SAP Certified Associate - Security Administrator Sample Questions (Q46-Q51):

NEW QUESTION # 46

What are some security safeguards categories? Note: There are 3 correct answers to this question.

- A. Organizational
- B. Physical
- C. Financial
- D. Technical
- E. Access Control

Answer: B,D,E

NEW QUESTION # 47

What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Role maintenance reads applications from a catalog.
- B. Authorization defaults define role authorizations.
- C. Catalogs are assigned to role menus.
- D. Role maintenance reads applications from role menus.
- E. Manual role authorizations are supported in custom catalogs.

Answer: A,B,C

Explanation:

For SAP-developed roles in SAP S/4HANA Cloud Public Edition, the following rules apply:

- * Authorization Defaults (A):
- * Authorizations are pre-defined based on default settings, ensuring standardization.
- * Catalog-Driven Maintenance (C):
- * Role maintenance fetches applications directly from catalogs, streamlining the process.
- * Catalog Assignment (D):
- * Business catalogs are assigned to role menus to define the apps and services users can access.

NEW QUESTION # 48

What happens to data within SAP Enterprise Threat Detection during the aggregation process? Note: There are 3 correct answers to this question.

- A. It is pseudonymized.
- B. It is normalized.
- C. It is enriched.
- D. It is categorized.
- E. It is prioritized.

Answer: A,B,C

NEW QUESTION # 49

Which of the following user types are excluded from some general password-related rules, such as password validity or initial password? Note: There are 2 correct answers to this question.

- A. Communication
- B. Dialog
- C. Service
- D. System

Answer: C,D

Explanation:

- * Context: Password rules, such as validity and initial password requirements, do not apply to certain technical user types.
- * Solution Explanation:
- * System Users: Excluded due to their non-interactive nature.
- * Service Users: Excluded as they are designed for shared usage and system integration.

SAP Security References:

- * SAP User Types and Password Policies Documentation
- * SAP Help Portal: User Management Guide

NEW QUESTION # 50

What does a status text value of "Old" mean during the maintenance of authorizations for an existing role?

- A. Field values have not been changed.
- **B. Field values were unchanged and no new authorization was added.**
- C. Field values were changed as a result of the merge process.
- D. The field delivered with content was changed but the old value was retained.

Answer: B

Explanation:

In SAP role maintenance, a status text value of "Old" indicates that the field values for an authorization in an existing role were unchanged and no new authorizations were added. This status appears during PFCG role maintenance when comparing or updating authorizations, showing that the authorization object or field values have not been modified since the last maintenance and no additional permissions have been included. It reflects a stable state, ensuring that the role's existing permissions remain intact without unintended changes.

Option A is less precise, as it does not address the absence of new authorizations. Option B describes a scenario where changes were made but reverted, which is not "Old." Option C relates to merged authorizations, not the "Old" status. The "Old" status helps administrators confirm that no updates were applied, supporting consistent role management and preventing accidental modifications during maintenance in SAP systems.

NEW QUESTION # 51

.....

We can claim that the quality of our C-SEC-2405 exam questions is the best and we are famous as a brand in the market for some advantages. Firstly, the content of our C-SEC-2405 study materials is approved by the most distinguished professionals who are devoting themselves in the field for years.
