Answer: C

**NEW QUESTION # 231**

Which DSCP PHB classification must be used to configure QoS for voice on a high-speed network?

- A. CS4
- B. 0
- C. EF
- D. AF43

Answer: C

**NEW QUESTION # 232**

What is the major difference between the two possible Cisco IM and presence high-availability modes?

- A. Balanced mode provides user load balancing and user failover only for manually generated failovers. Active/standby mode provides an unconfigured standby node in the event of an outage, but it does not provide load balancing.
- B. Balanced mode provides user load balancing and user failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, but it does not provide load balancing.
- C. Balanced mode provides user load failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, and is also provides load balancing.
- D. Balanced mode does not provide user load balancing, but it provides user failover in the event of an outage. Active/standby mode provides an always on standby node in the event of an outage, but is does not provide load balancing.

Answer: B

Explanation:

Balanced mode: This mode provides redundant high availability with automatic user load balancing and user failover in the event that one nodes fails because of component failure or power outage.

Active/standby mode: The standby node automatically takes over for the active node if the active node fails. It does not provide automatic load balancing.

**NEW QUESTION # 233**

How does an administrator make Cisco IP phone display the last 10 digits of the calling number when the call is in the connected state, and also display the calling number in the E.164 format within call history on the phone?

- A. Configure a translation pattern that has a calling Party Transform Mask of XXXXXXXXXXXX.
- B. Configure a calling party transformation pattern that keeps only last 10 digits.
- C. Change the service parameter Apply Transformations On Remote Number to True.

- D. On the inbound SIP trunk, change Significant Digits to 10.

**Answer: C**

Explanation:

The outbound call's calling party transformation CSS (also referred to as localization or remote number calling party transformation CSS) can also be used to localize remote connected party information.

To enable this, the advanced service parameter Apply Transformations On Remote Number must be enabled.

## NEW QUESTION # 234

.....
