

2026 High Pass-Rate FCP_FSM_AN-7.2 Latest Braindumps Sheet Help You Pass FCP_FSM_AN-7.2 Easily

What's more, part of that TestPDF FCP_FSM_AN-7.2 dumps now are free: https://drive.google.com/open?id=1hds_TUVW80o6FazaiucTMfg91DvgtknD

As you know, opportunities are reserved for those who are prepared. Everyone wants to stand out in such a competitive environment, but they don't know how to act. Maybe our FCP_FSM_AN-7.2 learning materials can help you. Having a certificate may be something you have always dreamed of, because it can prove that you have a certain capacity. Our learning materials can provide you with meticulous help and help you get your certificate. Our FCP_FSM_AN-7.2 Learning Materials are credible and their quality can stand the test. Therefore, our practice materials can help you get a great financial return in the future and you will have a good quality of life.

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.
Topic 2	<ul style="list-style-type: none">Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.
Topic 3	<ul style="list-style-type: none">Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.

Topic 4	<ul style="list-style-type: none"> Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.

FCP_FSM_AN-7.2 Dump Check - Latest FCP_FSM_AN-7.2 Exam Review

Just like the old saying goes, motivation is what gets you started, and habit is what keeps you going. A good habit, especially a good study habit, will have an inestimable effect in help you gain the success. The FCP_FSM_AN-7.2 Study Materials from our company will offer the help for you to develop your good study habits. If you buy and use our study materials, you will cultivate a good habit in study.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q11-Q16):

NEW QUESTION # 11

Refer to the exhibit.

Incident generator window

Generate Incident for: Logon_Failure

Incident Attributes:	Event Attribute	Subpattern	Filter Attribute	Row
Source IP	=	Logon_Fail	Source IP	
Destination IP	=	Logon_Fail	Destination IP	
User	=	Logon_Fail	User	

Insert Attribute: Destination IP +

Incident Title: Suser from \$srcipAddr failed to logon to \$destipAddr

Triggered Attributes: Available: Search... 1/33 >

Selected:

- Event Receive Time
- Event Type
- Reporting IP
- Raw Event Log

Save Cancel

An analyst is trying to generate an incident with a title that includes the Source IP, Destination IP, User, and Destination Host Name. They are unable to add a Destination Host Name as an incident attribute.

What must be changed to allow the analyst to select Destination Host Name as an attribute?

- A. The Destination Host Name must be set as an aggregate item in a subpattern.
- B. The Destination IP Event Attribute must be removed.
- C. The Destination Host Name must be added as an Event type in the FortiSIEM.
- D. The Destination Host Name must be selected as a Triggered Attribute.**

Answer: D

Explanation:

For an attribute like Destination Host Name to be used in the incident title, it must first be included in the Triggered Attributes list. Only attributes listed there are available for substitution in the title template (e.g., \$destIpAddr, \$srcIpAddr).

NEW QUESTION # 12

Which information can FortiSIEM retrieve from FortiClient EMS through an API connection?

- A. ZTNA tags
- B. Host software versions
- C. FortiSIEM license
- D. Host login credentials

Answer: A

Explanation:

FortiSIEM can retrieve ZTNA tags from FortiClient EMS through an API connection, enabling dynamic user and device classification for policy enforcement and incident response.

NEW QUESTION # 13

Which two settings must you configure to allow FortiSIEM to apply tags to devices in FortiClient EMS? (Choose two.)

- A. FortiEMS API credentials defined on FortiSIEM
- B. Remediation script configured
- C. ZTNA tags defined on FortiSIEM
- D. FortiSIEM API credentials defined on FortiEMS\

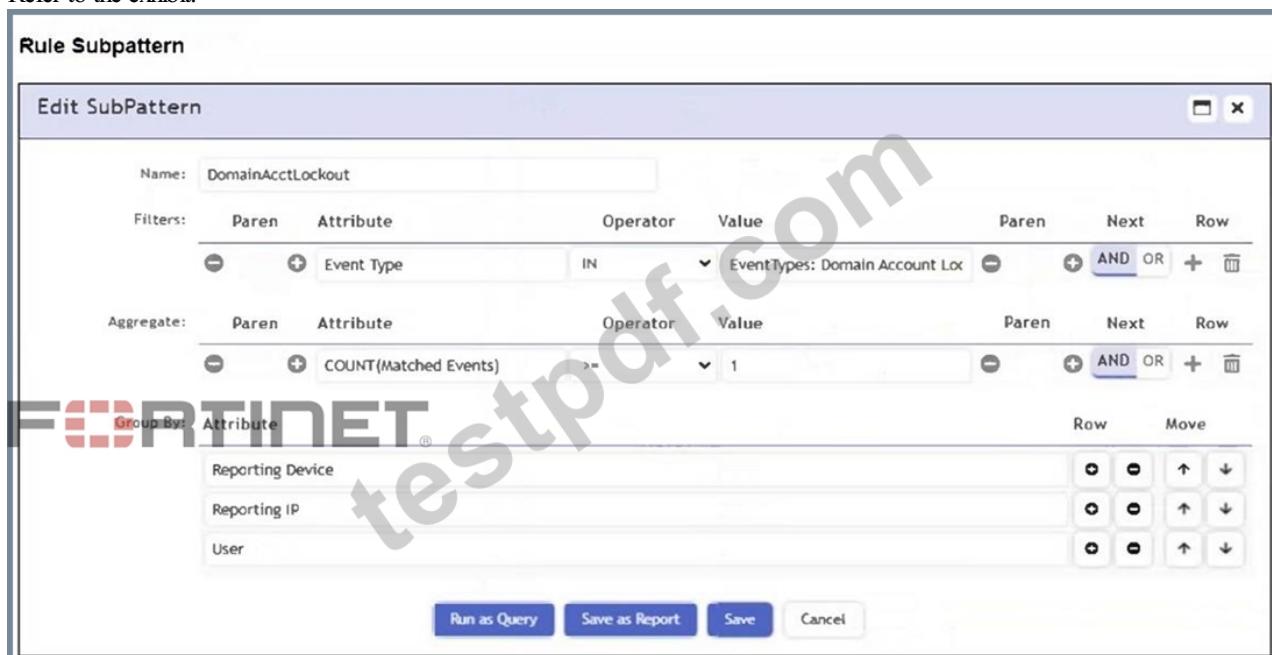

Answer: A,D

Explanation:

To allow FortiSIEM to apply tags to devices in FortiClient EMS, FortiEMS API credentials must be defined on FortiSIEM to enable communication with EMS, and FortiSIEM API credentials must be defined on FortiEMS to allow EMS to accept tagging instructions from FortiSIEM. This bidirectional API trust is essential for tag application.

NEW QUESTION # 14

Refer to the exhibit.

The screenshot shows the 'Edit SubPattern' dialog box. The subpattern is named 'DomainAcctLockout'. The 'Filters' section contains a single rule: 'Event Type' is set to 'IN' with the value 'EventTypes: Domain Account Lockout'. The 'Aggregate' section contains a rule: 'COUNT(Matched Events)' is set to '>=' with the value '1'. The 'Group By' section lists 'Reporting Device', 'Reporting IP', and 'User'. At the bottom are buttons for 'Run as Query', 'Save as Report', 'Save', and 'Cancel'.

Which section contains the subpattern configuration that determines how many matching events are needed to trigger the rule?

- A. Aggregate
- B. Group By
- C. Filters
- D. Actions

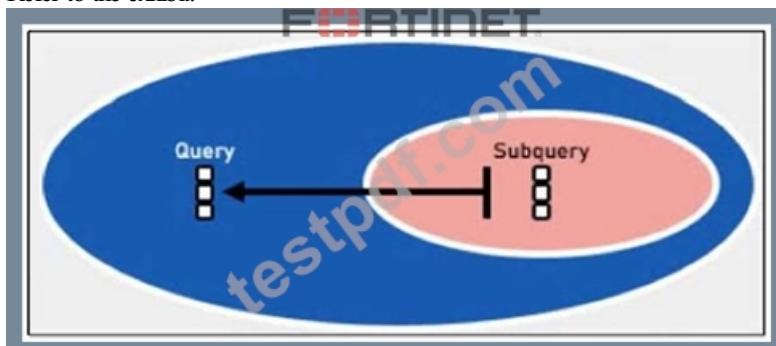

Answer: A

Explanation:

The Aggregate section contains the condition COUNT(Matched Events) ≥ 1 , which defines how many events must match the filter criteria for the rule to trigger. This is the subpattern configuration that determines the event threshold.

NEW QUESTION # 15

Refer to the exhibit.

Which two lookup types can you reference as the subquery in a nested analytics query? (Choose two.)

- A. LDAP Query
- B. Event Query
- C. SNMP Query
- D. CMDB Query

Answer: B,C

Explanation:

In FortiSIEM nested analytics queries, you can reference both CMDB Queries and Event Queries as subqueries. These allow correlation between CMDB data and event data for advanced detection use cases.

NEW QUESTION # 16

.....

TestPDF Fortinet FCP_FSM_AN-7.2 Training Kit is designed and ready by TestPDF IT experts. Its design is closely linked to today's rapidly changing IT market. TestPDF training to help you take advantage of the continuous development of technology to improve the ability to solve problems, and improve your job satisfaction. The coverage TestPDF Fortinet FCP_FSM_AN-7.2 Questions can reach 100%, as long as you use our questions and answers, we guarantee you pass the exam the first time!
