Mule-Arch-202 exam dump, dumps VCE for Salesforce Certified MuleSoft Platform Integration Architect

Question 1:

When using Cloud Hub with the Shared Load Balancer, what is managed EXCLUSIVELY by the API implementation (the Mule application) and NOT by Any point Platform?

A. The assignment of each HTTP request to a particular Cloud Hub worker
B. The number of DNS entries allocated to the API implementation
C. The SSL certificates used by the API implementation to expose HTTPS endpoints
D. The logging configuration that enables log entries to be visible in Runtime Manager

Answer: C

That's why Actual4Cert offers actual Salesforce Certified MuleSoft Platform Integration Architect (Mule-Arch-202) exam questions to help candidates pass the exam and save their resources. Instant Mule-Arch-202 Download & Mule-Arch-202 Valid Study Materials

Our Mule-Arch-202 cram materials take the clients' needs to pass the test smoothly into full consideration. The questions and answers boost high hit rate and the odds that they may appear in the real exam are high. Our Mule-Arch-202 exam questions have included all the information. Our Mule-Arch-202 cram materials analysis the popular trend among the industry and the possible answers and questions which may appear in the real exam fully. Our Mule-Arch-202 Latest Exam file stimulate the real exam's environment and pace to help the learners to get a well preparation for the real exam in advance.

Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q84-Q89):

NEW QUESTION # 84

A software company is creating a Mule application that will be deployed to CloudHub. The Mule application has a property named dbPassword that stores a database user's password. The organization's security standards indicate that the dbPassword property must be hidden from every Anypoint Platform user after the value is set in the Runtime Manager Properties tab.

Which configuration in the Mule application helps hide the dbPassword property value in Runtime Manager?

- A. Add the dbPassword property to the secureProperties section of the pom.xml file
- B. Add the dbPassword property to the secureProperties section of the mule-artifact.json file
- C. Store the encrypted dbPassword value in a secure properties placeholder file
- D. Use secure::dbPassword as the property placeholder name and store the cleartext (unencrypted) value in a secure properties placeholder file

Answer: B

NEW QUESTION # 85

An API is being implemented using the components of Anypoint Platform. The API implementation must be managed and governed (by applying API policies) on Anypoint Platform.

What must be done before the API implementation can be governed by Anypoint Platform?

- A. The API must be published to the organization's public portal so potential developers and API consumers both inside and outside of the organization can interact with the API
- B. A RAML definition of the API must be created in API Designer so the API can then be published to Anypoint Exchange
- C. The API must be published to Anypoint Exchange, and a corresponding API Instance ID must be obtained from API Manager to be used in the API implementation
- D. The OAS definitions in the Design Center project of the API and the API implementation's corresponding Mule project in Anypoint Studio must be synchronized

Answer: C

NEW QUESTION # 86

Which statement is true about the network connections when a Mule application uses a JMS connector to interact with a JMS provider (message broker)?

- A. The Advanced Message Queuing Protocol (AMQP) can be used by the JMS connector to portably establish connections to various types of JMS providers
- B. For the Mule application to receive JMS messages, the JMS provider initiates a network connection to the Mule application's JMS connector and then the JMS provider pushes messages along this connection
- C. The JMS connector supports both sending and receiving JMS messages over the protocol determined by the JMS provider
- D. To complete sending a JMS message, the JMS connector must establish a network connection with the JMS message recipient

Answer: C

NEW QUESTION # 87

Select the feature of Anypoint Platform that is essential for managing web APIs.

- A. Real-time event streaming
- B. Application deployment models
- C. API Manager
- D. Hardware interfaces

Answer: C

NEW QUESTION # 88

Which design approach uses the OS Connector to improve the scalability of Mule applications?

- A. Using a shared OS for all data types
- B. Distributing a single OS across multiple applications
- C. Centralizing all application configurations in one OS
- D. Isolating state management from business logic

Answer: D

NEW QUESTION # 89

......

You don't have to worry about your problems on our Mule-Arch-202 exam questions are too much or too simple. Our staff will give you a smile and then answer them carefully.
