BONUS!!! Pass4Test C_BCSBS_2502ダンプの一部を無料でダウンロード: <https://drive.google.com/open?id=18w5I73DT2jmH0kUTAQ5605zvi3TXvCVd>

Pass4Testが提供するC_BCSBS_2502資料は比べものにならない資料です。これは前例のない真実かつ正確なものです。C_BCSBS_2502受験生のあなたが首尾よくC_BCSBS_2502試験に合格することを助けるように、当社のSAPエリートの団体はずっと探っています。Pass4Testが提供した製品は真実なもので、しかも価格は非常に合理的です。Pass4Testの製品を選んだら、あなたがもっと充分の時間でC_BCSBS_2502試験に準備できるように、当社は一年間の無料更新サービスを提供します。そうしたら、試験からの緊張感を解消することができ、あなたは最大のメリットを取得できます。

SAP C_BCSBS_2502 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.
トピック 2	<ul style="list-style-type: none">Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.

トピック 3

- **Discovering SAP Business AI:** This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.

C_BCSBS_2502試験番号 & C_BCSBS_2502難易度受験料

Pass4Testのシニア専門家チームはSAPのC_BCSBS_2502試験に対してトレーニング教材を研究できました。Pass4Testが提供した教材を勉強ツールとしてSAPのC_BCSBS_2502認定試験に合格するのはとても簡単です。Pass4Testも君の100%合格を保証いたします。

SAP Certified Associate - Positioning SAP Business Suite 認定 C_BCSBS_2502 試験問題 (Q30-Q35):

質問 # 30

Which SAP Business Suite components are critical for enterprise-wide integration? There are 3 correct answers to this question.

- **A. SAP ERP**
- **B. SAP Business Network**
- **C. SAP S/4HANA**
- D. SAP Ariba
- E. SAP Predictive Maintenance

正解: A、B、C

質問 # 31

Which SAP solutions provide real-time business intelligence and reporting? There are 2 correct answers to this question.

- **A. SAP Predictive Analytics**
- **B. SAP BusinessObjects**
- C. SAP Fieldglass
- D. SAP Transportation Management

正解: A、B

質問 # 32

What are unique elements of SAP Business AI?

Note: There are 3 correct answers to this question.

- **A. In-depth knowledge of business processes across various industries**
- B. Development of SAP-specific large language models
- C. Focus on the technology stack
- **D. Direct access to pertinent customer business data**
- **E. Robust partner ecosystem with synergistic collaboration**

正解: A、D、E

解説:

The question asks for the unique elements of SAP Business AI, which is a suite of AI capabilities embedded within SAP Business Suite to enhance business processes, decision-making, and automation. According to official SAP documentation and the provided search results, the unique elements of SAP Business AI include its robust partner ecosystem with synergistic collaboration, in-depth knowledge of business processes across various industries, and direct access to pertinent customer business data. These align with

Options A, B, and E, making them the correct answers.

Explanation of Correct Answers:

Option A: Robust partner ecosystem with synergistic collaboration

This is correct because SAP Business AI leverages a robust partner ecosystem that includes technology giants like Google Cloud, NVIDIA, Microsoft, AWS, and Cohere, as well as implementation partners, to deliver scalable, industry-specific AI solutions. This collaborative ecosystem enhances SAP Business AI by integrating advanced AI models, ensuring interoperability, and addressing customer-specific needs through partner expertise. The SAP Business AI documentation on www.sap.com states:

"SAP's strategy includes a robust partner ecosystem with synergistic collaboration, partnering with industry leaders like NVIDIA, Google Cloud, and Cohere to deliver interoperable AI agents and scalable solutions.

This ecosystem enables SAP Business AI to address unique customer challenges through combined expertise and innovation."

news.sap.com Additionally, the SAP News Center emphasizes the role of partners:

"A key element of SAP's AI strategy is leveraging partners' expertise. Partners develop innovative AI solutions and extensions, enhancing the SAP portfolio with customer-specific use cases built on SAP BTP." news.sap.com This ecosystem ensures that SAP Business AI is not limited to SAP's internal capabilities but benefits from a collaborative network, making robust partner ecosystem a unique element.

Option B: In-depth knowledge of business processes across various industries This is correct because SAP Business AI is purpose-built for business processes, grounded in SAP's deep understanding of industry-specific workflows across sectors like manufacturing, retail, consumer products, life sciences, and more. This knowledge allows SAP Business AI to embed AI directly into processes like supply chain management, finance, and HR, delivering contextually relevant outcomes. The Understanding SAP Business AI Functions Across Industries article from Crescense states:

"SAP Business AI is purpose-built for business processes, grounded in enterprise data and infused into the workflows users already rely on. It is industry-relevant, designed to support use cases specific to verticals like retail, consumer products, manufacturing, and life sciences." crescenseinc.com The Positioning SAP Business Suite documentation on learning.sap.com further notes:

"SAP Business AI's unique strength lies in its in-depth knowledge of business processes across various industries, enabling AI to be embedded into core SAP solutions like S/4HANA, optimizing processes with industry-specific intelligence." For example, in manufacturing, SAP Business AI supports predictive maintenance, while in consumer products, it enables demand forecasting, showcasing its tailored, process-centric approach. This makes in-depth knowledge of business processes a unique element.

Option E: Direct access to pertinent customer business data

This is correct because SAP Business AI is uniquely positioned to access and utilize customer business data directly from SAP applications (e.g., SAP S/4HANA, SAP SuccessFactors) and harmonized through SAP Datasphere. This direct access ensures that AI models are trained on relevant, high-quality enterprise data, delivering accurate and context-aware insights. The SAP Business AI overview on www.sap.com highlights:

"SAP Business AI is grounded in your business data, using harmonized data and process expertise to streamline operations, optimize decisions, and unlock enterprise-wide efficiency." sap.com The Explaining the role of SAP Business AI lesson on learning.sap.com elaborates:

"SAP Business AI's direct access to pertinent customer business data, such as transactional data from SAP applications, ensures reliable, real-time insights. Solutions like SAP Datasphere provide a unified data foundation, enabling AI to leverage customer-specific data securely." This direct access differentiates SAP Business AI from generic AI platforms, as it uses proprietary SAP data (e.g., 77% of global transactions processed by SAP systems) to drive business-specific outcomes, making direct access to customer business data a unique element. fingent.com

Explanation of Incorrect Answers:

Option C: Development of SAP-specific large language models

This is incorrect because SAP Business AI does not focus on developing SAP-specific large language models (LLMs). Instead, SAP partners with leading LLM providers like Cohere, Google (Gemini), and Meta (Llama

3) to integrate their models into the SAP ecosystem via SAP BTP and the Generative AI Hub. The SAP Community article on SAP Business AI explains:

"SAP leverages a rich ecosystem of technology partner LLM offerings through SAP BTP's AI Foundation and Generative AI Hub, rather than developing SAP-specific LLMs. This approach ensures access to the latest innovations while prohibiting partners from training on customer data." community.sap.com While SAP uses LLMs for tasks like natural language processing (e.g., Joule copilot), it relies on external models tailored to SAP's business context, not proprietary LLMs developed in-house. Thus, development of SAP-specific LLMs is not a unique element.

Option D: Focus on the technology stack

This is incorrect because SAP Business AI prioritizes business outcomes and process integration over a focus on the technology stack itself. While SAP BTP provides a robust technology foundation for AI (e.g., AI Core, Generative AI Hub), the unique value of SAP Business AI lies in its application to business processes and data, not the underlying technology stack. The SAP Business AI documentation on learning.sap.com states:

"SAP Business AI focuses on delivering relevant, reliable, and responsible outcomes, leveraging business data and process expertise, rather than emphasizing the technology stack. The stack, provided by SAP BTP, is an enabler, not the core differentiator." The SAP News Center reinforces this:

"SAP's approach embeds AI into business processes, not treating it as a standalone technology stack, ensuring seamless integration with enterprise workflows." news.sap.com This makes focus on the technology stack an incorrect choice, as it is secondary to

SAP's process-centric AI strategy.

Summary:

The unique elements of SAP Business AI are its robust partner ecosystem with synergistic collaboration (leveraging partnerships with tech leaders and implementation partners), in-depth knowledge of business processes across various industries (enabling industry-specific AI use cases), and direct access to pertinent customer business data (using SAP's enterprise data for reliable insights), corresponding to Options A, B, and E). Option C is incorrect because SAP does not develop SAP-specific LLMs, relying instead on partner models. Option D is incorrect because the focus is on business outcomes, not the technology stack. These elements align with SAP's strategy to deliver relevant, reliable, and responsible AI within SAP Business Suite, as supported by the provided search results and official documentation.

質問 # 33

Drag and drop the key terms to the correct position.

正解:

解説:

Explanation:

- * Largest Circle (Outer Layer): AI (Artificial Intelligence)
- * Second Layer (inside AI): Machine Learning
- * Third Layer (inside Machine Learning): Deep Learning
- * Innermost Layer (inside Deep Learning): Generative AI (Gen AI)
- * AI (Artificial Intelligence): The broadest field. Encompasses all intelligent systems that mimic human behavior, decision making, or reasoning.
- * Machine Learning: A subset of AI. Uses algorithms to learn patterns from data and make predictions.
- * Deep Learning: A subset of Machine Learning. Involves neural networks with many layers (hence "deep"), great for processing images, language, etc.
- * Generative AI: A subset of Deep Learning. These models (like GPT, DALL-E, etc.) can generate new content such as text, images, or code.

Visual Placement from Largest to Smallest:

- * AI (outermost, encompasses everything)
- * Machine Learning (inside AI)
- * Deep Learning (inside Machine Learning)
- * Generative AI (inside Deep Learning)

質問 #34

Which SAP Business Suite application is responsible for handling logistics execution and transportation management? Please choose the correct answer.

- A. SAP CRM
- B. SAP FI
- C. SAP SCM
- D. SAP HR

正解： C

質問 # 35
