SAFe-Practitioner認定試験の準備をするために、Jpshikenの専門家たちは彼らの豊富な知識と実践を生かして特別なトレーニング資料を研究しました。JpshikenのScrumのSAFe-Practitioner問題集はあなたが楽に試験に受かることを助けます。JpshikenのScrumのSAFe-Practitioner練習テストはSAFe-Practitioner試験問題と解答、SAFe-Practitioner問題集、SAFe-Practitioner書籍やSAFe-Practitioner勉強ガイドに含まれています。

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) 試験は、組織におけるスケーラブルアジャイルフレームワーク (SAFe) の実装に焦点を当てた認定試験です。SAFeは、大規模なソフトウェア開発と製品配信のための広く使われているフレームワークであり、組織がソフトウェア開発と配信プロセスを改善するのを支援するように設計されています。SP試験は、SAFeとその実装に関する知識と理解を証明したい個人を対象としています。

SAFe 5 Practitioner (SP) 認定を取得することは、アジャイル実践への取り組みと、複雑な企業環境でのSAFeフレームワークの適用能力を示すこととなります。この認定は、企業レベルでアジャイル実践を実施する組織にとって非常に価値があり、保持者にはキャリアアップの機会が生じる可能性があります。

当社JpshikenのSAFe-Practitionerガイド急流は、高品質と効率だけでなく、販売後の完璧なサービスシステムも備えています。SAFe-Practitionerテストトレントを購入することに決めた場合、24時間オンラインで効率的なサービスを提供したいと思います。返信を受け取ります。SAFe-Practitionerガイドトレントに関するご質問にお答えします。あなたには、オンラインの連絡先または電子メールで当社と連絡を取る権利があります。SAFe-Practitioner試験問題の販売後の高品質で完璧なサービスシステムは、国内および海外のお客様から認められています。安心して購入できます。

## Scrum SAFe Practitioner Exam (6.0) 認定 SAFe-Practitioner 試験問題 (Q39-Q44):

### 質問 # 39

What is one approach to unlock the intrinsic motivation of knowledge workers?

- A. Strive to achieve a state of continuous flow

- B. Provide autonomy
- C. Centralize decision-making
- D. Reduce work in process (WIP) limits

正解: B

解説:

Providing autonomy is one approach to unlock the intrinsic motivation of knowledge workers. Autonomy means giving knowledge workers the freedom and responsibility to make decisions about their work, such as how to do it, when to do it, and who to do it with. Autonomy fosters a sense of ownership, empowerment, and self-determination, which are essential for creativity and innovation. Autonomy also supports the Lean-Agile principle of decentralizing decision-making, which enables faster and better outcomes. SAFe provides several mechanisms to enable autonomy for knowledge workers, such as self-organizing and self-managing Agile teams, ARTs and Solution Trains, Communities of Practice, and Innovation and Planning Iterations. 質問 # 40

What is the product vision?

- A. An explanation of the architectural runway needed to deliver products to the customer
- B. A set of prioritized Features
- C. A method for aligning to the product direction
- D. The user stories required to meet customer needs

正解: C

解説:

The product vision is a description of the future state of the product or service under development. It reflects customer and stakeholder needs, as well as the features and capabilities proposed to meet those needs. The product vision is both aspirational and achievable, providing the broader context and purpose of the product or service. It describes the markets, customer segments, user needs, and how the product or service will be different from the competition. The product vision is owned by the product owner, but its development requires input from stakeholders and the scrum team(s). The product vision helps align the team to the product direction and motivates them to deliver value to the customers and stakeholders. 質問 # 41

How does SAFe describe Customer Centricity?

- A. As a strategy to meet the needs of an ever-changing Customer market
- B. As a set of practices employed to make products focused on the Customer
- C. As a way of working to include the Customer in daily work processes and planning
- D. As a mindset focused on Customer behaviors that produce the best innovations

正解: D

解説:

Customer Centricity is a mindset that helps organizations make decisions that are based on a deep understanding of its effect on customers and end-users. It motivates teams to focus on the customer, understand their needs, think and feel like them, build whole product solutions, and know their lifetime value.

Customer Centricity is related to Design Thinking, which provides the tools and practices to support creating desirable products that are profitable and sustainable over their lifecycle. 質問 # 42

What is one way to quickly address impediments to flow?

- A. Raise visibility of effects outside of ART control
- B. Review burn-down charts
- C. Wait for the next Inspect and Adapt event
- **D. Identify them on the Planning Board**

正解: D

解説:

One way to quickly address impediments to flow is to identify them on the Planning Board, which is a visual tool that shows the status of work items and dependencies in an iteration. By making impediments visible, the team can collaborate to resolve them and prevent them from blocking the delivery of value. The Planning Board also helps the team monitor their progress and adjust their plan as needed. References: Exam Study Guide: SP (6.0) - SAFe Practitioner, Planning the Iteration, [Visualize and Limit WIP, Reduce Batch Sizes, and Manage Queue Lengths]

#### 質問 # 43

What does the "C" represent in the CALMR approach to DevOps?

- **A. Culture**
- B. Cycle-time
- C. Completion
- D. Continuous Integration

正解: A

解説:

The "C" in the CALMR approach to DevOps represents culture. Culture is the first element of the CALMR mindset, which guides the ART toward achieving continuous value delivery by enhancing culture, automation, lean flow, measurement, and recovery<sup>1</sup>. Culture refers to the shared values, beliefs, and behaviors that support collaboration, communication, and continuous improvement among the development, operations, security, and other teams involved in the value stream<sup>2</sup>. Culture also includes respecting and empowering the people and teams, fostering a learning and growth mindset, and creating a customer-centric focus<sup>3</sup>. Culture is the foundation of DevOps, as it enables the alignment and integration of the technical and organizational aspects of DevOps<sup>4</sup>. The other options are not what the "C" stands for in the CALMR approach to DevOps, although they are related to other elements of the mindset. Completion is not a specific term in the CALMR approach, but it could be associated with measurement, which tracks the progress and outcomes of the value delivery. Cycle-time is a metric that measures the time it takes to deliver value from idea to production, and it is influenced by lean flow, which optimizes the value stream and eliminates waste. Continuous integration is a technical practice that involves merging code changes frequently and automatically testing them, and it is part of automation, which reduces manual work and errors and accelerates feedback loops.
