F5 BIG-IP LTM Specialist: Architect Set-Up & Deploy Sample Questions (Q55-Q60):

NEW QUESTION # 55

An LTM Specialist observes decreased performance and intermittent connection reap LTM system.

Based on the configuration, which action will address these issues?

- A. Use a default caching profile on the virtual server.
- B. Use an optimized TCP profile.
- C. Use a shorter idle timeout on the TCP profile.
- D. Use a FastL4 profile on the virtual server

Answer: C

NEW QUESTION # 56

Exhibit.

The server team has recently configured the three new DNS servers shown for the data center. No current DNS servers are currently configured on the LTM device.

Which command should be used to configure the LTM device to use the new DNS servers?

- A. `tmsh create/sysdns name-servers add {192.168.1.2.192.168.100.100.192.168.200.200}`
- **B. `tmsh modify/sysdns name-servers add {192.168.1.2.192.168.100.100.192.168.200.200}`**
- C. `tmsh change /sysdns name-servers add {192.168.1.2.192.168.100.100.192.168.200.200}`
- D. `tmsh set/sysdns name-servers add {192.168.2.192.168.100.100.192.168.200.200}`

Answer: B

Explanation:

Modify the configuration with `modify`, and create the configuration with `create`. Excluding B and D, and the question is to modify the DNS pointer of E5 itself the need to use is `modify`.

NEW QUESTION # 57

An LTM Specialist regularly provides analytics reports that show that traffic generated by different subnets within the organization. The LTM Specialist needs show the associate department names next the IP addresses in the reports.

Which step should the LTM Specialist take to meet this requirement?

- A. export the report and add the department names manually
- B. define active subnets and assign a name to certain subnets
- **C. create VLANs for each subnet and set the name accordingly**
- D. use an iRule to change the output of the report

Answer: C

NEW QUESTION # 58

An LTM Specialist needs to use a set of addresses to access an Internet website in an outbound configuration.

Which feature should the LTM Specialist configure?

- A. SNAT address
- B. NAT pool
- **C. SNAT pool**
- D. NAT address

Answer: C

NEW QUESTION # 59

Four members in a server pool have similar hardware platforms. An LTM Specialist needs the load balancing method that can select the server with the fewest entries in the persistence table.

Which load balancing method should the LTM Specialist use?

- A. Least Connections
- B. Observed
- C. Dynamic Ratio
- **D. Least Sessions**

Answer: D

Explanation:

Pay attention to the examination questions, the stem is to ask the session to keep the minimum entries in the table.

NEW QUESTION # 60
