questions. Nonprofit-Cloud-Consultant Exam is administered by Salesforce and can be taken online or in-person at a test center. Candidates who pass the exam will receive a certification that demonstrates their expertise in Salesforce Nonprofit Cloud and their ability to support nonprofit organizations.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q102-Q107):

NEW QUESTION # 102

An Administrator at an organization has set up Program Management in Nonprofit Cloud. The organization wants users to be able to group participants into Program Cohorts. The Administrator turns on the Program Cohort feature in Setup, but users still cannot see the Program Cohorts object.

Which permission set should the Administrator assign to the users?

- A. Advanced Program Management
- B. Group Membership
- C. Program & Benefit Management

Answer: A

NEW QUESTION # 103

A consultant is working on a data migration to NPSP that includes tens of millions of records across many objects. The migration needs to take place over a weekend to minimize system downtime.

What should the consultant recommend?

- A. Data Import Wizard
- B. NPSP DataImport
- C. Bulk API
- D. SOAP API

Answer: C

NEW QUESTION # 104

How does Salesforce support donor cultivation and stewardship strategies for nonprofit organizations?

- A. By enabling nonprofit organizations to track interactions with donors, create and manage campaigns, and log gifts
- B. By automating financial ledger reporting for various revenue streams, including grants and in-kind donations
- C. By centralizing grant application, approval, and reporting processes for outbound grants

Answer: A

Explanation:

Donor cultivation and stewardship are the core pillars of a nonprofit's fundraising strategy. In the modern Nonprofit Cloud (NPC), Salesforce provides a unified platform to manage the entire donor lifecycle—from the initial "prospect" phase to long-term "stewardship." The Stewardship Framework in NPC:

* Tracking Interactions: Salesforce allows development officers to log every "touchpoint" with a donor.

Using the Interaction and Interaction Summary objects, staff can record detailed notes from discovery calls, coffee meetings, or site visits. This historical record ensures that as staff change, the relationship with the donor remains consistent and informed.

* Campaign Management: Cultivation often begins with targeted outreach. NPC uses the Campaign object and Outreach Source Codes to segment donors based on their interests (tracked via Interest Tags) and engage them with specific appeals. By tracking which campaigns a donor responds to, the organization can tailor future communications to the donor's proven interests.

* Gift Logging and Recognition: Stewardship relies on timely and accurate acknowledgment. When a gift is logged via Gift Entry, the system immediately updates the Donor Gift Summary. This allows staff to see the donor's impact at a glance. Features like OmniStudio Document Generation then automate the creation of personalized thank-you letters, which are a vital part of stewardship.

* Moves Management: Using Action Plans, a consultant can build standardized "stewardship tracks." For example, after a major gift is received, the system can automatically assign tasks for the Executive Director to make a thank-you call and for the Program Director to send a 6-month impact report.

While Grantmaking (Option B) and Accounting Subledger (Option C) are important operational features, they do not define the

relational strategy of "cultivation and stewardship." Option A correctly identifies the tools used by fundraisers to build and maintain the emotional and financial connection between the donor and the mission.

NEW QUESTION # 105

A nonprofit organization serves many families in their programs and want to track each family as a household. The organization serves diverse types of families, including blended families and split families, where some of the children divide their time between multiple households. How should the organization track these different family types?

- A. Create a Person Account for each family member. Create Contact Relationship records between the family members.
- B. Create a Person Account for each family member. Use the New Group flow to simplify the necessary record creation.
- C. Create an Account for each family and Contacts for each family member. Create Party Role Relationship records between the family members.

Answer: C

NEW QUESTION # 106

A developer needs to create a custom Apex class in the TDTM framework. Which sets of steps should the developer take?

- A. Create the Visualforce page, test class, and a Trigger Handler record
- B. Create the Lightning component, test class, and Trigger Handler record
- C. Create the Apex class, test class, and Trigger Handler record
- D. Create the Apex trigger, test class, and Trigger Handler record

Answer: C

NEW QUESTION # 107
