):

NEW QUESTION # 109

Which of the following options does not belong to the quintuple range?

- A. Destination port
- B. Source MAC
- C. Source IP
- D. Destination IP

Answer: B

NEW QUESTION # 110

When logging in to the web UI through HTTPS, you need to specify a local certificate issued by a CA that the web browser trusts for the HTTPS client on the device. Because the web browser can verify the local certificate, this approach avoids malicious attacks and ensures secure logins of administrators.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Explanation From HCIA-Security documents:

HTTPS protects web-based management by combining encryption with server identity authentication. For the browser to trust the device's HTTPS service, the device must present a server certificate that can be validated by the browser. That is why administrators often configure the device to use a local certificate (the device's certificate) that is issued by a trusted CA or whose CA chain has been imported into the browser/OS trust store. When the certificate is trusted, the browser can verify the certificate chain, validity period, and hostname binding, which helps prevent attackers from impersonating the device during login.

If a device uses a self-signed or untrusted certificate, the browser shows warnings and users may click through them, increasing the risk of man-in-the-middle attacks and credential theft. Using a CA-trusted certificate strengthens administrator logins by ensuring the management page you connect to is genuinely the intended device and that the session is encrypted end-to-end.

NEW QUESTION # 111

Intrusion prevention signatures are used to describe the characteristics of attack behavior in the network. Firewalls detect and prevent attacks by comparing data flows with intrusion prevention signatures.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 112

DES is a stream encryption algorithm, because the cipher capacity is only 56 bits, so it is not enough to deal with the weakness of insufficient security, and later 3DES was proposed.

- A. FALSE
- **B. TRUE**

Answer: B

NEW QUESTION # 113

L2TP VPN is suitable for scenarios where employees on business trips access through VPN dial-up.

Employees can access the corporate intranet through remote dialing from any place with Internet access, thereby accessing intranet information.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 114
