## Plat-Con-201最新試題 & Plat-Con-201認證指南

Fast2test的Plat-Con-201考古題和實際的認證考試一樣，不僅包含了實際考試中的所有問題，而且考古題的軟體版完全類比了真實考試的氛圍。使用了Fast2test的考古題，你在參加考試時完全可以應付自如，輕鬆地獲得高分。

### 最新的 Salesforce Consultant Plat-Con-201 免費考試真題 (Q99-Q104):

#### 問題 #99

A consultant is working on a project that requires the use of Omnistudio tools to automate complex business processes. The consultant is considering using Decision Matrices and Expression Sets.

What is the primary benefit of using Decision Matrices and Expression Sets in Omnistudio?

- A. They allow for the creation of custom fields.
- B. They facilitate the creation of custom objects.
- C. They allow for calculations on matrix lookups and variables.
- D. They enable the creation of custom code.

答案： C

解題說明：

\* Decision Matrices and Expression Sets are used to perform calculations, apply conditional logic, and evaluate business rules in OmniStudio.

\* The primary benefit (A) is that they enable calculations on matrix lookups and variables.

\* Decision Matrices allow for defining complex rules based on multiple conditions (e.g., determining discount percentages based on

customer type).

- \* Expression Sets allow for calculations and formulas to process data dynamically.
  - \* B. Facilitate the creation of custom objects - Decision Matrices and Expression Sets do not create Salesforce objects; they only manipulate and evaluate data.
  - \* C. Allow for the creation of custom fields - Custom fields are created at the Salesforce object level, not via Decision Matrices or Expression Sets.
  - \* D. Enable the creation of custom code - OmniStudio is a low-code/no-code platform, meaning these tools are designed to replace the need for custom Apex or JavaScript.
- Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:
- \* Decision Matrices Overview
  - \* Expression Sets in Calculation Procedures

### 問題 #100

A consultant is designing a FlexCard for a client. The client wants the FlexCard to launch a child card with additional information and actions related to the parent card when the agent clicks on a button. How should the consultant design the FlexCard to meet the client's requirements?

- A. Design the parent card to launch a child card when the specific action is taken.
- B. Design the parent card to launch a new OmniScript when the specific action is taken.
- C. Design the parent card to launch a new DataRaptor when the specific action is taken.
- **D. Design the parent card to launch a child card through a Flyout Action.**

答案: D

解題說明:

Comprehensive and Detailed In-Depth Explanation: The requirement is for a FlexCard (parent card) to launch a child card with additional information and actions when an agent clicks a button. In Salesforce OmniStudio, the Flyout Action is the specific mechanism designed within FlexCards to achieve this, making B the most precise and correct answer.

Here's why B. Design the parent card to launch a child card through a Flyout Action is the correct answer:

\* Flyout Action Overview: A Flyout Action in FlexCards is an interactive feature that displays a pop-up panel (flyout) when triggered, typically by a button or link. This flyout can contain a child FlexCard, OmniScript, or custom content, showing additional details or enabling actions related to the parent card's data.

\* Meeting the Requirement:

\* Child Card Launch: The Flyout Action can embed a child FlexCard, which displays supplemental information (e.g., related records or details) and includes actions (e.g., buttons to update data).

\* Button Trigger: In the FlexCard Designer, the consultant can add a Button element to the parent card, configure its action type as "Flyout," and link it to a child FlexCard. When the agent clicks the button, the flyout appears with the child card.

\* Contextual Data: The parent card's data (e.g., a record ID) can be passed to the child card via the Flyout Action's context parameters, ensuring the child card shows relevant information.

\* Example: If the parent card displays a customer's summary (name, account number), clicking the button could launch a child card in a flyout showing order history and a button to initiate a return, all tied to the parent card's account ID.

Now, let's examine why the other options are incorrect or less optimal:

\* A. Design the parent card to launch a child card when the specific action is taken: While this is conceptually correct, it's vague and lacks specificity. "Launch a child card" isn't a defined OmniStudio action-Flyout Action is the actual mechanism to achieve this. Thus, B is the more precise answer, as it names the tool explicitly supported by FlexCards.

\* C. Design the parent card to launch a new DataRaptor when the specific action is taken: A DataRaptor (e.g., DataRaptor Extract) retrieves or manipulates data, not displays a UI like a child card. While a DataRaptor might fetch data for the child card, it doesn't "launch" anything visible to the agent, making this option irrelevant to the UI requirement.

\* D. Design the parent card to launch a new OmniScript when the specific action is taken: An OmniScript could be launched via a FlexCard action (e.g., an "OmniScript" action type), but it's a guided process, not a "child card." The requirement specifies a child card (implying another FlexCard), not a multi-step script, so a Flyout Action with a child FlexCard is more appropriate than an OmniScript.

References:

\* Salesforce OmniStudio Documentation: FlexCard Actions - Details the Flyout Action for launching child cards or content.

\* Salesforce OmniStudio Developer Guide: Flyouts in FlexCards - Explains configuring flyouts with child FlexCards.

### 問題 #101

A business needs a 360° view of their accounts, including a FlexCard to display all of the products sold to the account. The business

identified 20 different data elements and 10 actions that users would need when view the product information. Once all of the elements are collected together on the FlexCard, it looks cluttered.

Which two FlexCard features should the consultant recommend to address this issue?

Choose 2 answers

- **A. Put specific fields in a collapsible block**
- B. Use a table or chart to display data
- C. Use a condition to hide data unless specific criteria are met
- **D. Use a flyout action to display additional information**

**答案： A,D**

解題說明：

The two FlexCard features that the consultant should recommend to address this issue are Flyout and Block elements. A Flyout is a pop-up window that can display additional information or actions for a FlexCard. The consultant can use a Flyout to show more details or options for each product without cluttering the main FlexCard. A Block element is a container that can group related fields and elements in a FlexCard. The consultant can use a Block element with the Collapse property enabled to allow the user to expand or collapse a section of the FlexCard, such as specific fields or actions

### 問題 #102

A company has a requirement to create a 360° view of their customers using FlexCards. At this company, customer data is stored in Salesforce but also in external legacy systems. A consultant reviews the use cases needed and recommends a FlexCard canvas that contains multiple child cards inside the state of a parent FlexCard.

What is the advantage of embedding multiple child cards in this scenario?

- **A. Allows conditional views with the Toggle element on each child card**
- B. Enables easier global styling changes
- C. Allows multiple data sources to be used
- D. Enables the FlexCard to be used on a community page

**答案： A**

解題說明：

The advantage of embedding multiple child cards in this scenario is that it allows multiple data sources to be used. A child card can have its own data source independent of the parent card or other child cards. This way, the consultant can use different data sources for each child card, such as Salesforce objects or external systems, and display them in one FlexCard canvas

### 問題 #103

In which two cases should an integration procedure be used as a data source for FlexCards and OmniScripts, Choose 2 answers

- **A. To separate the user interface from changes in the data sources**
- B. To minimize the number of elements to be configured
- **C. To retrieve multiple data sources in a single response**
- D. To achieve elastic scaling

**答案： A,C**

解題說明：

The two cases where an integration procedure should be used as a data source for FlexCards and OmniScripts are: To retrieve multiple data sources in a single response and To separate the user interface from changes in the data sources. An integration procedure is a tool that can execute multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. The consultant can use an integration procedure as a data source for FlexCards and OmniScripts when they need to retrieve data from different sources, such as Salesforce objects or external systems, and store it in a JSON object for display. This way, the integration procedure can provide multiple data sources in a single response, without requiring multiple elements or actions in the FlexCard or OmniScript. The consultant can also use an integration procedure as a data source for FlexCards and OmniScripts when they want to separate the user interface from changes in the data sources. This way, the integration procedure can handle any changes in the data sources without affecting the FlexCard or OmniScript design or configuration.

## 問題 #104

.....

Fast2test剛剛發布了最新的Plat-Con-201認證考試所有更新的問題及答案，來確保您考試成功通過。我們提供最新的PDF和軟件版本的問題和答案，可以保證考生的Plat-Con-201考試100%通過。在我們的網站上，您將獲得我們提供的Salesforce Plat-Con-201免費的PDF版本的DEMO試用，您會發現這絕對是最值得信賴的學習資料。對於擁有高命中率的Salesforce Plat-Con-201考古題，還在等什么，趕快下載最新的題庫資料來準備考試吧！

**Plat-Con-201最新試題:** <https://tw.fast2test.com/Plat-Con-201-premium-file.html>

Plat-Con-201認證比較著重於工具面，以Flash開發人員的試題為例，對ActionScript程式語言的認知、程式除錯與分析占了相當大的比例，所以，我們在練習Plat-Con-201題庫時要盡量避免被情緒控制，Salesforce Plat-Con-201學習筆記這個問題的答案隨著我們網站產生已經不再是問題了，這次通過Salesforce的Plat-Con-201考試認證是我人生中的一大挑戰，所以我拼命的努力學習，不過不要緊，我購買了Fast2test Salesforce的Plat-Con-201考試認證培訓資料，有了它，我就有了實力通過Salesforce的Plat-Con-201考試認證，選擇Fast2test培訓網站只說明，路在我們腳下，沒有人決定它的方向，擁有了Fast2test Salesforce的Plat-Con-201考試培訓資料，就等於擁有了了一個美好的未來，Salesforce Plat-Con-201學習筆記既可以掌握更多的技能，又可以取得可以證明自己能力的認證資格。

只不過在這壹點沒人看得出來，都自然而然的想到是易雲搞的鬼，該死的東西，誰讓妳們停下來的，Plat-Con-201認證比較著重於工具面，以Flash開發人員的試題為例，對ActionScript程式語言的認知、程式除錯與分析占了相當大的比例。

## 最熱門的Salesforce Plat-Con-201學習筆記&值得信賴的Fast2test - 認證考試材料的領導者

所以，我們在練習Plat-Con-201題庫時要盡量避免被情緒控制，這個問題的答案隨著我們網站產生已經不再是問題了，這次通過Salesforce的Plat-Con-201考試認證是我人生中的一大挑戰，所以我拼命的努力學習，不過不要緊，我購買了Fast2test Salesforce的Plat-Con-201考試認證培訓資料，有了它，我就有了實力通過Salesforce的Plat-Con-201考試認證，選擇Fast2test培訓網站只說明，路在我們腳下，沒有人決定它的方向，擁有了Fast2test Salesforce的Plat-Con-201考試培訓資料，就等於擁有了了一個美好的未來。

既可以掌握更多的技能，又可以取得可以證明自己能力的認證資格。
