## Test Professional-Cloud-Database-Engineer Duration | 100% Free Latest Exam Google Cloud Certified - Professional Cloud Database Engineer Success

Pass4training is a website to achieve dreams of many IT people. Pass4training provide candidates participating in the IT certification exams the information they want to help them pass the exam. Do you still worry about passing Google certification Professional-Cloud-Database-Engineer exam? Have you thought about purchasing an Google certification Professional-Cloud-Database-

Engineer exam counseling sessions to assist you? Pass4training can provide you with this convenience. Pass4training's training materials can help you pass the certification exam. Pass4training's exercises are almost similar to real exams. With Pass4training's accurate Google Certification Professional-Cloud-Database-Engineer Exam practice questions and answers, you can pass Google certification Professional-Cloud-Database-Engineer exam with a high score.

## Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Your customer has a global chat application that uses a multi-regional Cloud Spanner instance. The application has recently experienced degraded performance after a new version of the application was launched. Your customer asked you for assistance. During initial troubleshooting, you observed high read latency. What should you do?

- A. Change the Cloud Spanner configuration from multi-region to single region.
- B. Use SQL statements to analyze SPANNER\_SYS.READ\_STATS\* tables.
- C. Use query parameters to speed up frequently executed queries.
- D. Use SQL statements to analyze SPANNER\_SYS.QUERY\_STATS\* tables.

**Answer: A**

### NEW QUESTION # 34

Your organization works with sensitive data that requires you to manage your own encryption keys. You are working on a project that stores that data in a Cloud SQL database. You need to ensure that stored data is encrypted with your keys. What should you do?

- A. Export data periodically to a Cloud Storage bucket protected by Customer-Supplied Encryption Keys.
- B. Use Cloud SQL Auth proxy.
- C. Connect to Cloud SQL using a connection that has SSL encryption.
- D. Use customer-managed encryption keys with Cloud SQL.

**Answer: C**

### NEW QUESTION # 35

You are using Compute Engine on Google Cloud and your data center to manage a set of MySQL databases in a hybrid configuration. You need to create replicas to scale reads and to offload part of the management operation. What should you do?

- A. Use the mysqldump utility and binary logs.
- B. Use Cloud SQL for MySQL external replica.
- C. Use Data Migration Service.
- D. Use external server replication.

**Answer: C**

### NEW QUESTION # 36

You are designing an augmented reality game for iOS and Android devices. You plan to use Cloud Spanner as the primary backend database for game state storage and player authentication. You want to track in-game rewards that players unlock at every stage of the game. During the testing phase, you discovered that costs are much higher than anticipated, but the query response times are within the SLA.

You want to follow Google-recommended practices. You need the database to be performant and highly available while you keep costs low. What should you do?

- A. Manually scale down the number of nodes after the peak period has passed.
- B. Use interleaving to co-locate parent and child rows.
- C. Use the Cloud Spanner query optimizer to determine the most efficient way to execute the SQL query.
- D. Use granular instance sizing in Cloud Spanner and Autoscaler.

**Answer: C**

### NEW QUESTION # 37

You are working on a new centralized inventory management system to track items available in 200 stores, which each have 500 GB of data. You are planning a gradual rollout of the system to a few stores each week. You need to design an SQL database architecture that minimizes costs and user disruption during each regional rollout and can scale up or down on nights and holidays. What should you do?

- A. Use a Bigtable cluster with autoscaling.
- B. Use sharded Cloud SQL instances with one or more stores per database instance.
- **C. Use Cloud Spanner with a custom autoscaling solution.**
- D. Use Oracle Real Application Cluster (RAC) databases on Bare Metal Solution for Oracle.

**Answer: C**

Explanation:

<https://cloud.google.com/spanner/docs/autoscaling-overview>

1. CloudSQL max out at 64TB, so unable to hold 100TB of data. [https://cloud.google.com/sql/docs/quota#metrics\\_collection\\_limit](https://cloud.google.com/sql/docs/quota#metrics_collection_limit)
2. Scale is done manually on SQL Cloud

### NEW QUESTION # 38

.....

There are some education platforms in the market for college students or just for the use of office workers, which limits the user groups of our Professional-Cloud-Database-Engineer study guide to a certain extent. And we have the difference compared with the other Professional-Cloud-Database-Engineer Quiz materials for our study materials have different learning segments for different audiences. We have three different versions of our Professional-Cloud-Database-Engineer exam questions on the formats: the PDF, the Software and the APP online.
