Fügen Sie SAP C-THR92-2505 Fragen Und Antworten von EchteFrage in den Warenkorb hinzu. EchteFrage bietet Ihnen rund um die Uhr Online-Service.

### SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting C-THR92-2505 Prüfungsfragen mit Lösungen (Q34-Q39):

#### 34. Frage

In Detailed Reporting, what functionality can be used in a calculated column? Note; There are 2 correct answers to this question.

- A. If/Then/Else statement
- **B. Average**
- **C. Concatenation**
- D. Data type conversion

**Antwort: B,C**

Begründung:

- \* Concatenation (A):
- \* Calculated columns support concatenating text fields to create combined values (e.g., "First Name + Last Name").
- \* Average (C):
- \* Aggregating numerical data (e.g., computing the average of a numeric field) is supported in calculated columns.

#### 35. Frage

Which are valid destinations of a scheduled Report Distributor bundle? Note; There are 3 correct answers to this question.

- A. Run Offline
- B. Home Page
- C. E-Mail
- D. Notification
- E. FTP

**Antwort: A,C,E**

Begründung:

In SAP SuccessFactors Report Distributor, scheduled bundles are used to deliver reports to predefined destinations. The valid destinations include:

- \* Run Offline (C):
  - \* This option allows reports to be generated and stored in the "My Jobs" section of the user who scheduled the report.
  - \* It is particularly useful for large reports that take time to generate.
- \* FTP (D):
  - \* Reports can be sent directly to an external server using FTP (File Transfer Protocol).
  - \* This requires configuring FTP server details in the system before scheduling the bundle.
- \* E-Mail (E):
  - \* Reports can be sent to recipients via email as attachments.
  - \* You need to specify valid email addresses during report scheduling.

### 36. Frage

You are working with nested labels on your instance in Report Center.

How do you configure the labels as displayed in the screenshot? Note: There are 2 correct answers to this question.

- A. Edit the Recruiting label in Manage Labels.
- B. Set "Nest label in," to Recruiting.
- C. Edit the Talent Management label in Manage Labels.
- D. Set "Nest label in," to Talent Management.

**Antwort: A,D**

Begründung:

- \* Set "Nest Label In" to Talent Management (B):
  - \* To organize nested labels effectively, you need to set the parent label, such as "Talent Management," for the nested hierarchy.
- \* Edit the Recruiting Label in Manage Labels (D):
  - \* You can adjust the nested label under "Recruiting" to align it under the correct parent category.

### 37. Frage

In a live data query, what are user-prompted filter types? Note: There are 2 correct answers to this question.

- A. Dynamic
- B. People Scope
- C. Runtime
- D. Filter Groups

**Antwort: B,C**

Begründung:

\* Runtime Filters (A):

\* These are filters that the user is prompted to set when executing a report. The user can define filter criteria dynamically at runtime.

\* People Scope (D):

\* This filter type allows reports to be filtered based on groups or populations defined in the user's permissions, such as specific departments or locations.

### 38. Frage

You are building a performance report with the Story report type. In reviewing the Performance Management schema, you notice that the 2019 Performance Review Table is listed in the Available Data section. You begin the query by adding the Basic User Information table from the User schema. You notice that the 2019 Performance Review Table is NO longer listed in the Available Data section. Why is the 2019 Performance Review table NOT in the list?

- A. Only related or joined tables appear as available.
- B. The table does NOT have a Report Object Configuration Entity record.
- C. You do NOT have the data access permission to the schema.
- D. You do NOT have RBP permission to the fields of the table.

**Antwort: A**

Begründung:

\* Schema and Table Relationships

\* In SAP SuccessFactors Story Reporting, tables are only displayed in the Available Data section if they have a direct relationship or join with the selected starting table (in this case, Basic User Information).

\* Why the 2019 Performance Review Table is Missing

\* Since the Basic User Information table is selected, only tables directly related to it will appear.

The 2019 Performance Review Table is likely not joined directly to the User schema.

\* Why Other Options are Incorrect

\* B (No Report Object Configuration Entity record): The table is present in the schema, so it must have a valid ROCE record.

\* C (No RBP permission): This would prevent any access to the table but does not explain its absence from the Available Data section.

\* D (No data access permission): This would restrict data access, not the visibility of the table.
