Provide options when caller states name of sport.	Topic Entity Topic Variable

Answer:

Explanation:

Answer Area

Requirement	Feature
Recognize when caller states Tennis .	Entity
Provide options when caller states name of sport.	Entity Topic Variable
Provide options when caller states name of sport.	Topic Entity Topic Variable

Explanation:

Answer Area

Requirement	Feature
Recognize when caller states Tennis .	Entity
Provide options when caller states name of sport.	Topic

NEW QUESTION # 202

A company creates a Power Automate cloud flow for a Power Apps app.

The cloud flow must send a daily email that contains a list of year-to-date (YTD) totals.

You need to configure the flow.

Which feature should you use?

- **A. Loop**

- B. Wait
- C. Condition
- D. Parallel branch

Answer: A

Explanation:

In order to send a daily email that contains a list of year-to-date (YTD) totals, you would need to use a loop in the Power Automate cloud flow. A loop allows you to repeat a specific set of actions until a certain condition is met. In this case, the loop would be used to iterate through the data for each day, accumulating the totals for the year-to-date (YTD) and then sending the email at the end of the loop with the accumulated totals.

Here are some references from Microsoft that may be helpful in understanding how to use loops in Power Automate:

Microsoft docs: Loops in Power Automate

Microsoft docs: Repeating a flow with a loop

Microsoft docs: Using the do-until loop in Power Automate

NEW QUESTION # 203

You are a Dynamics 365 help desk administrator

You need to create a dashboard that displays information on help desk cases that are handled each week. Which dashboard components should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component type

NEW QUESTION # 204

A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.

A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.

The table must be added to a solution to be promoted once the change is made.

Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted. You need to add the change to a solution for promotion.

Options	Answer Area
<input type="text" value="Add column"/>	<p>Action</p> <p>Add the Devices table to the solution.</p> <p>Add the status column changes only to the solution.</p> <p> Microsoft</p>
<input type="text" value="Add existing"/>	
<input type="text" value="Add required components"/>	
<input type="text" value="Add subcomponent"/>	
	<p>Option</p> <p><input type="text"/></p> <p><input type="text"/></p>

Answer:

Explanation:

Options	Answer Area
<input type="text" value="Add column"/>	<p>Action</p> <p>Add the Devices table to the solution.</p> <p>Add the status column changes only to the solution.</p> <p> Microsoft</p>

<input type="text" value="Add required components"/>	
<input type="text" value="Add subcomponent"/>	
	<p>Option</p> <p><input type="text" value="Add existing"/></p> <p><input type="text" value="Add required components"/></p>

NEW QUESTION # 205

A company is using Dataverse with a custom table named Prospects. The Prospects table has a lookup to the Account table.

SharePoint document management is configured in the environment but is not configured for the Prospects table. All documents saved as part of the integration must be accessed by using an Account row linked to the Prospects table.

Based on new requirements from end users, the Prospects table must be reconfigured for use with the document management feature.

You need to configure the integration.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	SharePoint document management configuration steps
<input type="text" value="Edit the table."/>	<p> Microsoft</p>
<input type="text" value="Select the Based on Entity Account checkbox."/>	
<input type="text" value="Add a column of type File."/>	
<input type="text" value="Navigate to Document Management settings."/>	
<input type="text" value="Select the Prospects table."/>	
<input type="text" value="Enable server-based SharePoint integration."/>	
<input type="text" value="Clear the Based on Entity checkbox."/>	

Answer:

Explanation:

Actions	SharePoint document management configuration steps
<input type="text" value="Edit the table."/>	<p> Microsoft</p>
<input type="text" value="Select the Based on Entity Account checkbox."/>	
<input type="text" value="Add a column of type File."/>	
<input type="text" value="Navigate to Document Management settings."/>	
<input type="text" value="Select the Prospects table."/>	
<input type="text" value="Enable server-based SharePoint integration."/>	
<input type="text" value="Clear the Based on Entity checkbox."/>	

Actions

⋮ Edit the table.

⋮ Select the Based on Entity Account checkbox.

⋮ Add a column of type File.

SharePoint document management configuration steps

1 ⋮ Navigate to Document Management settings.

2 ⋮ Select the Prospects table.
