Our system is high effective and competent. After the clients pay successfully for the AZ-800 study materials the system will send the products to the clients by the mails. The clients click on the links in the mails and then they can use the AZ-800 Study Materials immediately. Our system provides safe purchase procedures to the clients and we guarantee the system won't bring the virus to the clients' computers and the successful payment for our AZ-800 study materials.

Exam Content

The next point for you to know is the exam content. The AZ-800 test consists of five topics in which you should be proficient. The first topic is the most extensive one and is dedicated to deploying and managing AD DS in on-premises and cloud environments. In this domain, you should have a good understanding of how to deploy and operate AD DS domain controllers, work in multi-domain, multi-forest, and multi-site environments, apply hybrid identities. In addition, your skills to create and operate AD DS security principals, manage Windows Server will be assessed as well.

The second topic refers to managing Windows Server and workloads in a hybrid environment. This implies that you are competent in dealing with Windows Server in a hybrid environment and Azure services to operate Windows Servers and workloads. Thus, you can demonstrate your skills to configure CredSSP, PowerShell Remoting, JEA, operate updates for Windows machines, manage Windows Servers, integrate Windows Servers with Azure Security Center or Log Analytics.

The third domain focuses on managing virtual machines and containers. The aim of this domain is to measure your abilities in working with VM memory, VM Resource Groups, VM CPU Groups, VM Checkpoints, Integration Services, NIC teaming, and Hyper-V switch. This subject area also includes the ability to create and operate containers, and operate Azure Virtual Machines based on Windows Server.

The fourth domain aims to check your skills in applying and operating an on-premises and hybrid networking infrastructure. In this domain you are expected competency in utilizing on-premises and hybrid name resolution, operating IP addressing in hybrid and on-premises scenarios, applying on-premises and hybrid network connectivity. Thus, you should possess top-notch skills to apply DNSSEC, integrate DNS with AD DS, configure DNS forwarding, operate IPAM, create IP reservations, apply Azure Network Adapter, Web App Proxy, Azure Replay.

The fifth topic refers to managing storage and file services. This part evaluates your skills in operating Azure File Sync, operating Windows Server files shares, and Windows Server storage. To deal with the questions from this domain, you need to be able to create Azure File Sync service, monitor File Sync, create cloud endpoints, BranchCache, apply DFS, configure volumes, disks, and Data Deduplication.

Why it is important to take the Microsoft AZ-800 Certification Exam

Nowadays, the companies are looking for professionals who are experts in designing and configuring hybrid infrastructures consisting of a physical facts center and Azure resources like Azure Virtual appliance, Azure Storage, SQL Database, and Batch, on-premises services such as System Center unit Manager, and online services such as Office 365 and Azure AD. This certification will be a valuable asset for you as it will make you eligible for the Windows Server Hybrid Core Infrastructure (beta) Certification. **AZ-800 exam dumps** will help you to prepare for the exam in the best possible way.

It is a Microsoft-authorized certification for IT professionals who have experience in designing and configuring hybrid infrastructures consisting of a physical info center and Azure resources like Azure appliance, Azure Storage, SQL Database, and Batch, services such as System Center device Manager, and online services such as Office 365 and Azure AD. The Microsoft AZ-800 Certification Exam objectives are the most important thing to know before you take the exam. If you don't know what the exam objectives are, you can't prepare for the exam properly.

Test AZ-800 Dump - Microsoft Composite Test AZ-800 Price: Administering Windows Server Hybrid Core Infrastructure Finally Passed

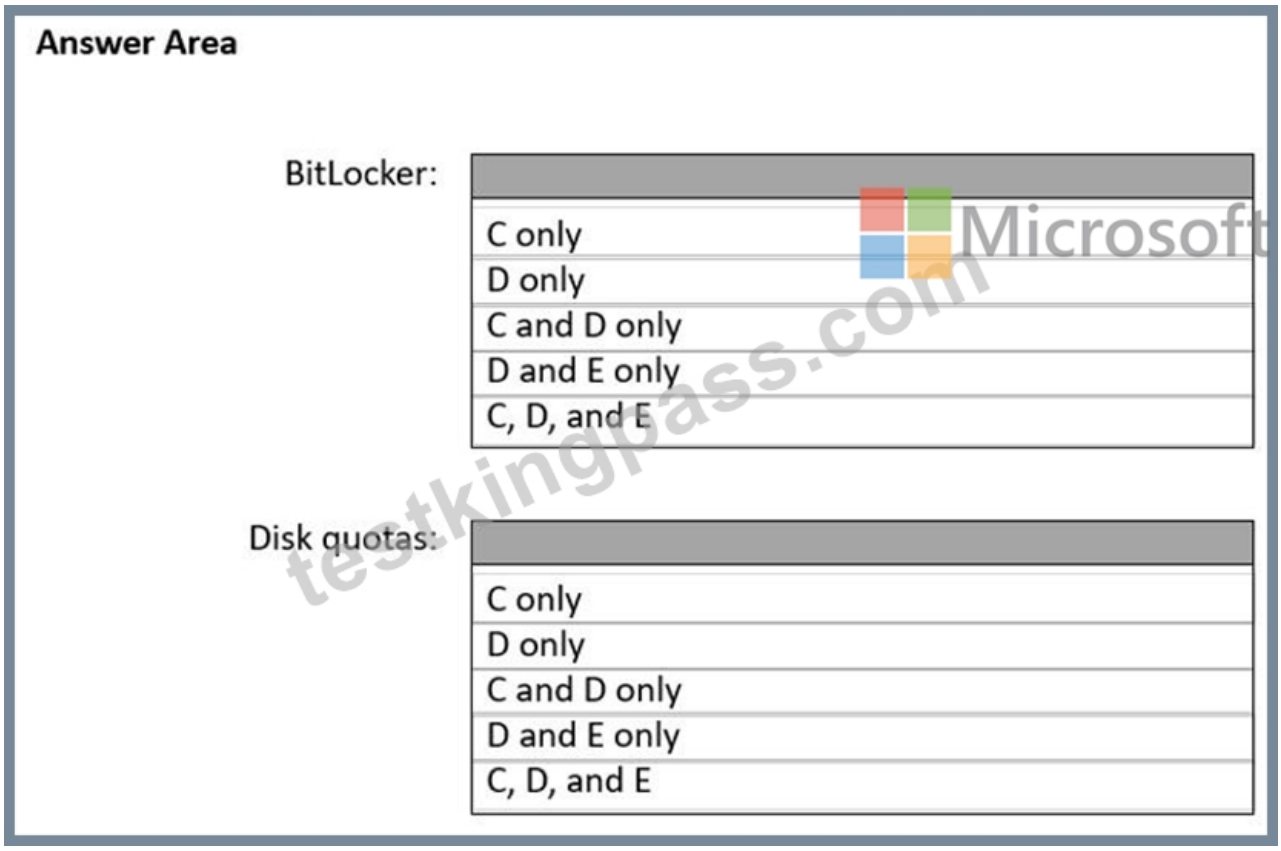
With our AZ-800 practice exam, you only need to spend 20 to 30 hours in preparation since there are all essence contents in our AZ-800 study materials. And there is no exaggeration that with our AZ-800 training guide, you can get 100% pass guarantee. What's more, if you need any after service help on our AZ-800 Exam Dumps, our after service staffs will always here to offer the most thoughtful service for you.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q144-Q149):

NEW QUESTION # 144
Hotspot Question
You have a file server named Server1 that runs Windows Server and contains the volumes shown in the following table.

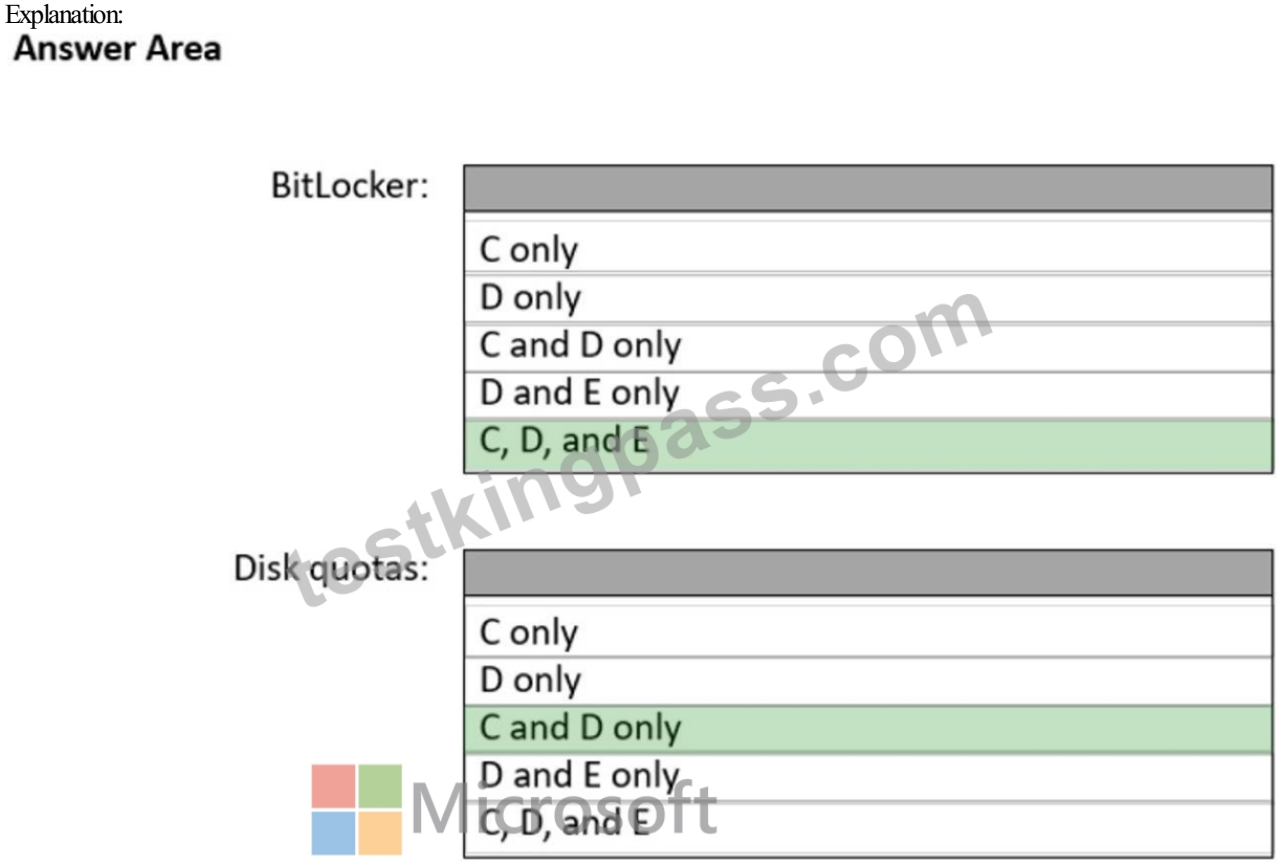
Name	File system
C	NTFS
D	NTFS
E	REFS

On which volumes can you use BitLocker Drive Encryption (BitLocker) and disk quotas? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:

Explanation:



Explanation:
https://docs.microsoft.com/en-us/windows-server/storage/refs/refs-overview

NEW QUESTION # 145
Your network contains an Active Directory domain, a web app named App1, and a perimeter network. The perimeter network contains a server named Server1 that runs Windows Server.
You plan to provide external access to App1.
You need to implement the Web Application Proxy role service on Server1.
Which role should you add to Server1, and which role should you add to the network? To answer, drag the appropriate roles to the correct targets. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

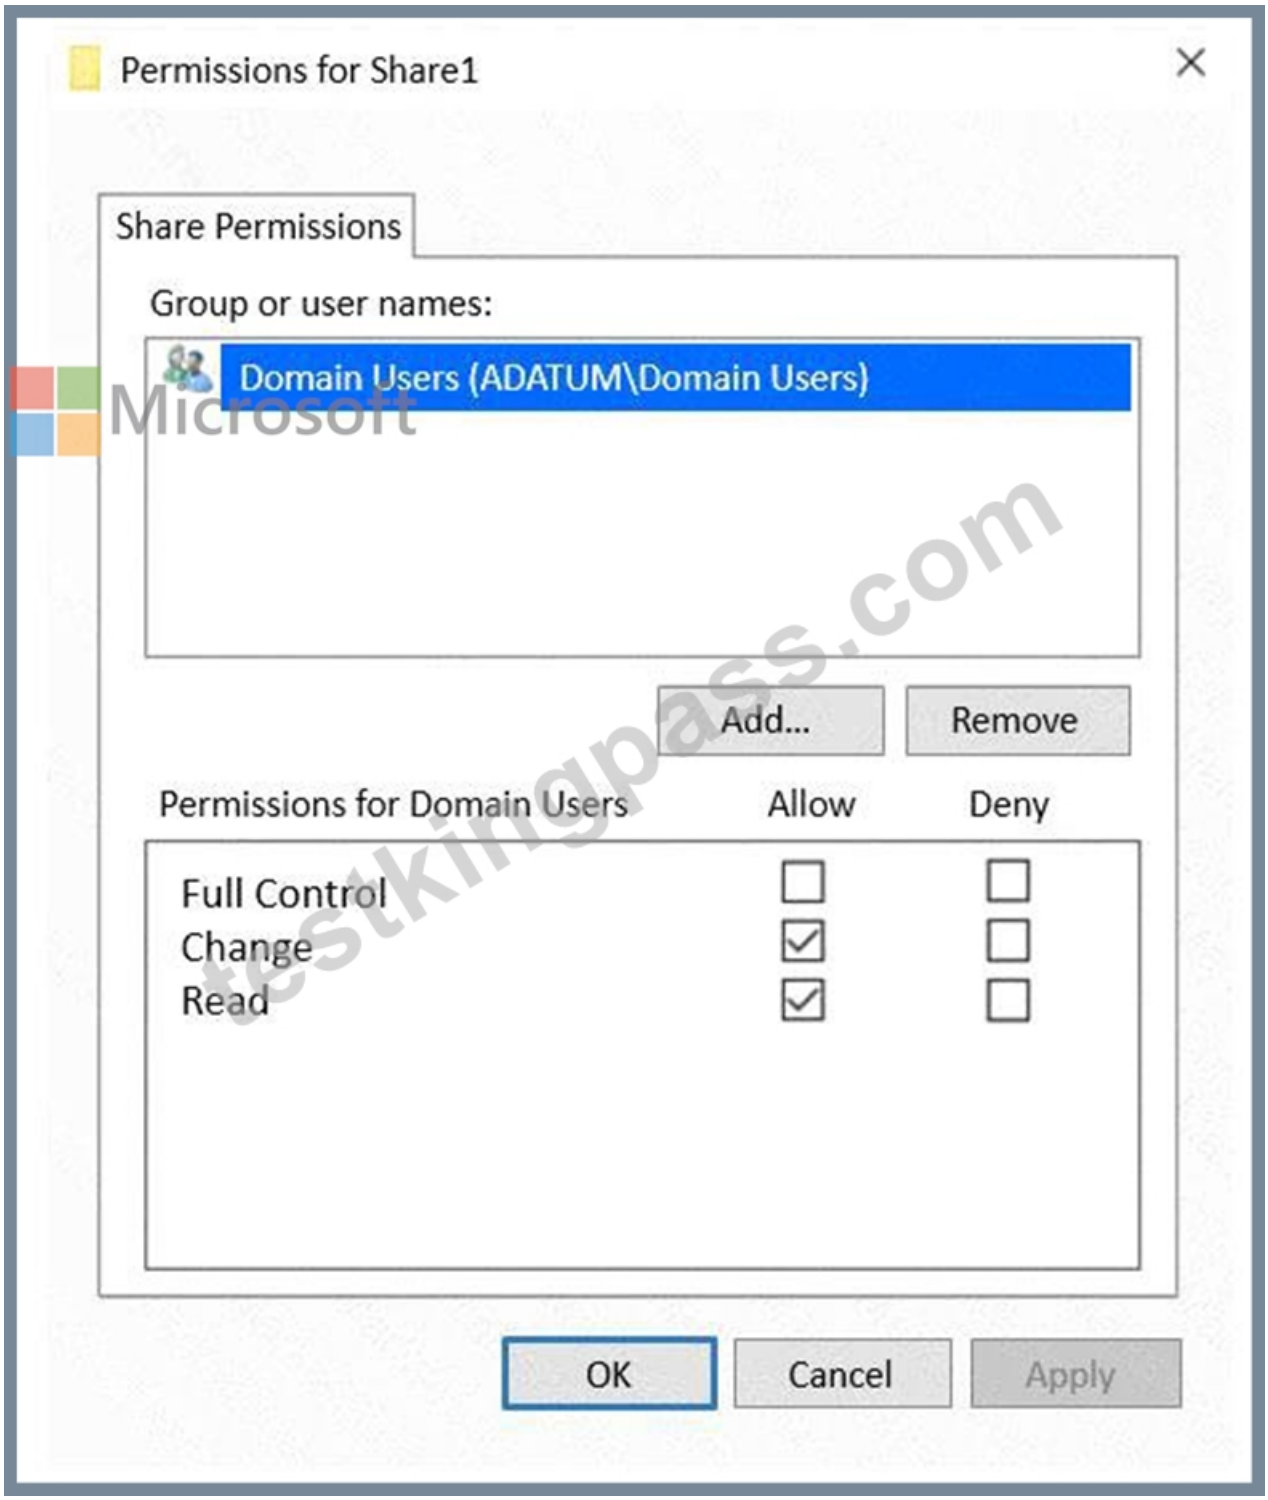
Explanation:

Explanation

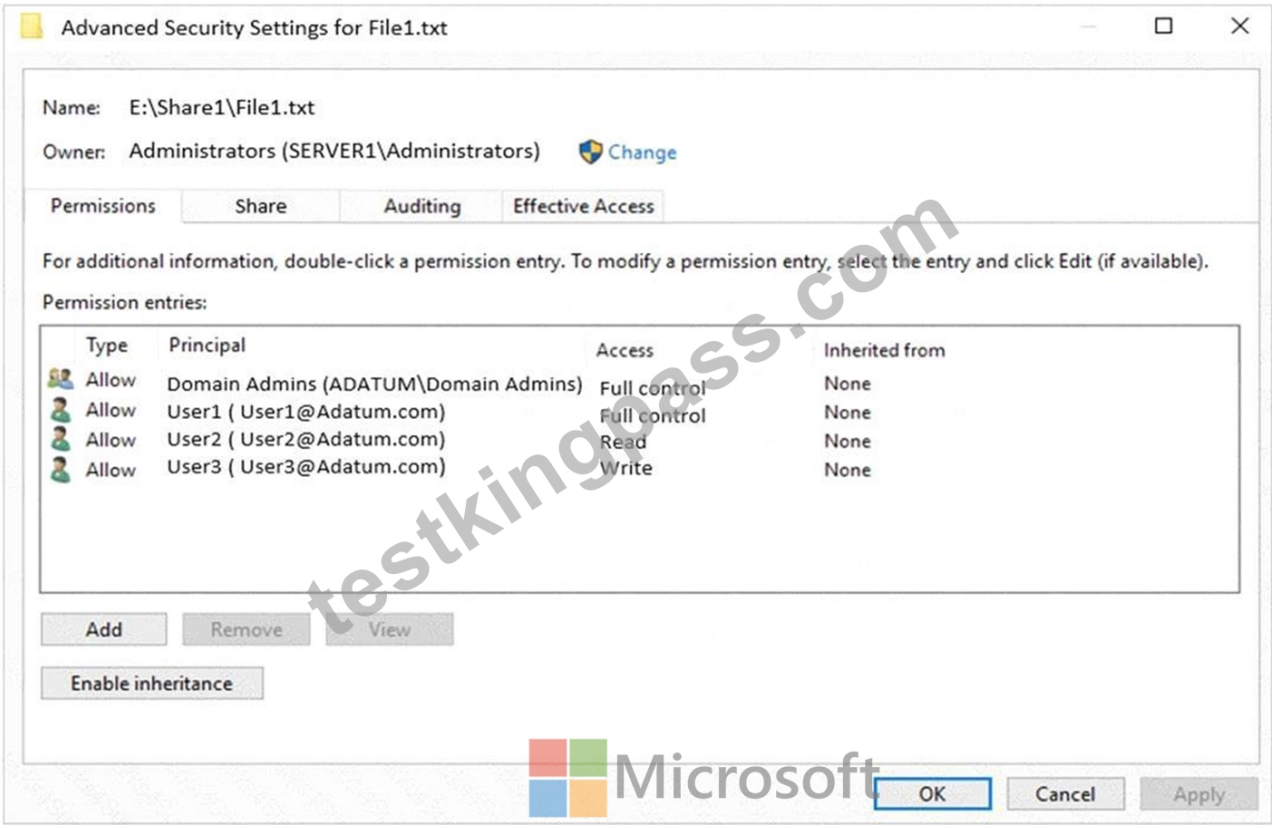
NEW QUESTION # 146
Your network contains an Active Directory Domain Services (AD DS) domain named adatum.com. The domain contains a file server named Server1 and three users named User1, User2, and User3.
Server1 contains a shared folder named Share1 that has the following configurations:

```
ShareState                    :     Online
AvailabilityType              :     NonClustered
FolderEnumerationMode         :     AccessBased
CachingMode                   :     Manual
LeasingMode                   :     Full
SmbInstance                   :     Default
CompressData                  :     False
ContinuouslyAvailable         :     False
EncryptData                   :     False
Name                          :     Share1
Path                          :     E:\Share1
ShadowCopy                    :     False
```

The share permissions for Share1 are configured as shown in the Share Permissions exhibit.



Share1 contains a file named File1.bxt. The share settings for File1.txt are configured as shown in the File Permissions exhibit.



For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

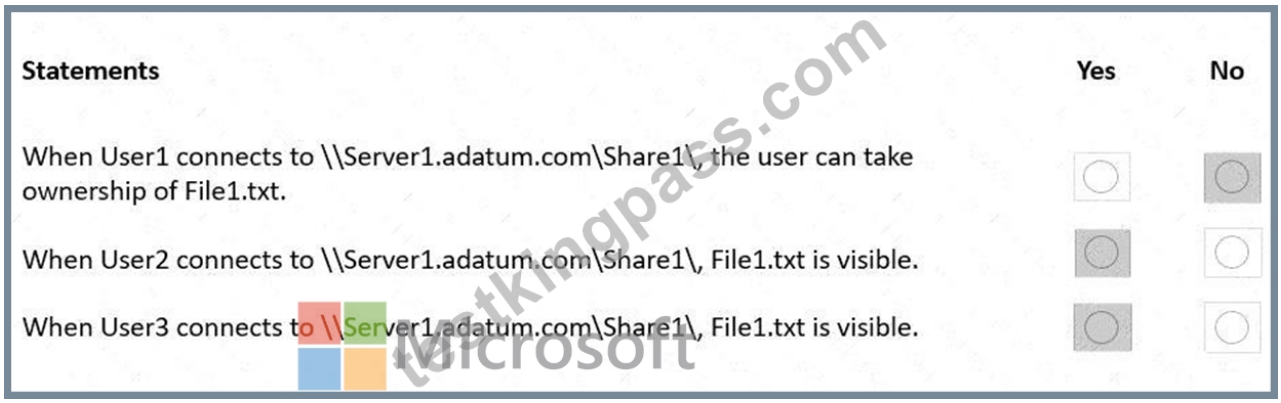
Statements	Yes	No
When User1 connects to \\Server1.adatum.com\Share1\, the user can take ownership of File1.txt.	○	○
When User2 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	○	○
When User3 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	○	○

Answer:

Explanation:

Statements	Yes	No
When User1 connects to \\Server1.adatum.com\Share1\, the user can take ownership of File1.txt.	○	○
When User2 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	○	○
When User3 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	○	○

Explanation:



NEW QUESTION # 147
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are planning the deployment of DNS to a new network.
You have three internal DNS servers as shown in the following table.

Name	Location	IP address	Local DNS zone
Server1	Montreal	10.0.1.10	contoso.local
Server2	Toronto	10.0.2.10	east.contoso.local
Server3	Seattle	10.0.3.10	west.contoso.local

The contoso.local zone contains zone delegations for east.contoso.local and west.contoso.local. All the DNS servers use root hints.
You need to ensure that all the DNS servers can resolve the names of all the internal namespaces and internet hosts.
Solution: You configure Server2 and Server3 to forward DNS requests to 10.0.1.10.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 148
You need to meet the technical requirements for VM2.
What should you do?

- A. Implement Credential Guard.
- B. Enable enhanced session mode.
- C. Implement shielded virtual machines.
- D. Enable the Guest services integration service.

Answer: B

NEW QUESTION # 149
.....

You can use this AZ-800 simulation software without an internet connection after installation. Tracking and reporting features of our Microsoft AZ-800 practice exam software makes it easier for you to identify and overcome mistakes. Customization feature of this format allows you to change time limits and questions numbers of mock exams.
