Because we are professional Google-Workspace-Administrator Questions torrent provider, we are worth trusting; because we make great efforts, we do better. Here are some reasons to choose us.

Google Cloud Certified - Professional Google Workspace Administrator

Sample Questions (Q74-Q79):

NEW QUESTION # 74

Your organization is about to expand by acquiring two companies, both of which are using Google Workspace. The CISO has mandated that strict 'No external content sharing' policies must be in place and followed. How should you securely configure sharing policies to satisfy both the CISO's mandate while allowing external sharing with the newly acquired companies?

- A. Let users share files between the two companies by using the 'Trusted Domains' feature. Create an allowlist of the trusted domains, and choose sharing settings for the users.
- B. Create a Drive DLP policy that will allow sharing to only domains on an allowlist.
- C. Allow external sharing of Drive content for the IT group only.
- D. Use shared drives to store the content, and share only individual files externally.

Answer: A

Explanation:

Access Admin Console: Log in to the Google Admin console.

Navigate to Sharing Settings: Go to Apps > Google Workspace > Drive and Docs > Sharing settings.

Set Up Trusted Domains: Enable the Trusted Domains feature and add the domains of the newly acquired companies to the allowlist.

Adjust Sharing Settings: Configure the sharing settings to restrict external sharing but allow sharing with the trusted domains. This ensures compliance with the CISO's mandate while enabling collaboration with the newly acquired companies.

Communicate Changes: Inform all users about the new sharing policies and the specific domains they are allowed to share content with.

Monitor Compliance: Regularly monitor sharing activities to ensure compliance with the new policies and make adjustments as necessary.

NEW QUESTION # 75

You have enrolled a new Google Meet hardware device for an existing conference room in your building. Your users report that the new hardware in the conference does not show the expected calendar events. You need to investigate and fix the problem. What should you do?

- A. Make sure the Access permissions for the resource calendar is set to "See all event details".
- B. Create a brand new resource calendar and associate the Meet Hardware with that new resource.
- C. Use the Meet Quality Tool in the control panel to search for the newly installed Meet Hardware.
- D. Make sure that the conference room resource calendar has been created and that the Meet Hardware is associated with that resource.

Answer: D

Explanation:

Make sure that the conference room resource calendar has been created and that the Meet Hardware is associated with that resource.

NEW QUESTION # 76

Today your company signed up for Google Workspace Business Starter with an existing domain name. You want to add team members and manage their access to email and other services. However, you are unable to create new user accounts or change user settings. You need to fix this problem. What should you do?

- A. Wait 24 hours after signing up for the features to become active.
- B. Upgrade to a Google Workspace Enterprise edition.
- C. Run the Transfer tool to bring unmanaged users to your Workspace account.
- D. Check domain ownership in the DNS settings.

Answer: D

Explanation:

To manage users and settings in Google Workspace, you must verify domain ownership. If the domain is not verified, you won't be able to create new user accounts or modify user settings. Checking the DNS settings and completing the domain verification process will resolve the issue and allow you to manage users and services in Google Workspace.

NEW QUESTION # 77

Your organization collects credit card information in customer files. You need to implement a policy for your organization's Google Drive data that prevents the accidental sharing of files that contain credit card numbers with external users. You also need to record any sharing incidents for reporting. What should you do?

- A. Implement a third-party data loss prevention solution to integrate with Drive and provide advanced content detection capabilities.
- B. Enable Gmail content compliance, and create a rule to block email attachments containing credit card numbers from being sent to external recipients.
- **C. Create a data loss prevention (DLP) rule that uses the predefined credit card number detector, sets the action to "block external sharing", and enables the "Log event" option.**
- D. Configure a data retention policy to automatically delete files containing credit card numbers after a specified period.

Answer: C

Explanation:

A data loss prevention (DLP) rule with the predefined credit card number detector will help you identify and prevent the accidental sharing of files that contain sensitive credit card information. Setting the action to "block external sharing" ensures that such files cannot be shared externally. Enabling the "Log event" option will record any incidents of external sharing for auditing and reporting purposes, fulfilling both the security and reporting requirements.

NEW QUESTION # 78

On which two platforms can you push WiFi connection information with Google Workspace? (Choose two.)

- A. Windows
- B. Mac OS
- **C. Chrome OS**
- **D. iOS**
- E. Linux

Answer: C,D

Explanation:

* Chrome OS:

* Google Workspace allows administrators to push WiFi configuration settings to managed Chrome OS devices. This ensures that devices automatically connect to specified WiFi networks without manual configuration by the users.

* Navigate to the Admin console, go to Devices > Chrome > Settings > Network, and add the WiFi network information.

* iOS:

* Similarly, WiFi configurations can be pushed to iOS devices using Google Workspace. This helps in managing WiFi connectivity for mobile devices used by employees.

* In the Admin console, go to Devices > Mobile & endpoints > Settings > iOS settings and configure WiFi networks to be pushed to iOS devices.
