The Actual4Dumps is offering top-notch SAP C-ACDET-2506 exam practice questions for quick SAP C-ACDET-2506 exam preparation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55

Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. Ariba expression language
- B. JavaScript
- C. Python
- D. ABAP

Answer: A

Explanation:

SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

NEW QUESTION # 56

When you have created a new custom field and marked it as reportable, saved and published your changes, the field does not show up in your reports. How can you resolve the issue?

- A. You need to wait 2 hours for the schema to refresh. Any change to the object model will be automatically synchronized to SAP Ariba Analytics on regular intervals
- B. You did not assign the custom field to the appropriate report category. Ensure that the field is linked to the correct category for it to appear in reports.
- C. You forgot to run the task Retrieve flexible fields metadata for reporting under Manage > Administration > Reporting Manager > Flex Field Reporting
- D. You created the custom field in a different module. Custom fields must be created in the same module where the reports are generated to show up correctly.

Answer: C

NEW QUESTION # 57

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. Template - project templates such as Contract templates
- B. SupplierContact - contacts for the suppliers
- C. DynamicForm - custom form templates (dForms)
- D. AMLExtension - AML customizations such as custom fields

Answer: B

NEW QUESTION # 58

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- A. In the enumeration file, the Value column must only contain whole numbers
- B. The display order in the drop down matches the order defined in the enumeration file
- C. The display order of the values is alphabetical
- D. The user can filter the values using the search box in the chooser

Answer: B,D

NEW QUESTION # 59

When performing migration to production for a Greenfield customer, which item needs to be made available in Production prior to creating the migration package in Intelligent Configuration Manager (ICM)?

- A. Locations
- B. Approval Rules
- C. Translations

- D. Users

Answer: C

Explanation:

Before creating and deploying migration packages with the Intelligent Configuration Manager (ICM), translation string resource files (custom field labels, help tips, validation messages, etc.) must be uploaded into Production via AML & Translations Upload. This ensures that migration bundles referencing these translations do not cause missing label or localization issues post-migration. Locations, users, and approval rules are either migrated as part of configuration packages or managed separately, and do not require prior upload to Production before creating migration packages.

NEW QUESTION # 60

.....

Our C-ACDET-2506 exam cram has been revised for lots of times to ensure all candidates can easily understand all knowledge parts. In the meantime, the learning process is recorded clearly in the system, which helps you adjust your learning plan. On the one hand, our company has benefited a lot from renovation.
