Microsoft AI Business Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18

You are a medical researcher.

You need to ensure that Microsoft 365 Copilot responds to you in a professional manner that is appropriate to your field. What is the best approach to achieve the goal?

- A. In the conversation, attach an example to your prompts.
- B. In the conversation, create a sample prompt and save it to the Copilot Prompt Gallery.
- C. From Settings, configure Custom instructions.
- D. From Settings, configure Copilot Memory.

Answer: C

Explanation:

Custom instructions allow users to define persistent preferences for tone, style, and response behavior across conversations.

Microsoft documentation explains that Custom instructions help tailor Copilot responses to professional roles, communication styles, and domain expectations.

For a medical researcher requiring consistently professional, field-appropriate responses, configuring Custom instructions in Settings ensures that Copilot maintains the desired tone and terminology in future interactions.

Attaching examples influences only a single conversation. Saving prompts to the Prompt Gallery aids reuse but does not enforce tone globally. Copilot Memory stores factual preferences but is not intended for style configuration.

Therefore, the best and most comprehensive approach is to configure Custom instructions in Settings.

NEW QUESTION # 19

You are using Microsoft 365 Copilot to enhance your productivity in Microsoft Teams.

Which two tasks can you achieve by using Copilot in Teams? Each correct answer presents a complete the solution.

NOTE: Each correct selection is worth one point.

- A. Draft a response to a channel message based on the context of the conversation.
- B. Mute and unmute participants in a meeting based on their location.
- C. Create a custom background and add the background to your video calls.
- D. Create a meeting summary, including key decisions and action items.

Answer: A,D

Explanation:

Copilot in Microsoft Teams is designed to help users work faster by summarizing meeting content and assisting with message composition in chats and channels. Microsoft guidance highlights that Copilot can synthesize what was discussed in a meeting by generating a structured recap that includes key points, decisions, and action items. This directly matches option C. Copilot can also help you respond more quickly in Teams conversations by drafting replies grounded in the context of the existing chat or channel thread, which matches option D.

Options A and B are not Copilot capabilities. Muting and unmuting participants is a meeting control function handled by Teams meeting roles and settings, and it is not automatically driven by Copilot based on participant location. Creating custom backgrounds is a Teams visual feature (and can involve Designer or image tools), but it is not a Copilot-in-Teams productivity function for summarization or drafting based on conversation context.

Therefore, the two tasks you can achieve using Copilot in Teams are generating meeting summaries with decisions and action items, and drafting responses to channel messages based on conversation context.

NEW QUESTION # 20

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot is trained on your organization's business data.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can summarize emails in mailboxes that were shared with you.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot leverages the security framework defined in Microsoft 365 to provide you with access to emails, documents, and other enterprise data.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Microsoft 365 Copilot is trained on your organization's business data.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot can summarize emails in mailboxes that were shared with you.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot leverages the security framework defined in Microsoft 365 to provide you with access to emails, documents, and other enterprise data.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: No

No - Microsoft 365 Copilot is trained on your organization's business data.

Microsoft 365 Copilot is designed to use your organization's business data, but it is crucial to understand that it is not "trained" on it in the traditional sense of modifying its foundation AI models. Instead, Copilot uses a process called grounding, which connects Large Language Models (LLMs) to your company's data (emails, chats, documents, etc.) in real-time to provide contextually relevant answers.

Here is a breakdown of how Microsoft 365 Copilot uses and protects your data:

How Copilot Uses Organizational Data

Real-Time Access via Microsoft Graph: Copilot uses Microsoft Graph to access data that an individual user already has permission to view, including emails, chats, meetings, and documents, to generate answers.

Contextual Understanding: It uses this information to help with tasks like summarizing a meeting, drafting emails based on previous communication, or searching for information across documents.

Scope of Access: Copilot is restricted to the data within your organization's Microsoft 365 tenant boundary.

Data Security and Privacy Protections

*-> No Training on Data: Prompts, responses, and data accessed through Microsoft Graph are not used to train the base foundation models that power Copilot.

Data Stays Within Boundary: Customer data remains within the Microsoft 365 service boundary.

Permissions Are Respected: Copilot adheres to the same access controls and security policies (e.g., sensitivity labels) that your organization has already put in place.

No Data Sharing with Third Parties: Customer data processed by Copilot is not shared with third-party models or used for advertising.

Box 2: Yes

Yes - Microsoft 365 Copilot can summarize emails in mailboxes that were shared with you.

Microsoft 365 Copilot can summarize emails and analyze content in shared or delegated mailboxes, provided the user has at least read access. Users can utilize prompts in the Copilot chat to summarize recent messages, identify key topics, or extract actions from shared accounts.

Box 3: Yes

Yes - Microsoft 365 Copilot leverages the security framework defined in Microsoft 365 to provide you with access to emails, documents, and other enterprise data.

Microsoft 365 Copilot leverages the existing security, privacy, and compliance framework of Microsoft 365 to ensure that it only accesses data a user is already authorized to view. By operating within the Microsoft 365 service boundary, Copilot respects established permissions, ensuring that sensitive information is not exposed to unauthorized users.

NEW QUESTION # 21

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can group conversations into a Microsoft 365 Copilot notebook.	<input type="checkbox"/>	<input type="checkbox"/>
You can use a Microsoft 365 Copilot notebook to collaborate with users in your organization.	<input type="checkbox"/>	<input type="checkbox"/>
You can add instructions to a Microsoft 365 Copilot notebook to tell Copilot how to respond.	<input type="checkbox"/>	<input type="checkbox"/>

Answer:

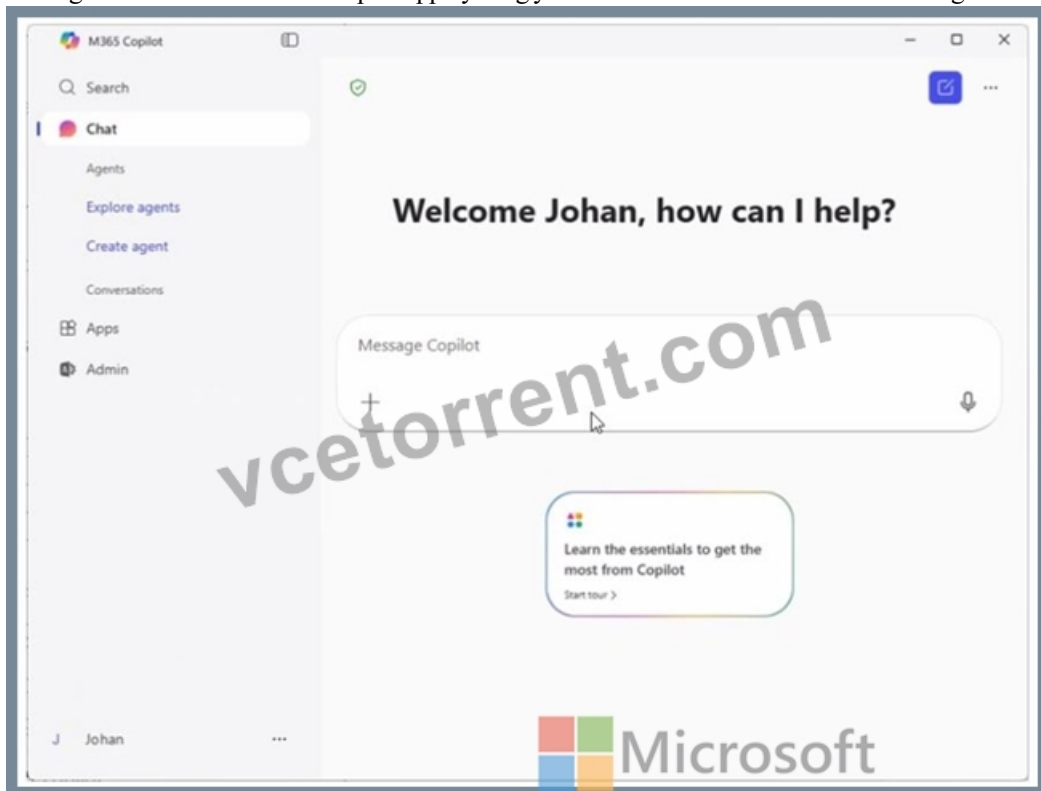

Explanation:

You can add instructions to a Microsoft 365 Copilot notebook to tell Copilot how to respond.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

NEW QUESTION # 22

You sign in to the Microsoft 365 Copilot app by using your work account as shown in the following exhibit

A colleague tells you that when they open the Microsoft 365 Copilot app, they have access to the Researcher agent. You need to access to the Researcher agent.

What should you do?

- A. Request a Microsoft 365 Copilot license from an administrator.
- B. Sign in to the Copilot app by using a personal account

- C. Select Explore agents and then search for Researcher.
- D. From Microsoft Edge, use your work account to sign in to <https://copilot.microsoft.com>.

Answer: C

Explanation:

In Microsoft 365 Copilot, agents such as Researcher are accessed through the Agents experience within the Copilot app. If the user interface does not immediately display a specific agent, the correct action is to browse or search the available agents catalog. The exhibit shows the left navigation pane with an Explore agents option.

According to Microsoft AI Business Professional guidance, built-in and custom agents can be discovered and enabled through the Explore agents section. If the user already has the appropriate Copilot license and is signed in with their work account, there is no need to switch accounts or request another license.

Signing in through a browser does not change feature availability, and using a personal account would remove access to organizational features. Therefore, to access the Researcher agent, you should select Explore agents and search for Researcher.

NEW QUESTION # 23

.....

You may find that on our website, we have free renewal policy for customers who have bought our AB-730 practice quiz. You can enjoy one year free updated service. This policy greatly increase the pass percentage of the candidates if they can't pass in one time or in the limited date. And they can enjoy 50% off if they buy them again one year later. All in all, our service is completely considerate. Come to experience our AB-730 Training Materials.
