Valid Google Chrome-Enterprise-Administrator Test Blueprint, Chrome-

Enterprise-Administrator Latest Test Bootcamp

Overall, we can say that with the Google Chrome-Enterprise-Administrator exam you can gain a competitive edge in your job search and advance your career in the tech industry. However, to pass the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam you have to prepare well. For the quick Chrome-Enterprise-Administrator exam preparation the Chrome-Enterprise-Administrator Questions is the right choice.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 2	<ul style="list-style-type: none">• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	<ul style="list-style-type: none">• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	<ul style="list-style-type: none">• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 5	<ul style="list-style-type: none">• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34

To reduce risk, an organization is required to maintain a minimum Chrome browser version. The organization allows updates but finds that not all browsers are within one major version of the stable release.

Which policy option would help an admin enforce Chrome browser updates to the latest major stable version via automatic updates'?

- A. Rollback to target version
- **B. Auto-update check period**
- C. Relaunch notification
- D. Component updates

Answer: B

Explanation:

While not directly stating "enforce to the latest major stable version," the "Auto-update check period" policy, when configured appropriately (shorter intervals), ensures that devices check for and apply updates more frequently. This increases the likelihood of browsers reaching and staying closer to the latest stable version over time. "Rollback to target version" is for reverting updates, "Component updates" manages specific browser components, and "Relaunch notification" prompts users to restart after an update.

NEW QUESTION # 35

An administrator is modifying a policy at the top-level organizational unit (OU), and there is an OU below that should not accept this modification. What can the administrator do to be certain of this*?

- A. Turn off inheritance for all policies
- B. Set policy precedence to Child > Parent
- C. Set the policy to locally applied at the parent OU
- **D. Set the policy to locally applied at the child OU**

Answer: D

Explanation:

To prevent a child OU from inheriting a policy set at a parent OU, the administrator needs to configure the policy within the child OU itself and set its inheritance status to "Locally applied." This explicitly overrides the inherited policy from the parent with a specific setting for the child OU. Setting it to locally applied at the parent would not prevent inheritance. Turning off inheritance entirely might not be desired for other policies, and "Child > Parent" is the default precedence when inheritance is enabled.

NEW QUESTION # 36

Users in the organization report that browsers force a restart after a new update has been downloaded, which interrupts their work day. What could an engineer do to improve the experience while maintaining security?

- A. Set the auto update check policy to occur during core work hours
- B. Change Chrome browser updates to only occur when a user checks
- C. Add a quiet period to the Relaunch notification
- **D. Create a relaunch window in Relaunch notification**

Answer: D

Explanation:

To minimize disruption while ensuring updates are applied, an engineer can configure a "Relaunch window" in the Relaunch notification settings. This allows users to be prompted to restart within a specific timeframe that is less likely to interrupt their critical work hours, giving them more control over when the restart occurs after an update. Disabling automatic updates (option A) would compromise security. Adding a quiet period (option B) only suppresses notifications, not the forced restart. Setting the auto-update check policy to occur during core work hours (option C) affects when updates are downloaded, not when the restart occurs.

NEW QUESTION # 37

Which data point is available in the Chrome Versions report*?

- A. Inactive Browsers
- B. Last update
- C. Total Browsers
- **D. Active Browsers**

Answer: D

Explanation:

The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While "Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

NEW QUESTION # 38

A systems engineer recently cloud enrolled Chrome browsers, which were previously managed via group policy, and deployed a policy through Chrome Enterprise Core. However, the policy is not applying. After validating the policy via `chrome://policy`, the status shows a warning conflict. What is the best way to resolve this issue?

- A. Check and configure the precedence order
- B. Re-enroll the Chrome browser to reset the policy
- C. Adjust the policy merge list setting
- D. Restart the computer to apply the policy changes

Answer: A

Explanation:

A "warning conflict" in `chrome://policy` indicates that multiple policy sources are trying to control the same setting. Since the browsers were previously managed by Group Policy, there's likely a conflict between the cloud policy and the local Group Policy. The best way to resolve this is to **check and configure the precedence order** of policy sources. Ensure that Cloud Policy is set to have the desired precedence over Group Policy if that's the intention. Restarting the computer might apply existing policies but won't resolve the conflict in precedence. Adjusting a "policy merge list setting" is not a standard term for resolving this type of conflict. Re-enrolling might give a fresh start but doesn't address the underlying conflict in policy sources.

NEW QUESTION # 39

.....

As we all know, in the era of the popularity of the Internet, looking for information is a very simple thing. But a lot of information are lack of quality and applicability. Many people find Google Chrome-Enterprise-Administrator exam training materials in the network. But they do not know which to believe. Here, I have to recommend Pass4suresVCE's Google Chrome-Enterprise-Administrator exam training materials. The purchase rate and favorable reception of this material is highest on the internet. Pass4suresVCE's Google Chrome-Enterprise-Administrator Exam Training materials have a part of free questions and answers that provided for you. You can try it later and then decide to take it or leave. So that you can know the Pass4suresVCE's exam material is real and effective.
