

FCP_FSA_AD-5.0 Unterlagen mit echte Prüfungsfragen der Fortinet Zertifizierung

Certification	Requirements	Courses and Exams	Recertification
FORTINET CERTIFIED FUNDAMENTALS Cybersecurity	1 Core Course + 1 Elective Course within 2 years	<ul style="list-style-type: none"> ■ Core ■ Elective ■ Introduction to the Threat Landscape ■ Getting Started in Cybersecurity ■ Technical Introduction to Cybersecurity (course time includes quizzes) 	Complete one core and one elective course.
FORTINET CERTIFIED ASSOCIATE Cybersecurity	1 Core Course and Exam	<ul style="list-style-type: none"> ■ FortiGate Operator 	Complete the FortiGate Operator course and pass the exam.
Achieving the FCA certification recertifies your FCP if it is still active.			
FORTINET CERTIFIED PROFESSIONAL Network Security	1 Core Exam + 1 Elective Exam within 2 years	<ul style="list-style-type: none"> ■ FortiGate ■ FortiManager ■ FortiClient EMS ■ FortiAnalyzer Administrator ■ Secure Wireless LANs ■ FortiAuthenticator ■ FortiSwitch ■ FortiADC 	To renew your FCP in Network Security certification, you must pass one core exam and one elective exam within two years of each other to earn active status. If your FCP certification is still active, passing the core exam or one elective exam for the FCSS in Network Security certification will renew it for two years from the date the FCSS exam was passed.
FORTINET CERTIFIED PROFESSIONAL Public Cloud Security	1 Core Exam + 1 Elective Exam within 2 years	<ul style="list-style-type: none"> ■ Cloud Security for AWS ■ Cloud Security for Azure ■ FortiGate ■ FortiMail ■ FortiWeb 	To renew your FCP in Public Cloud Security certification, you must pass one core exam and one elective exam within two years of each other to earn active status. If your FCP certification is still active, passing the core exam for the FCSS in Public Cloud Security certification will renew it for two years from the date the FCSS exam was passed.
FORTINET CERTIFIED PROFESSIONAL Security Operations	2 Elective Exams within 2 years	<ul style="list-style-type: none"> ■ FortiGate ■ FortiEDR ■ FortiSEM ■ FortiAnalyzer Analyst ■ FortiSD-WAN 	To renew your FCP in Security Operations certification, you must pass two elective exams within two years of each other to earn active status. If your FCP certification is still active, passing the core exam for the FCSS in Security Operations certification will renew it for two years from the date the exam FCSS was passed.
Passing any of the FCP exams recertifies your FCP and FCA certifications if they are still active.			
FORTINET CERTIFIED SOLUTION SPECIALIST Network Security	1 Core Exam + 1 Elective Exam within 2 years	<ul style="list-style-type: none"> ■ Enterprise Firewall ■ SD-WAN ■ LAN Edge ■ Network Security Support Engineer 	To renew your FCSS in Network Security certification, you must pass one core exam and one elective exam. Passing any FCSS in Network Security exam will renew your FCP in Network Security.
FORTINET CERTIFIED SOLUTION SPECIALIST Public Cloud Security	1 Core Exam	<ul style="list-style-type: none"> ■ Public Cloud Security 	To renew your FCSS in Public Cloud Security certification, you must pass the Public Cloud Security exam. Passing your FCSS in Public Cloud Security will renew your FCP in Public Cloud Security.
FORTINET CERTIFIED SOLUTION SPECIALIST Security Operations	1 Core Exam	<ul style="list-style-type: none"> ■ Advanced Analytics 	To renew your FCSS in Security Operations certification, you must pass the Advanced Analytics exam. Passing your FCSS in Security Operations will renew your FCP in Security Operations.
FORTINET CERTIFIED SOLUTION SPECIALIST Zero Trust Access	1 Core Exam	<ul style="list-style-type: none"> ■ OT Security 	To renew your FCSS in OT Security certification, you must pass the OT Security exam.
FORTINET CERTIFIED SOLUTION SPECIALIST Zero Trust Access	1 Core Exam	<ul style="list-style-type: none"> ■ ZTA 	To renew your FCSS in Zero Trust Access certification, you must pass the Zero Trust Access exam.
Passing any core FCSS exams recertifies your FCP and FCA certifications if they are still active. FCP, FCA, FCP and FCSS certifications are valid for two years from the certification grant date.			
FORTINET CERTIFIED EXPERT Cybersecurity	2 Cores Exams: Practical no more than two years after written	<ul style="list-style-type: none"> ■ Written ■ Practical 	You can renew your FCX certification by taking the current FCX written exam as long as your certification has not expired. If your FCX certification has expired, you must take both the written and practical exam again.
Achieving or recertifying your FCX certification recertifies all your other Fortinet NSE certifications that are still active. FCX certification is valid for three years from the certification grant date.			

Wollen Sie gute Leistung in IT-Industrie haben und mehr professioneller anerkannt werden? Melden Sie sich bitte Fortinet FCP_FSA_AD-5.0 IT-Industrie an, um Ihre Fähigkeit zu entwickeln. Wir EchteFrage helfen Ihnen, den Wunsch zu erfüllen. Hier sind sehr professionelle Kenntnisse und starke Dumps über Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung, guten Service, die Ihr besseres Beherrschen der Kenntnisse realisieren und die Fortinet FCP_FSA_AD-5.0 Prüfung leichter bestehen und leichter Ihren Erfolg zu erreichen.

Sie können im Internet teilweise die Fragen und Antworten zur Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung von EchteFrage kostenlos als Probe heruntergeladen. Dann würden Sie finden, dass die Übungen von EchteFrage ist die umfassendsten und genau was, was Sie wollen.

Fortinet FCP_FSA_AD-5.0 Quiz - FCP_FSA_AD-5.0 Studienanleitung & FCP_FSA_AD-5.0 Trainingsmaterialien

Wenn Sie noch viel wertvolle Zeit und Energie für die Vorbereitung der Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung benutzen und nicht wissen, wie man mühlos und effizient die Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung bestehen kann, bieten jetzt EchteFrage Ihnen eine effektive Methode, um die Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung zu bestehen. Mit EchteFrage würden Sie bessere Resultate bei weniger Einsatz erzielen.

Fortinet FCP_FSA_AD-5.0 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> Integration: This domain explains how to integrate FortiSandbox within the Fortinet Security Fabric and with third-party tools, as well as identifying ATP deployments and resolving integration-related issues.
Thema 2	<ul style="list-style-type: none"> Deployment and system settings: This domain covers understanding FortiSandbox deployment within different stages of the Cyber Kill Chain, along with configuring system settings, high availability (HA) clusters, and troubleshooting system-related issues.
Thema 3	<ul style="list-style-type: none"> Results analysis: This section involves understanding common attack vectors, analyzing malware behavior, and interpreting scan job reports to assess threats and make informed security decisions.
Thema 4	<ul style="list-style-type: none"> Scanning and rating components: This section focuses on FortiSandbox scanning mechanisms, including scanning components, managing guest virtual machines, and configuring scan options to properly analyze and rate suspicious files.

Fortinet FCP - FortiSandbox 5.0 Administrator FCP_FSA_AD-5.0 Prüfungsfragen mit Lösungen (Q23-Q28):

23. Frage

You are asked to configure FortiSandbox to use one VM instance for multiple sequential scan jobs without shutting down the instance between each scan job submission. Which scan profile setting must you enable to achieve this? (Choose one answer)

- A. Adaptive VM scan
- **B. Pipeline mode**
- C. VM scan ratio
- D. Parallel VM scan

Antwort: B

Begründung:

From the Scanning and Rating Components lesson, the Study Guide explicitly states:

"The Pipeline Mode feature improves performance by allowing to scan multiple files, one at a time, without shutting down the VM instance after scanning each file."

"FortiSandbox will continue scanning files without shutting down the VM instance, as long as the VM status hasn't changed. If the VM status changes, then the VM instance will shut down and will be restored for the next job." This precisely matches the requirement - using one VM instance for multiple sequential scan jobs without shutting down between submissions. The other options serve different purposes:

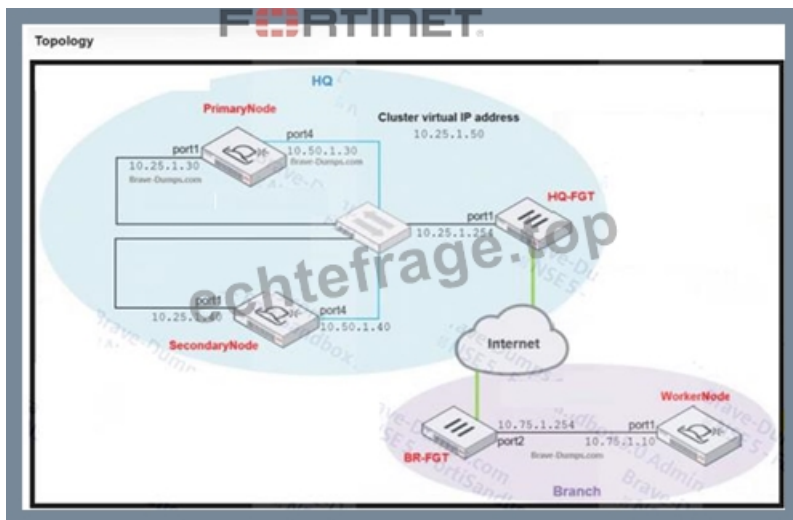

Adaptive Scan dynamically adjusts clone numbers

VM Scan Ratio controls the percentage of jobs scanned in a VM

Parallel VM Scan runs multiple VMs simultaneously for a single job

24. Frage

Refer to the exhibit.

Which command must you use to configure the worker node? (Choose one answer)

- A. `hc-worker -a -s10.25.1.50 -p<password>`
- B. `hc-worker -a -s10.25.1.30 -p<password>`
- C. `hc-worker -a -s10.50.1.30 -p<password>`
- D. `hc-worker -a -s10.75.1.254 -p<password>`

Antwort: A

Begründung:

From the High Availability and Management lesson, the Study Guide states:

"You must configure the HA group name, password, and the cluster virtual IP. The worker nodes provide load balancing. The primary node distributes scan jobs to the worker nodes."

"You must configure the HA group name, password, and the virtual IP only on the primary node... Devices will interact with the cluster using this virtual IP." From the exhibit topology:

Cluster Virtual IP address = 10.25.1.50

Primary Node port1 = 10.25.1.30

Secondary Node port1 = 10.25.1.40

Worker Node port1 = 10.75.1.10

The worker node must be configured to point to the Cluster Virtual IP (10.25.1.50), not the individual primary node IP. This is because worker nodes join the cluster by connecting to the cluster virtual IP address.

Therefore the correct command is: `hc-worker -a -s10.25.1.50 -p<password>`

25. Frage

You notice a recent file downloaded by some end stations is exhibiting malware behavior, however, on the sandbox the file is rated clean. After further investigation you determine that only end stations using the Opera browser are being affected. What must you do to prevent these infections? (Choose one answer)

- A. **Configure a custom VM to use the same browser as the exploited end stations.**
- B. Change the job queue priority to process web-based files first.
- C. Enable the STIX/TAXII Integration setting on FortiSandbox.
- D. Modify the scan profile to include the malware file type.

Antwort: A

Begründung:

The best answer is B. The Study Guide explains that under VM settings, "FortiSandbox has a Browser selection that allows you to choose which internet browser the VM instance will use. This helps to customize the test using an internet browser that more closely resembles the user's environment or just monitor if the test delivers different results." It also states that the default browser choices are Internet Explorer, Firefox, Chrome, and Edge. In addition, the guide says that "The VM images provided by Fortinet might not suit your needs... You can generate a custom VM that fits your organization's needs and upload it to FortiSandbox." Because only endpoints using Opera are affected, the clean verdict likely occurred because the sandbox environment does not accurately reproduce the exploited browser environment. The most effective fix is to make the sandbox environment match the real target environment more closely by using a custom VM with the same browser behavior as the affected endpoints. The other answers do

not address the root cause. STIX/TAXII is unrelated, changing the scan profile file type does not solve a browser-specific exploit path, and job queue priority affects order, not analysis fidelity. Therefore, the required action is to configure a custom VM to use the same browser as the exploited end stations.

26. Frage

To allow access to the FortiSandbox GUI the administrator must configure an IP address and a default gateway. Which two commands must the administrator use to accomplish this task? (Choose two answers)

- A. set api-port port1
- B. set default-gw <IP Address>
- C. set admin-port port1
- D. set port1-ip <IP address>

Antwort: B,D

Begründung:

From the Deployment and System Settings lesson, the Study Guide explicitly states:

"Initial port1 IP configuration must be performed from the console, using the commands shown on this slide. If your management computer is on a separate subnet from FortiSandbox, you must specify a gateway address using the commands shown on this slide."

The two required commands are:

set port1-ip <IP address> - to assign the IP address to port1 for GUI access
set default-gw <IP Address> - to configure the default gateway so the management computer can reach FortiSandbox from a different subnet
Option B (set api-port port1) is for API access configuration, and Option C (set admin-port port1) is not a valid FortiSandbox CLI command for this purpose.

27. Frage

A FortiSandbox VM has been deployed and has been functioning correctly for several months. Suddenly, the system begins rejecting file submissions with an error message indicating a licensing problem. How can you determine, using the CLI, if the license is still valid? (Choose one answer)

- A. hc-setting -l
- B. vm-license -l
- C. vm-status
- D. status

Antwort: D

Begründung:

From the Deployment and System Settings lesson, the Study Guide explicitly states:

"The status command shows information about the system, including firmware level, device serial number, disk usage, Windows VM status, states of the boot and data disks, and more. For VM appliances, it will also show the FortiSandbox license status." The key phrase is "For VM appliances, it will also show the FortiSandbox license status" - making the status command the correct choice for verifying license validity on a FortiSandbox VM deployment.

While vm-license -l shows installed Windows/Microsoft Office license keys, and vm-status shows guest VM image information, neither directly reports on the FortiSandbox appliance license validity. The status command is the definitive command for checking overall system and license status.

28. Frage

.....

Viele IT-Fachleute träumt von dem Fortinet FCP_FSA_AD-5.0 Zertifikat. Die Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung ist eine Prüfung, die IT-Fachkenntnisse und Erfahrungen eines Menschen testet. Um die Prüfung zu bestehen braucht man genügende Fachkenntnisse. Um diese Kenntnisse zu meistern muss man viel Zeit und Energie kosten. EchteFrage ist eine Website, die Ihnen viel Zeit und Energie erspart und die relevanten Kenntnisse zur Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung ergänzt. Wenn Sie Interesse an EchteFrage haben, können Sie im Internet teilweise die Fragen und Antworten zur Fortinet FCP_FSA_AD-5.0 Zertifizierungsprüfung von EchteFrage kostenlos als Probe herunterladen.
