- This certification credential will give you an edge over other counterparts. Apart from knowledge from Microsoft MB-800: Microsoft Dynamics 365 Business Central Functional Consultant exam.

Microsoft Dynamics 365 Business Central Functional Consultant Sample Questions (Q173-Q178):

NEW QUESTION # 173

A company uses Dynamics 365 Business Central.

The company requires the system to prevent sales orders and other sales transactions from posting without a specific dimension, even when no rules are set up for a customer.

You need to configure the system so customer entries always post with the value for the required dimension.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 174

You need to configure Business Central to display G/L entries as required by the accounting team.

Which configuration should you use?

- A. Debit/Credit
- B. Check G/L Account Usage
- C. Show Amounts
- D. G/L Account Card

Answer: A

Explanation:

The requirement is:

"When viewing G/L entries, the finance and accounting teams must be able to see debits and credits instead of a positive or negative amount." In Business Central, the General Ledger Entries page can display amounts in two different ways:

Amount (positive/negative): This is the default display of entry amounts as signed numbers.

Debit Amount / Credit Amount (separate fields): This allows accounting teams to clearly see whether an entry is a debit or a credit, consistent with traditional accounting presentation.

The configuration option "Debit/Credit" is specifically provided to control this display. By enabling this setting, amounts are shown in two columns (Debit Amount and Credit Amount) instead of one column with positive/negative signs.

Why not the other options?

B). Show Amounts - This relates to toggling whether amounts are displayed on certain ledger pages but does not change the format

to Debit/Credit.

C). Check G/L Account Usage - This is a validation function for checking how accounts are used, not related to entry display format.

D). G/L Account Card - Used to configure properties of individual G/L accounts (posting type, direct posting, account category), not the general display mode for entries.

Therefore, the correct configuration to meet the requirement is Debit/Credit.

Microsoft Learn references

Work with General Ledger Entries - explains how G/L entries can be displayed and filtered.

Business Central General Ledger Setup - includes configuration options such as showing amounts as debit /credit.

General Ledger Overview in Business Central - details on how entries are posted and viewed.

NEW QUESTION # 175

A company uses Dynamics 365 Business Central.

The sales department requires an approval process for new products. A sales order of more than \$10,000 must be approved by the sales director.

You need to set up a sales approval workflow.

Which page should you use? To answer, drag the appropriate pages to the correct requirements. Each page may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Pages	Requirement	Page
Approval User Setup	Sales amount approval limit for users	
Workflow User Group	Sales document type for approval	
Workflow	Sales items in documents for approval	

Answer:

Explanation:

Pages	Requirement	Page
Approval User Setup	Sales amount approval limit for users	Approval User Setup
Workflow User Group	Sales document type for approval	Workflow
Workflow	Sales items in documents for approval	Workflow User Group

Explanation:

Pages	Requirement	Page
Approval User Setup	Sales amount approval limit for users	Approval User Setup
Workflow User Group	Sales document type for approval	Workflow
Workflow	Sales items in documents for approval	Workflow User Group

NEW QUESTION # 176

You create a test instance of Dynamics 365 Business Central and enter transactions for testing purposes. You create a production company instance in the same Business Central environment.

You need to copy the setup and master data from the test instance to the production instance without copying transaction data.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Use the Copy Data from Company function from the Configuration Worksheet page
- B. Create and export a configuration package from the source company. Next, import into the destination company
- C. Use the Run Migration Now function from Cloud Migration Management
- D. Use the Copy function from the Companies page

Answer: B,D

NEW QUESTION # 177

You need to resolve the reconciliation issues.

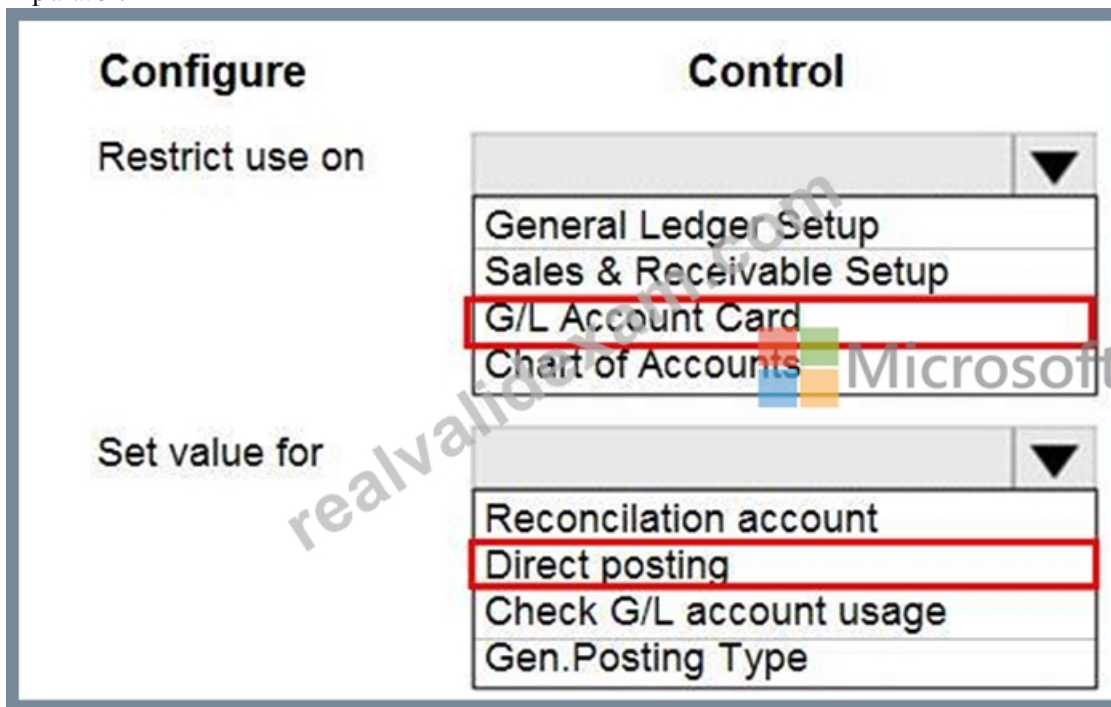

How should you complete the setup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configure	Control
Restrict use on	<ul style="list-style-type: none">General Ledger SetupSales & Receivable SetupG/L Account CardChart of Accounts
Set value for	<ul style="list-style-type: none">Reconciliation accountDirect postingCheck G/L account usageGen.Posting Type
