2026 New C_TS422_2023 Study Notes | Useful 100% Free SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Free Updates

DOWNLOAD the newest DumpStillValid C_TS422_2023 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1wX-ilgSZVl4YXcaXk53HxJW6ldk_1TAI

Our C_TS422_2023 learning materials were developed based on this market demand. More and more people are aware of the importance of obtaining a certificate. There are more and more users of C_TS422_2023 practice guide. Our products can do so well, the most important thing is that the quality of C_TS422_2023exam questions is very good, and can be continuously improved according to market demand. And you can look at the data on our website, the hot hit of our C_TS422_2023 training guide can prove how popular it is!

SAP C_TS422_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	- Introduction to SAP S 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S 4HANA, its main components, business applications, and user experience strategy.
Topic 2	- Material Requirements Planning in SAP S 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 3	- Master Data in SAP S 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.

Topic 4	• Capacity Planning in SAP S • 4HANA: This section covers a discussion of SAP S • 4HANA best practices, SAP HANA database concept, SAP Fiori user experience, and embedded analytics capabilities.
Topic 5	• Introduction to SAP S • 4HANA Production Planning: This section covers an overview of production planning components, functions, and planning approaches. Exploration of emerging trends.
Topic 6	• Process Orders in SAP S • 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.
Topic 7	• Managing Clean Core: This section covers the application of clean core principles to enhance business process agility, reduce adaptation efforts, and drive innovation in ERP systems.
Topic 8	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.
Topic 9	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

C_TS422_2023 Free Updates & C_TS422_2023 Exam Discount Voucher

With "reliable credit" as the soul of our C_TS422_2023 study tool, "utmost service consciousness" as the management philosophy, we endeavor to provide customers with high quality service. Our customer service staff, who are willing to be your little helper and answer your any questions about our C_TS422_2023 qualification test, fully implement the service principle of customer-oriented service on our C_TS422_2023 Exam Questions. Any puzzle about our C_TS422_2023 test torrent will receive timely and effective response, just leave a message on our official website or send us an e-mail for our C_TS422_2023 study guide.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q44-Q49):

NEW QUESTION # 44
Advanced Planning uses master data from SAP S/4HANA Cloud Private Edition. In which data objects can you set the Advanced Planning flag? Note: There are 2 correct answers to this question.

- A. Material
- B. Plant
- C. Work center
- D. Production version

Answer: A,C

NEW QUESTION # 45
Which options do you have to plan both quantities and capacities during line loading in repetitive manufacturing?
Note: There are 2 Correct answers to this question?

- A. Assign planned orders manually in the planning table
- B. Run MRP with quota arrangement
- C. Assign planned orders manually in the planning table
- D. Run PP/DS heuristic for repetitive manufacturing

Answer: C,D

Explanation:
Run PP/DS heuristic for repetitive manufacturing: PP/DS (Production Planning and Detailed Scheduling) is a component of SAP S/4HANA that provides advanced planning and scheduling functions for complex production scenarios. You can run the PP/DS heuristic for repetitive manufacturing to automatically assign planned orders to production lines based on the available capacity, material, and sequence constraints. The PP/DS heuristic also optimizes the line utilization and minimizes the setup times and costs.
Assign planned orders manually in the planning table: The planning table is a graphical tool that allows you to view and manipulate the production plan for repetitive manufacturing. You can assign planned orders manually to production lines by dragging and dropping them in the planning table. You can also adjust the start and finish dates, quantities, and sequences of the planned orders. The planning table shows the capacity situation and the material availability for each production line.
You cannot plan both quantities and capacities during line loading in repetitive manufacturing by using the following options:
Run MRP with quota arrangement: MRP (Material Requirements Planning) is a process that calculates the quantity and timing of material requirements based on the demand and supply situation. You can run MRP with quota arrangement to distribute the total requirements for a material among multiple sources of supply, such as vendors, plants, or production lines. However, MRP does not consider the capacity constraints or the sequence dependencies of the production lines, and therefore cannot plan the capacities during line loading.
Assign planned orders manually in the planning table: This option is identical to option C and therefore cannot be a correct answer.

NEW QUESTION # 46
What are the prerequisites for a reporting point confirmation in repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Defining the relevant work centers in the routing
- B. Activating the reporting point backflush in the work centers
- C. Defining the operations as reporting points using the control key
- D. Activating the reporting point backflush in the order dependent parameters

Answer: C

NEW QUESTION # 47
How would you define pegging in the context of Advanced Planning?

- A. An evaluation that is ordered according to the bill-of-material structure of all related products and represents the relationship between the receipt and the issue elements
- B. An evaluation to verify if there are overstock situations in the balance between receipt and issue elements after the production planning run
- C. An evaluation that is ordered according to the network structure of all related products and represents the coverage of issue elements with receipt elements
- D. An evaluation to verify if there are material or capacity shortages in the
