NEW QUESTION # 283

What are two prerequisites when creating host configuration for NFS client? (Choose two.)

- A. Subnet access
- **B. Network Address**
- C. Tenant information
- **D. Hostname**

Answer: B,D

Explanation:

Host configuration is the process of defining the host properties and access permissions for a host that connects to the Dell Unity XT system. For NFS clients, the host configuration requires two prerequisites:

* Network Address: The network address is the IP address or the subnet mask of the NFS client that identifies the host on the network. The network address is used to register the host on the Dell Unity XT system and to grant access to the NFS filesystems.

* Hostname: The hostname is the name of the NFS client that is resolved by the DNS server or the local hosts file. The hostname is used to display the host information on the Unisphere UI and to enable host monitoring and alerting.
