問題 #19

Which tasks can be executed from a business process step to create a new condition rule? (Select two correct answers.)

- A. Maintain Step Delay
- B. Maintain Step Conditions
- C. Create Condition Rule
- D. Maintain Advanced Routing Restrictions

答案: B,C

解題說明:

In Workday, condition rules determine whether a step executes, routes, or triggers based on defined criteria such as job attributes, location, or organization. There are two primary ways to create or associate condition rules directly from a business process step:

* Create Condition Rule (Option C)- allows a user to define a new condition rule directly from within the step configuration screen. This opens the condition rule editor where criteria can be defined using Workday attributes.

* Maintain Step Conditions (Option D)- provides the option to assign existing condition rules or create new ones for the selected step. This is often used to ensure that certain steps run only when specific business conditions are met.

Options A and B are incorrect:

* Maintain Advanced Routing Restrictions(A) is related to security routing and worktag-based participant logic, not condition rule creation.

* Maintain Step Delay(B) controls timing (delaying execution by hours or days), unrelated to conditions.

Reference (Paraphrased Source):

Workday Pro HCM Core - Business Process Framework and Condition Rule Configuration Guide (2023R2)

- Sections: "Creating and Maintaining Condition Rules" and "Step-Level Configuration."

問題 #20

You want the company organization to default in when you hire workers. What task should you run from the supervisory organization to accomplish this?

- A. Edit Name/Code
- B. Create Position
- C. Edit Supervisory Organization
- D. Assign Roles

答案: C

解題說明:

Comprehensive and Detailed Explanation (Paraphrased from Workday Pro HCM Core - Organizations Configuration Guide, 2023R2):

To have the Company Organization automatically default when hiring workers into a supervisory organization, you must update the organization settings through the Edit Supervisory Organization task.

This task allows you to define default organization assignments, including Company, Cost Center, Region, and Custom Organizations. Once these defaults are set, Workday automatically populates these values during staffing events such as Hire or Add Job, reducing manual entry and ensuring consistent data alignment across the hierarchy.

Option B (Create Position) is used to define positions within the supervisory org, not defaults.

Option C (Edit Name/Code) modifies identifiers only.

Option D (Assign Roles) relates to security role assignments.

Therefore, Edit Supervisory Organization is the correct task to establish the default Company for new hires.

Reference (Paraphrased Source):

Workday Pro HCM Core - Organizations Configuration Guide (2023R2), Section: "Defining Default Organization Assignments."

問題 #21

Scenario:

A new supervisory organization has been created. The staffing model has been assigned so that there is no limit on the number of jobs that are filled.

The organization is now ready for staffing. You want to limit the Worker Type and Locations that are available.

What business process accomplishes this?

- A. Edit Hiring Restrictions
- B. Edit Position
- C. Edit Position Restrictions
- D. Edit Job

答案：A

解題說明：

The correct answer is D - Edit Hiring Restrictions.

In this scenario, the supervisory organization uses the Job Management staffing model ("no limit on the number of jobs"). Because there are no discrete positions, you control staffing limits through Hiring Restrictions rather than position-level restrictions.

The Edit Hiring Restrictions task allows administrators to specify criteria such as:

- * Worker Type (Employee, Contingent Worker)
- * Location
- * Job Family / Job Profile
- * Time Type (Full-time, Part-time)

This ensures that hiring aligns with organizational policy even when positions are not individually managed.

For organizations using Position Management, the corresponding task would be Edit Position Restrictions instead.

Reference: Workday Pro HCM - Hiring and Staffing Models Guide, "Using Hiring Restrictions in Job Management Organizations."

問題 #22

You need to determine which tasks in your business process must occur after the completion step. What report will you run?

- A. Business Process Configuration Options
- B. Business Process Definitions
- C. Business Process Definitions for Business Object
- D. Business Process Compare

答案：B

解題說明：

The correct report to determine which tasks occur after the Completion Step in a business process is the "Business Process Definitions" report.

In Workday, the Business Process Definitions report provides a comprehensive view of all steps, conditions, and routing rules configured within a specific business process definition. This includes identifying the sequence of steps, whether they occur before or after the completion step, and the associated responsible roles or security groups.

This report is critical for administrators and Workday Pro users to validate workflow sequencing, especially when troubleshooting process behavior or verifying compliance with organizational approval structures. Other reports, such as Business Process Definitions for Business Object, are broader and list all business processes tied to a given object, but they do not detail the post-completion steps.

Reference: Workday Pro HCM - Business Process Fundamentals, "Analyzing Business Process Definitions" section; Workday Report: Business Process Definitions.

問題 #23

What task allows you to edit the staffing model for multiple supervisory organizations at one time?

- A. Maintain Staffing Models
- B. Create Supervisory Organizations
- C. Supervisory Orgs by Staffing Model
- D. Edit Staffing Model

答案：A

解題說明：

The correct answer is C - Maintain Staffing Models.

In Workday, the Maintain Staffing Model task enables administrators to update or modify the staffing model assignments for multiple supervisory organizations simultaneously. This task provides a consolidated interface to review which organizations use Position Management or Job Management, and allows bulk updates where necessary.

While the Edit Staffing Model task is used to change the staffing model for a single supervisory organization, Maintain Staffing Model is the correct and efficient method for multi-org updates—especially during tenant configuration or large-scale reorganizations. Reference: Workday Pro HCM - Staffing Model Configuration Guide, "Maintain Staffing Models - Bulk Updates Across Organizations."

問題 #24

如果你覺得你購買Fast2test Workday的Workday-Pro-HCM-Core考試培訓資料利用它來準備考試是一場冒險，那麼整個生命就是一場冒險，走得最遠的人常常就是願意去做願意去冒險的人。更何況Fast2test Workday的Workday-Pro-HCM-Core考試培訓資料是由眾多考生用實踐證明了，它帶給每位考生的成功也是真實有效的，成功有夢想和希望固然重要，但更重要的是去實踐和證明，Fast2test Workday的Workday-Pro-HCM-Core考試培訓資料是被證明一定會成功的，選擇了它，你還有什麼理由不成功呢！
