100% Pass Network Appliance - NS0-185 –Trustable Latest Test Question

Based on the credibility in this industry, our NS0-185 study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. The system of NS0-185 test guide will keep track of your learning progress in the whole course. Therefore, you can have 100% confidence in our NS0-185 exam guide. According to our overall evaluation and research, seldom do we have cases that customers fail the NS0-185 Exam after using our study materials. But to relieve your doubts about failure in the test, we guarantee you a full refund from our company by virtue of the related proof of your report card. Of course you can freely change another NS0-185 exam guide to prepare for the next exam. Generally speaking, our company takes account of every client's difficulties with fitting solutions.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q110-Q115):

NEW QUESTION # 110

After installation of a new ONTAP cluster, you experience a problem. You successfully create a support case on the NetApp Support site. The customer asks you how to view the status of the case.

Referring to the exhibit, which two steps would allow the customer to accomplish this task? (Choose two.)

- A. Open <https://support.netapp.com>, using the partner credentials.
- B. Open My Cases, and select the 41747189 case number.

- C. Open <https://support.netapp.com>, using the customer credentials.
- D. Open My Cases, and select Create a Case.

Answer: B,C

Explanation:

After a support case has been created, NetApp's support workflow requires that case visibility and status tracking be performed through the NetApp Support site using the customer's credentials, not partner credentials. Customer credentials ensure proper access to systems registered under the customer's support account, including entitlement visibility, serial numbers, and case ownership.

Partner credentials may not have permission to view customer-owned cases unless explicitly granted.

Once logged in, the My Cases section of the support site provides a centralized dashboard showing all active and historical cases associated with the customer's company. From this view, cases are listed with details such as case number, product, symptom, status, and last updated timestamp. Selecting the specific case number (in this scenario, 41747189) opens the detailed case view, where the customer can monitor progress, read engineer updates, upload logs, and add comments.

The option "Create a Case" is used only when opening a new case and does not allow viewing the status of an existing case.

Therefore, it does not satisfy the requirement. Using partner credentials is also incorrect because case tracking is intended to be performed by the customer organization that owns the system and support entitlement.

Thus, the correct steps are to log in using customer credentials and open My Cases and select the existing case number.

NEW QUESTION # 111

A customer wants to replace their ONTAP cluster CN1610 switches with Cisco Nexus 3132Q-V switches.

They want to perform a non-disruptive upgrade.

Referring to the exhibit, which cable will be required to non-disruptively migrate to the new switches?

- A. a 40GbE QSFP+ to 4x10GbE SFP+ cable
- B. a 10GbE SFP+ to SFP+ cable
- C. a 100GbE QSFP28+ to 4x25GbE SFP28+ cable
- D. a 40GbE QSFP+ to QSFP+ cable

Answer: D

Explanation:

The CN1610 uses 10GbE SFP+, while the Cisco Nexus 3132Q-V provides 40GbE QSFP+ cluster ports. For non-disruptive migration, the interconnect must operate at 40GbE without breakout. A QSFP+ to QSFP+

40GbE cable supports this requirement and is validated for cluster interconnect traffic. Breakout cables would change port topology and are not used during NDU migration.

NEW QUESTION # 112

You have a 4-node FAS8060 cluster. You use the vol move command to relocate a volume from an aggregate on node 1 to an aggregate on node 4.

In this scenario, which network is used for the traffic being relocated?

- A. the cluster interconnect
- B. the intercluster network
- C. the HA interconnect
- D. the node management network

Answer: A

NEW QUESTION # 113

While you are introducing the customer to the NetApp Support website, they ask you to ensure that the new ONTAP storage array is covered by support before you complete the knowledge transfer procedure.

Referring to the exhibit, which two widgets would you select to accomplish this task? (Choose two.)

- A. Active IQ
- B. Product Support
- C. Contracts and Warranties

- **D. Systems**

Answer: C,D

NEW QUESTION # 114

Data ONTAP 9 supports which three features? (Choose three.)

- **A. SnapMirror**
- **B. SMB 3.0**
- **C. Infinite Volumes**
- D. NFSv2

Answer: A,B,C

NEW QUESTION # 115

.....

Our NS0-185 exam materials are formally designed for the exam. With its help, you don't have to worry about the exam any more for it almost guarantees you get what you want. If you think I'm exaggerating, you might as well take a look at our NS0-185 Actual Exam. With a high pass rate as 98% to 100%, you will be bound to pass the exam. And our NS0-185 training questions are popular in the market. We believe you will make the right choice.
