ExamBoosts's Scrum PSM-I practice exam software tracks your performance and provides results on the spot about your attempt. In this way, our Scrum PSM-I simulation software encourages self-analysis and self-improvement. Questions in the Scrum PSM-I Practice Test software bear a striking resemblance to those of the real test. This Scrum PSM-I practice exam software is easily accessible on all Windows laptops and computers.

Scrum PSM-I (Professional Scrum Master I) Exam is a certification program that assesses a candidate's knowledge of Scrum principles and their ability to apply them in real-world scenarios. PSM-I exam is designed to validate a candidate's understanding of Scrum methodology, the Scrum framework, and the role of the Scrum Master in a Scrum team. Professional Scrum Master I certification is intended for professionals who wish to demonstrate their expertise in Scrum and pursue a career as a Scrum Master.

To become a certified Scrum PSM-I professional, you need to have a deep understanding of the Scrum framework, including its values, principles, roles, events, and artifacts. Professional Scrum Master I certification exam is designed to test your knowledge and skills in these areas, and you must pass the exam with a minimum score of 85% to become certified.

To prepare for the Scrum PSM-I Exam, individuals are advised to study the Scrum Guide, which is the official guide to Scrum. The guide provides a comprehensive overview of Scrum theory, practices, and principles. Additionally, individuals can take practice exams, attend training courses, and participate in Scrum events to enhance their knowledge and understanding of Scrum.

Free PDF Scrum - PSM-I - Pass-Sure Latest Professional Scrum Master I Practice Materials

We provide our customers with the demo version of the Scrum PSM-I Exam Questions to eradicate any doubts that may be in your mind regarding the validity and accuracy. You can test the product before you buy it.

Scrum Professional Scrum Master I Sample Questions (Q93-Q98):

NEW QUESTION # 93

The Product Owner is not collaborating with the Development Team during the Sprint. What are two valuable actions for a Scrum Master to take? (Choose two.)

- **A. Bring up the problem in the Sprint Retrospective.**
- B. Inform the Product Owner's functional manager.
- **C. Coach the Product Owner in the values of Scrum and incremental delivery.**
- D. Stop the Sprint, send the Product Owner to a course and restart.
- E. Nominate a proxy Product Owner.

Answer: A,C

Explanation:

According to the Scrum Guide¹, collaboration between the Product Owner and Developers is essential for creating valuable products. The Product Owner is accountable for maximizing value resulting from work by Developers. Developers are accountable for creating a plan for the Sprint, which includes selecting items from Product Backlog that they can complete within a Sprint. The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. They do this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization. Therefore, two valuable actions for a Scrum Master to take if the Product Owner is not collaborating with the Development Team during the Sprint are:

Bring up the problem in the Sprint Retrospective, where the Scrum Team can inspect how they worked together and create a plan for improvements.

Coach the Product Owner in the values of Scrum and incremental delivery, and help them understand their role and responsibilities in collaborating with Developers.

The other options are not valuable actions, as they may undermine trust, respect, and self-organization within the Scrum Team.

NEW QUESTION # 94

Which are appropriate topics for discussion in a Sprint Retrospective? (Choose the best three answers.)

- **A. Team relations**
- **B. How the Scrum Team does its work.**
- C. Arranging the Sprint Backlog for the next Sprint.
- **D. Definition of Done.**
- E. The value of work currently represented in the Product Backlog.

Answer: A,B,D

Explanation:

According to the Scrum Guide, the Sprint Retrospective is an opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The topics that are appropriate for discussion are those that relate to how the team does its work, such as team relations, Definition of Done, and processes, tools, communication, collaboration, quality, etc. The other options are not appropriate topics for discussion in a Sprint Retrospective, as they belong to other Scrum events (such as arranging the Sprint Backlog for the next Sprint in the Sprint Planning or evaluating the value of work in the Product Backlog in the Sprint Review).

NEW QUESTION # 95

What two techniques could the Scrum Master use when the Scrum Team gets caught in an internal disagreement about which development techniques to apply? (Choose the best two answers.)

- A. Use coaching techniques; such as open questions and active listening.
- B. Involve the complete Development Team.
- C. Send every team member to the company's HR department to express their concerns.
- D. Ask an external technical specialist to make the decision.

Answer: A,B

NEW QUESTION # 96

You have just been hired by a company new to Scrum. Your management has assigned you to be the Scrum Master of six new Scrum Teams. These teams will build one product. Select two conditions you should strive for in this scenario. (choose the best two answers)

- A. There should be six Product Owners, one for each Scrum Team.
- B. The product has one Product Backlog.
- C. There should be only one Product Owner.
- D. Each Scrum Team should have a separate Product Backlog.
- E. There should be six Product Owners, reporting to a Chief Product Owner.

Answer: B,C

Explanation:

Correct answer: C and E

Short Explanation: According to the Scrum Guide 20201, the product has one Product Backlog, which is the single source of work undertaken by the Scrum Team. The Product Backlog is ordered by the Product Owner, who is accountable for maximizing the value of the product resulting from the work of the Scrum Team. There should be only one Product Owner per product, who may represent the desires of a committee in the Product Backlog, but those wanting to change a Product Backlog item's priority must address the Product Owner. Having multiple Product Owners or Product Backlogs would create confusion, inconsistency, and waste in the Scrum process.

NEW QUESTION # 97

(Which outcome is expected as a Scrum Team matures?
Choose the best answer.)

- A. Sprint Reviews will no longer be needed.
- B. The Sprint Retrospectives will grow to be longer than 4 hours.
- C. A Scrum Master is no longer needed since they are a mature team now.
- D. They will improve their Definition of Done to include more stringent criteria.
- E. There will be no need for a timeboxed Sprint.

Answer: D

Explanation:

The correct answer is B because as a Scrum Team matures, it is expected to strengthen its quality standards and improve its Definition of Done. The Scrum Guide explains that the Definition of Done creates transparency by making clear what it means for work to be complete. As the team becomes more capable, disciplined, and technically proficient, it often raises those standards to ensure higher quality, greater releasability, and more dependable Increments.

This improvement reflects empirical learning. A mature Scrum Team does not become less Scrum-like. It usually becomes more effective at applying Scrum. That means the team may refine engineering practices, strengthen testing, improve integration, and include more rigorous completion criteria in the Definition of Done.

Option A is incorrect because timeboxes do not expand simply because a team matures. Option C is incorrect because the Scrum Master remains accountable for Scrum effectiveness even with a mature team. Option D is incorrect because the Sprint remains a fixed timebox and a core element of Scrum. Option E is incorrect because Sprint Reviews continue to be essential for inspection and adaptation with stakeholders.

NEW QUESTION # 98

.....

As old saying goes, no pains, no gains. You must depend on yourself to acquire what you want. No one can substitute you with the process.
