最新的 CWDP Wi-Fi Design CWDP-305 免費考試真題 (Q241-Q246):

問題 #241

During a validation site survey, you realize that the installers mounted some of the APs on the wall when the design called for a ceiling mount. They said that this was done because the cabling company did not have the right tools to run the cables above the ceiling. You know that this will cause a difference in how the Wi-Fi signal will radiate throughout the environment. What should you do in this case?

- A. Turn up the power on the APs to accommodate for the difference
- B. Blame the cabling company if the Wi-Fi doesn't work since they did not do their job correctly
- C. Advise the stakeholder that requirements will not be met and a new design process will be needed to meet the requirements
- D. Leave it as it is because it will not have a significant impact

答案：C

問題 #242

Who should be present from the customer side during the final meeting after successfully implementing a WLAN infrastructure?

- A. Acquirer and stakeholders
- B. End-users
- C. Remote workers
- D. The customer's customers

答案: A

解題說明:

Comprehensive and Detailed Explanation:

In the final meeting after successfully implementing a WLAN infrastructure, it is essential to have the acquirer and key stakeholders from the customer side present. The acquirer is typically the individual or group responsible for procuring the WLAN solution, while stakeholders include those who have an interest in the project's success, such as IT managers, network administrators, and department heads. Their presence ensures that the implementation aligns with the organization's requirements and expectations, and it provides an opportunity to address any concerns or questions before project closure.

問題 #243

What operational plane would a WNMS primarily interact with?

Response:

- A. Distribution
- B. Integration
- C. Management
- D. Control
- E. Data

答案: C

問題 #244

During lunch time in the break room of a company, Wi-Fi connectivity on the 2.4 GHz band is intermittent. Every other time of the day, it works fine. What's the likely cause of this issue?

Response:

- A. The AP in the cafeteria keeps rebooting due to lack of PoE budget on the switch
- B. Employees are using their cell data instead of using the Wi-Fi
- C. Microwaves in the cafeteria are interfering with the Wi-Fi on the 2.4 GHz band
- D. Toasters and ovens are heating up the air, raising the noise floor with the Wi-Fi on the 2.4 GHz band

答案: C

問題 #245

You are using site software design features. You have imported a floor plan, but the simulated RF coverage is nowhere close to the real RF coverage you see with a walkabout.

Given that the simulation is significantly different, when step was likely missed when using the software?

Response:

- A. Conversion to PNG
- B. Conversion to DWG
- C. Adding extra APs to simulate interference
- D. Calibration

答案: D
