Valid CDFOM Guide Files, New CDFOM Exam Questions

No doubt the Certified Data Center Facilities Operations Manager certification exam is one of the most difficult DumpsFree EXIN certification exams in the modern DumpsFree world. This CDFOM exam always gives a tough time to their candidates. It is hard to pass without in-depth CDFOM exam preparation. The DumpsFree understands this challenge and offers real, valid, and top-notch CDFOM Exam Dumps in three different formats. These formats are CDFOM PDF dumps files, desktop practice test software, and web-based practice test software.

EXIN CDFOM Exam Syllabus Topics:

Topic	Details
Topic 1	- Monitoring - Reporting - Control: Addresses performance oversight through monitoring, escalation procedures, reporting, and trend analysis.
Topic 2	Environmental Sustainability: Focuses on minimizing environmental impact through power efficiency, waste management, and renewable energy integration.
Topic 3	Project Management: Covers project execution including management principles, organizational structures, and project phases.
Topic 4	Managing Physical Security: Deals with facility protection through security policies, staff management, incident handling, and security audits.

Topic 5	• Governance, Risk and Compliance: Covers management framework including compliance, risk management, document control, financial management, and vendor oversight.
Topic 6	• Facilities Management: Covers infrastructure maintenance including maintenance programs, outsourcing, contracts, scheduling, spare parts, and contamination control.
Topic 7	• The Data Centre Organization: Addresses organizational structure, roles and responsibilities, shift management, performance management, training, career development, and succession planning.

EXIN certification CDFOM the latest exam questions and answers

The DumpsFree CDFOM exam questions are real, valid, and updated CDFOM exam questions that assist you in exam preparation and finally, you will be ready to pass the challenging CDFOM exam with good scores. The DumpsFree CDFOM exam questions are designed and verified by experienced and certified EXIN CDFOM Exam trainers. They check and verified the answers of all CDFOM exam questions thoroughly and ensure the top standard of CDFOM exam questions.

EXIN Certified Data Center Facilities Operations Manager Sample Questions (Q44-Q49):

NEW QUESTION # 44
Of the below, which is a power efficiency indicator?

- A. nil, w
- B. PUE
- C. uw
- D. CPU

Answer: B

Explanation:
Power Usage Effectiveness (PUE) is the most widely recognized and adopted energy efficiency indicator for data centers globally and is emphasized heavily within the EPI sustainability framework. PUE measures how effectively a data center uses power and is calculated by dividing the Total Facility Power by the IT Equipment Power. The purpose of this indicator is to show how much of the energy consumed by the facility actually reaches IT equipment (servers, storage, network gear) versus how much is consumed by support infrastructure such as cooling, UPS losses, lighting, and building systems.
A lower PUE indicates a more efficient data center, with values approaching 1.0 representing ideal efficiency-where nearly all consumed power is being used for IT load. PUE is essential for benchmarking, energy-saving initiatives, identifying efficiency improvement opportunities, and measuring the success of infrastructure optimization projects. The other options listed-nil, w; CPU; and uw-are irrelevant to facility energy efficiency metrics. CPU relates to computing processors, not facility efficiency; the others are incorrect units or meaningless terms in this context.
Thus, PUE is the correct and industry-standard power efficiency indicator.

NEW QUESTION # 45
In document management, what is the objective of the publication process?

- A. To archive documents for easy retrieval
- B. To create a document following the rules of the document management system
- C. To comply with the document management system requirements
- D. To ensure the correct version is available in all required locations

Answer: D

Explanation:
The publication process in document management ensures that:

* The correct, approved version of a document is released.
* It is distributed to all required locations (physical or digital).
* Outdated versions are removed from circulation.
* Staff always use the correct operating procedures and guidelines.
Why other options are incorrect:
* A: Compliance is a by-product, not the objective.
* B: Creation happens before publication.
* D: Archiving is part of the document retirement process, not publication.
Thus, C is the correct answer.
EPI DCFOM-Aligned Reference Concepts (Paraphrased)
* Publication ensures the latest controlled documents are available where needed.
* Document control prevents use of outdated or incorrect procedures.

NEW QUESTION # 46
What is defined by the Recovery Time Objective (RTO)?

- A. The prioritized timeframes for resuming disrupted activities at a specified minimum acceptable capacity
- B. The minimum level of service required to be operational again
- C. The maximum age of the data to be restored in case of a disaster
- D. The time within which the impacts of not resuming activities would become unacceptable to the organization

Answer: A

NEW QUESTION # 47
The needs analysis has been completed and the data center organization is tasked with the capability assessment.
Which of the below is a mandatory activity as part of the capability assessment?

- A. Determine the availability requirements
- B. Identify applicable safety requirements
- C. Review the security needs
- D. Create inventory of skills, knowledge and capacity

Answer: D

Explanation:
A capability assessment evaluates whether the data center organization is capable of delivering the defined services.
The mandatory activity is to:
Create an inventory of skills, knowledge, and capacity of the workforce and resources.
This includes:
* Current staff technical skills
* Certifications
* Experience
* Availability (capacity)
* Backup and contingency roles
* Alignment with service demands and SLAs
Why other options are incorrect:
* A: Security needs are part of service requirements, not capability assessment.
* C: Availability requirements are determined during needs analysis, not capability assessment.
* D: Safety requirements belong to statutory and compliance analysis, not capability assessment.
Thus, B is the correct answer.
EPI DCFOM-Aligned Reference Concepts (Paraphrased)
* Capability assessment requires determining skills, competencies, and available capacity.
* Ensures the organization can meet defined services and SLAs.

NEW QUESTION # 48
The data center is conducting a needs analysis.
Which of the below is an activity of the needs analysis?

- A. Identifying monitoring requirements
- B. Identifying the current usage for power and cooling
- C. Identifying the operating hours for the service
- D. Identifying the required headcount to operate the service

Answer: C

Explanation:
Needs Analysis determines what the customer or business requires from a service.
This includes:
* Required service hours / operating hours
* Availability expectations
* Business functional requirements
* Legal and compliance requirements
* Physical infrastructure needs (power, cooling, space)
* Performance and capacity needs
Identifying operating hours is a core part of defining service requirements.
Why other options are incorrect:
* B: Current resource usage is part of infrastructure assessment, not needs analysis.
* C: Staffing is part of capability assessment.
* D: Monitoring requirements come after service definition and design.
Thus, A is correct.
EPI DCFOM-Aligned Reference Concepts (Paraphrased)
* Needs analysis determines service operation hours, business needs, and requirements.
* It precedes capability assessment and service design.
