High Pass-Rate Oracle 1z0-071 Latest Exam Pass4sure Are Leading Materials & Reliable 1z0-071: Oracle Database SQL

You only need 20-30 hours to learn Oracle Database SQL exam torrent and prepare the exam. Many people, especially the in-service staff, are busy in their jobs, learning, family lives and other important things and have little time and energy to learn and prepare the exam. But if you buy our 1z0-071 Test Torrent, you can invest your main energy on your most important thing and spare 1-2 hours each day to learn and prepare the exam. Our questions and answers are based on the real exam and conform to the popular trend in the industry.

Oracle Database SQL Sample Questions (Q194-Q199):

NEW QUESTION # 194

View the Exhibit and examine the description of the EMPLOYEES table.

You want to calculate the total remuneration for each employee. Total remuneration is the sum of the annual salary and the percentage commission earned for a year. Only a few employees earn commission.

Which SQL statement would you execute to get the desired output?

- A. `SELECT first_name, salary, salary*12+(salary*NVL2 (commission_pct, salary,salary+commission_pct))"Total"FROM EMPLOYEES;`
- B. `SELECT first_name, salary, salary*12+salary*commission_pct "Total"FROM EMPLOYEES;`
- C. `SELECT first_name, salary*12 + NVL(salary,0)*commission_pct, "Total"FROM EMPLOYEES;`
- D. `SELECT first_name, salary (salary + NVL (commission_pct, 0)*salary)*12 "Total"FROM EMPLOYEES;`

Answer: A

NEW QUESTION # 195

In the PROMOTIONS table, the PROMO_BEGIN_DATE column is of data type and the default date format is DD-MON-RR

Which two statements are true about expressions using PROMO_BEGIN_DATE in a query?

- A. `PROMO_BEGIN_DATE - SYSDATE` will return a number
- B. `PROMO_BEGIN_DATE - SYSDATE` will return an error
- C. `TONUMBER (PROMO_BEGIN_DATE) - 5` will return a number
- D. `TODATE(PROMO_BEGIN_DATE *5)` will return a date
- E. `PROMO_BEGIN_DATE - 5` will return a date

Answer: A,E

Explanation:

In Oracle SQL, when you subtract a number from a date, the result is a date. When you subtract one date from another, the result is the number of days between the two dates.

* B: `PROMO_BEGIN_DATE - 5` will subtract 5 days from the `PROMO_BEGIN_DATE`, resulting in a new date that is 5 days earlier than `PROMO_BEGIN_DATE`.

* C: `PROMO_BEGIN_DATE - SYSDATE` will return the number of days between the `PROMO_BEGIN_DATE` and the current date (`SYSDATE`).

The incorrect options are:

* A: `TONUMBER(PROMO_BEGIN_DATE) - 5` will not return a number because

`PROMO_BEGIN_DATE` is a date, and `TONUMBER` is not a valid function to convert dates to numbers in Oracle.

* D: `PROMO_BEGIN_DATE - SYSDATE` will not return an error; it will return the number of days between the two dates as explained above.

* E: `TODATE(PROMO_BEGIN_DATE * 5)` will not return a date because `PROMO_BEGIN_DATE`

`* 5` is not a valid operation in Oracle SQL as you cannot multiply a date by a number, and `TODATE` is not a valid function. The correct function name is `TO_DATE`.

* Oracle Documentation on Date Arithmetic: Database SQL Language Reference - Datetime Functions

NEW QUESTION # 196

View the Exhibits and examine PRODUCTS and SALES tables.

Table PRODUCTS		
Name	Null?	Type
PROD_ID	NOT NULL	NUMBER(6)
PROD_NAME	NOT NULL	VARCHAR2(50)
PROD_DESC	NOT NULL	VARCHAR2(4000)
PROD_CATEGORY	NOT NULL	VARCHAR2(50)
PROD_CATEGORY_ID	NOT NULL	NUMBER
PROD_UNIT_OF_MEASURE		VARCHAR2(20)
SUPPLIER_ID	NOT NULL	NUMBER(6)
PROD_STATUS	NOT NULL	VARCHAR2(20)
PROD_LIST_PRICE	NOT NULL	NUMBER(8,2)
PROD_MIN_PRICE	NOT NULL	NUMBER(8,2)

You issue the following query to display produce name and the number of times the product has been sold:

```
SQL>SELECT p. PROD_name, i. item_cnt
FROM (SELECT prod_id, count (*) item_cnt
FROM sales
GROUP BY prod_id) I RIGHT OUTER JOIN products p
ON i. prod_id = p.prod_id;
```

What happens when the above statement is executed?

- A. The statement produce an error because a subquery in the FROM clause and outer-jions cannot be together.
- B. The statement produces an error ITEM_CNT cannot be displayed in the outer query.
- **C. the statement executes successfully and produces the required output.**
- D. The statement produces an error because the GROUP By clause cannot be used in a subquery in the FROM clause.

Answer: C

NEW QUESTION # 197

Which three are true about granting object privileges on tables, views, and sequences?

- A. INSERT can be granted on tables, views, and sequences.
- B. UPDATE can be granted only on tables and views.
- **C. SELECT can be granted only on tables and views.**
- **D. ALTER can be granted only on tables and sequences.**
- E. DELETE can be granted on tables, views, and sequences.
- **F. REFERENCES can be granted only on tables and views.**

Answer: C,D,F

Explanation:

In Oracle Database, object privileges are rights to perform a particular action on a specific object in the database. Here's why the other options are incorrect:

A. UPDATE can be granted on tables, views, and materialized views, but not sequences. B. DELETE cannot be granted on sequences because sequences do not store data that can be deleted. D. INSERT cannot be granted on sequences; sequences are used to generate numbers, not to be inserted into directly. C. REFERENCES allows the grantee to create a foreign key that references the table or the columns of the table. It is applicable only to tables and views. E. SELECT can indeed only be granted on tables and views (including materialized views). F. ALTER is an object privilege that can be granted on tables and sequences but not views.

For more details, one may refer to the Oracle Database SQL Language Reference documentation, which specifies the types of object privileges and the objects they apply to.

NEW QUESTION # 198

You issued the following command:

```
SQL> DROP TABLE employees;
```

Which three statements are true?

- **A. All indexes and constraints defined on the table being dropped are also dropped.**

- B. The space used by the employees table is reclaimed immediately.
- C. Sequences used in the employees table become invalid.
- **D. All uncommitted transactions are committed.**
- E. The employees table can be recovered using the rollback command.
- **F. The employees table is moved to the recycle bin**

Answer: A,D,F

NEW QUESTION # 199

.....

Most of the study material providers fail to provide insight on the 1z0-071 real exam questions to the candidates of certification exams. There is such scene with ActualPDF products. They are in fact made, keeping in mind the 1z0-071 Actual Exam. Thus every 1z0-071 exam dumps is set in line with the format of real exam and introduces the candidate to it perfectly.
