

LEED-Green-Associate認證題庫 & LEED-Green-Associate題庫分享

2026 PDFExamDumps最新的LEED-Green-Associate PDF版考試題庫和LEED-Green-Associate考試問題和答案免費分享：<https://drive.google.com/open?id=16p9ZzLlvSqAioFpXxbkaqs2Nld7I4ZA>

你瞭解PDFExamDumps的LEED-Green-Associate考試考古題嗎？為什麼用過的人都讚不絕口呢？是不是很想試一試它是否真的那麼有效果？趕快點擊PDFExamDumps的網站去下載吧，每個問題都有提供demo，覺得好用可以立即購買。你購買了考古題以後還可以得到一年的免費更新服務，一年之內，只要你想更新你擁有的資料，那麼你就可以得到最新版。有了這個資料你就能輕鬆通過LEED-Green-Associate考試，獲得資格認證。

USGBC LEED-Green-Associate 考試大綱：

主題	簡介
主題 1	Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
主題 2	Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
主題 3	Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.
主題 4	Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.
主題 5	Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.

LEED-Green-Associate題庫分享 - LEED-Green-Associate PDF題庫

PDFExamDumps的LEED-Green-Associate資料的命中率高達100%。它可以保證每個使用過它的人都順利通過考試。當然，這也並不是說你就完全不用努力了。你需要做的就是，認真學習這個資料裏出現的所有問題。只有這樣，

在考試的時候你才可以輕鬆應對。怎麼樣？PDFExamDumps的資料可以讓你在準備考試時節省很多的時間。它是你通過LEED-Green-Associate考試的保障。想要這個資料嗎？那就快點擊PDFExamDumps的網站來購買吧。另外，你也可以在購買之前先試用一下資料的樣本。这样你就可以亲自确定资料的质量如何了。

最新的 USGBC LEED LEED-Green-Associate 免費考試真題 (Q108-Q113):

問題 #108

Which of the following credit categories does not have a prerequisite?

- A. Materials and Resources
- B. Indoor Environmental Quality
- C. Water Efficiency
- D. Location and Transportation

答案： C

解題說明：

Explanation

Water Efficiency is the only credit category that does not have a prerequisite in LEED v4 for Building Design and Construction.

Prerequisites are the minimum requirements that all projects must meet to be eligible for LEED certification. They are mandatory and non-weighted, meaning they do not contribute to the project's score. The other credit categories have at least one prerequisite each, as shown in the table below:

References: LEED v4 Reference Guide for Building Design and Construction, p. 17 1; [LEED v4 BD+C Scorecard]

問題 #109

To reduce the use of potable water for irrigation, which of the following factors should be taken into consideration?

- A. Maximize use of pervious pavement
- B. Maximize use of native species
- C. Minimize pervious areas
- D. Minimize green roof area

答案： B

解題說明：

Explanation

Native species are plants that are adapted to the local climate and soil conditions, and therefore require less water and maintenance than non-native species. By maximizing the use of native species in the landscaping design, the project can reduce the need for potable water for irrigation and achieve the Outdoor Water Use Reduction credit under LEED v4 Water Efficiency category1.

問題 #110

Up to how many maximum points can a project earn under the Regional Priority credit?

- A. Four
- B. Three
- C. One
- D. Two

答案： A

解題說明：

A project can earn up to four maximum points under the Regional Priority credit. The Regional Priority credit is a bonus credit that rewards projects for addressing environmental issues that are of regional importance.

The USGBC regional councils and chapters have identified six environmental issues for each zip code in the United States, and projects can earn one point for each issue they address, up to a maximum of four points.

The other options are not correct. One, two, or three points are possible, but not the maximum number of points under the Regional Priority credit. References: LEED Green Associate Candidate Handbook, page 30; USGBC, [Regional Priority], page 1.

問題 #111

A project that does not meet a prerequisite in one credit category

- A. does not qualify for certification
- B. may substitute a prerequisite from an alternative rating system
- C. must file a CIR
- D. forfeits all points in the same credit category

答案： A

解題說明：

Explanation

LEED prerequisites are the minimum requirements that a project must meet in order to be eligible for LEED certification.

Prerequisites are mandatory for all projects and cannot be substituted or waived. If a project does not meet a prerequisite in one credit category, it does not qualify for certification, regardless of how many points it earns in other categories123.

A project that does not meet a prerequisite in one credit category does not forfeit all points in the same credit category, as points are awarded for meeting optional credits, not prerequisites. A project cannot file a CIR (Credit Interpretation Request) to seek clarification or exception for a prerequisite, as CIRs are only applicable for credits. A project cannot substitute a prerequisite from an alternative rating system, as prerequisites are specific to each rating system and reflect the minimum standards for that system

問題 #112

During the pre-design phase of a three-story office building, the project team determines that the anticipated energy use of the proposed building will exceed the Owner's Project Requirements (OPR). What strategy should the project team consider in order to lower the building's energy use?

- A. Monitor and verify performance to ensure that building systems are functioning as designed
- B. Use valid survey protocols to assess occupants' satisfaction with the indoor environment
- C. Increase the square footage of the building
- D. Maximize daylighting opportunities with properly sized and oriented windows

答案： D

解題說明：

Maximizing daylighting opportunities with properly sized and oriented windows can significantly reduce a building's energy use. By allowing more natural light into the building, the need for artificial lighting can be reduced, which in turn reduces electricity consumption. Additionally, if windows are properly oriented, they can also help with passive heating and cooling, further reducing energy use.
