

# Prominent Features of CWNP CWDP-305 Practice Test Questions

DOWNLOAD the newest Prep4sureGuide CWDP-305 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1Pix\\_cYFmshzJmsTVdzHabOzkMR434ir](https://drive.google.com/open?id=1Pix_cYFmshzJmsTVdzHabOzkMR434ir)

Prep4sureGuide offers a free demo of Certified Wireless Design Professional (CWDP-305) exam dumps before the purchase to test the features of the products. Prep4sureGuide also offers 1 year of free CWDP-305 exam questions updates if the CWDP-305 certification exam content changes after purchasing our CWDP-305 Exam Dumps. It is possible to adjust the CWDP-305 practice test difficulty levels according to your needs. You can choose the number of CWNP CWDP-305 questions and topics.

## CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.</li> </ul>

## **Latest CWDP-305 Exam Forum & CWDP-305 Valid Braindumps Sheet**

Many people prefer to buy our CWDP-305 valid study guide materials because they deeply believe that if only they buy them can definitely pass the test. The reason why they like our CWDP-305 guide questions is that our study materials' quality is very high. For years we always devote ourselves to perfecting our CWDP-305 Study Materials. We boast the leading research team and the top-ranking sale service. We boast the expert team to specialize in the research and production of the CWDP-305 guide questions and professional personnel to be responsible for the update of the CWDP-305 study materials.

### **CWNP Certified Wireless Design Professional Sample Questions (Q55-Q60):**

#### **NEW QUESTION # 55**

An associated STA detects a new BSS with the same SSID as the STA's current BSS. The new BSS uses a different IP subnet than the current BSS.

If the STA is configured to use 802.1X/EAP preauthentication, what is likely to occur?

- A. The STA will attempt to preauthenticate and succeed if DHCP is supported on the new subnet.
- B. **The STA will attempt to preauthenticate, but fail because the new BSS uses a different data-link broadcast domain.**
- C. The STA will attempt to preauthenticate and succeed if IP Mobility is enabled on the AP or WLAN controller.
- D. The STA will not attempt to preauthenticate because the new BSS uses a different IP subnet.

**Answer: B**

#### **NEW QUESTION # 56**

What power management feature introduced in 802.11ax, but not available in 802.11ac or 802.11n, is designed to improve battery life for WLAN devices?

- A. WMM-Power Save
- B. Legacy Power Save
- C. **TWT**
- D. OFDMA

**Answer: C**

#### **NEW QUESTION # 57**

What part of the 802.11n preamble is used by the receiver to estimate the spatially multiplexed signal channel? What mode is this used in?

Response:

- A. HT-STF in Greenfield mode only
- B. HT-LTF in Greenfield mode only
- C. **HT-LTF in Mixed and Greenfield modes**
- D. HT-STF in Mixed and Greenfield modes

**Answer: C**

## NEW QUESTION # 58

You are site surveying a network for VoWiFi. You have positioned an AP for a manual survey and are moving away from the AP with a phone in Survey Mode in your hand and you are reading the RSSI value of the signal received from the AP. You have previously determined that the noise floor was approximately -94 dBm on this floor of the building. The phone's documentation does not specify a recommended RSSI or SNR value for best performance. Based on the information provided and the type of device (VoWiFi phone) you are deploying, what minimum RSSI should you plan for in all areas you are monitoring and where VoWiFi service is desired?

- A. -67 dBm
- B. -75 dBm
- C. -72 dBm
- D. -62 dBm

### Answer: A

Explanation:

Comprehensive and Detailed Explanation:

For reliable Voice over Wi-Fi (VoWiFi) service, a minimum RSSI of -67 dBm is generally recommended.

This level ensures sufficient signal strength to support the quality of service required for voice applications, providing adequate signal-to-noise ratio (SNR) and minimizing the likelihood of dropped calls or poor audio quality.

## NEW QUESTION # 59

Given:

In your regulatory domain, a Tx Power Level of "1" is equivalent to 17 dBm.

For every integer increment (e.g. from 1 to 2) to the Tx Power Level, the APs transmit power is halved.

In units of mW, what is the actual transmit power for an AP configured at a Tx Power Level of "4"?

- A. 6.25 mW
- B. 8 mW
- C. 12.5 mW
- D. 50 mW

### Answer: C

## NEW QUESTION # 60

.....

Prep4sureGuide is one of the leading platforms that has been helping Certified Wireless Design Professional Exam Questions candidates for many years. Over this long time, period the Certified Wireless Design Professional (CWDP-305) exam dumps helped countless CWNP CWDP-305 exam questions candidates and they easily cracked their dream Certified Wireless Design Professional (CWDP-305) certification exam. You can also trust Certified Wireless Design Professional (CWDP-305) exam dumps and start CWNP CWDP-305 exam preparation today.
