Candidates should also be familiar with Salesforce's best practices and guidelines, such as data governance, security models, and data migration strategies.

Salesforce Certified Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

Universal Containers (UC) has a queue that is used for managing tasks that need to be worked by the UC customer support team. The same team will now be working some of UC's Cases.

Which two options should the administrator use to help the support team?

Choose 2 answers

- A. Use assignment rules to set the queue as the owner of the case.
- B. Add Case to the existing queue as available object.
- C. Configure a flow to assign the cases to the queue.
- D. Create a new queue and add Cases as an available object.

Answer: A,B

Explanation:

Assignment rules and queue configuration are two options that should be used to help the support team work on some of UC's cases. Assignment rules can be used to automatically assign cases to a queue based on certain criteria, such as case origin or priority. Queue configuration can be used to add Case as an available object to the existing queue and specify which users or groups can access the queue. References:
