

Free PDF Quiz Fortinet - FCSS_SASE_AD-24 - FCSS - FortiSASE 24 Administrator Newest Online Bootcamps

What's more, part of that BraindumpsIT FCSS_SASE_AD-24 dumps now are free: https://drive.google.com/open?id=1sWyCnTWJ4Rw2DVIH_1WjQA66FxU-tWok

It is never too late to try new things no matter how old you are. Someone always give up their dream because of their ages, someone give up trying to overcome FCSS_SASE_AD-24 exam because it was difficult for them. Now, no matter what the reason you didn't pass the exam, our study materials will try our best to help you. If you are not sure what kinds of FCSS_SASE_AD-24 Exam Question is appropriate for you, you can try our free demo of the PDF version. For instance, our FCSS_SASE_AD-24 practice torrent is the most suitable learning product for you to complete your targets.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
Topic 2	<ul style="list-style-type: none">Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.

Topic 3	<ul style="list-style-type: none"> • SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.
Topic 4	<ul style="list-style-type: none"> • SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.

The second form is FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) web-based practice test which can be accessed through online browsing. The FCSS_SASE_AD-24 web-based practice test is supported by browsers like Firefox, Microsoft Edge, Fortinet Chrome, and Safari. You don't need to install any plugins or software to attempt the FCSS_SASE_AD-24 web-based practice test. This online Fortinet FCSS_SASE_AD-24 exam is also compatible with all operating systems.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q38-Q43):

NEW QUESTION # 38

Refer to the exhibit.

In the user connection monitor, the FortiSASE administrator notices the user name is showing random characters. Which configuration change must the administrator make to get proper user information?

- A. Configure the username using FortiSASE naming convention.
- **B. Turn off log anonymization on FortiSASE.**
- C. Change the deployment type from SWG to VPN.
- D. Add more endpoint licenses on FortiSASE.

Answer: B

Explanation:

In the user connection monitor, the random characters shown for the username indicate that log anonymization is enabled. Log anonymization is a feature that hides the actual user information in the logs for privacy and security reasons. To display proper user information, you need to disable log anonymization.

* Log Anonymization:

* When log anonymization is turned on, the actual usernames are replaced with random characters to protect user privacy.

* This feature can be beneficial in certain environments but can cause issues when detailed user monitoring is required.

* Disabling Log Anonymization:

* Navigate to the FortiSASE settings.

* Locate the log settings section.

* Disable the log anonymization feature to ensure that actual usernames are displayed in the logs and user connection monitors.

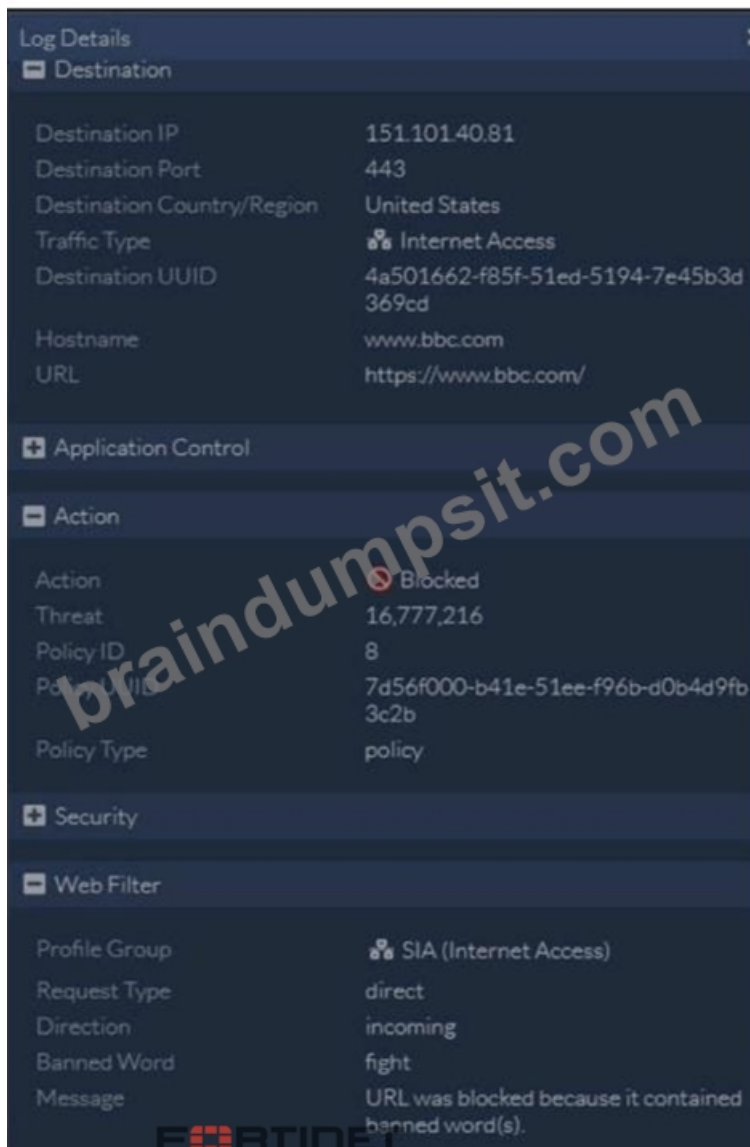

References:

FortiSASE 23.2 Documentation: Provides detailed steps on enabling and disabling log anonymization.

Fortinet Knowledge Base: Explains the impact of log anonymization on user monitoring and logging.

NEW QUESTION # 39

Refer to the exhibit. To allow access, which web filter configuration must you change on FortiSASE?

- A. FortiGuard category-based filter
- B. inline cloud access security broker (CASB) headers
- C. URL Filter
- D. content filter

Answer: D

Explanation:

To allow access to the URL blocked due to a banned word ("fight" in this case), you need to change the content filter configuration in FortiSASE.

The content filter checks the content within URLs and blocks access based on specific keywords or phrases. Since the block was triggered by the word "fight," modifying the content filter settings to either remove this word from the banned list or adjust the filtering criteria would allow access to the URL.

NEW QUESTION # 40

Which FortiSASE feature ensures least-privileged user access to all applications?

- A. thin branch SASE extension
- B. secure web gateway (SWG)
- C. zero trust network access (ZTNA)

- D. SD-WAN

Answer: C

Explanation:

Zero Trust Network Access (ZTNA) is the FortiSASE feature that ensures least-privileged user access to all applications. ZTNA operates on the principle of "never trust, always verify," providing secure access based on the identity of users and devices, regardless of their location.

Zero Trust Network Access (ZTNA):

ZTNA ensures that only authenticated and authorized users and devices can access applications.

It applies the principle of least privilege by granting access only to the resources required by the user, minimizing the potential for unauthorized access.

Implementation:

ZTNA continuously verifies user and device trustworthiness and enforces granular access control policies.

This approach enhances security by reducing the attack surface and limiting lateral movement within the network.

Reference:

FortiOS 7.2 Administration Guide: Provides detailed information on ZTNA and its role in ensuring least-privileged access.

FortiSASE 23.2 Documentation: Explains the implementation and benefits of ZTNA within the FortiSASE environment.

NEW QUESTION # 41

Which logs are important for compliance in FortiSASE?

(Select all that apply)

Response:

- A. Server performance logs
- **B. Compliance rule updates**
- **C. Security incident logs**
- **D. User activity logs**

Answer: B,C,D

NEW QUESTION # 42

What is the primary purpose of implementing Zero Trust Network Access (ZTNA) in FortiSASE?

Response:

- A. To provide blanket access to all network resources
- B. To replace all existing security measures
- **C. To enforce least-privilege access based on identity and context**
- D. To simplify network configurations

Answer: C

NEW QUESTION # 43

.....

As we all know, it is difficult for you to prepare a FCSS_SASE_AD-24 exam by yourself. You will feel confused about some difficult knowledge. Now, you are fortunate enough to purchase our FCSS_SASE_AD-24 study questions. Our study materials are compiled by professional experts. They have researched the annual Real FCSS_SASE_AD-24 Exam for many years. So once you buy our study materials, you will save a lot of troubles.
