New C_BCBDC_2505 Exam Camp - C_BCBDC_2505 Exam Objectives

In order to meet the requirements of our customers, Our C_BCBDC_2505 test questions carefully designed the automatic correcting system for customers. It is known to us that practicing the incorrect questions is very important for everyone, so our C_BCBDC_2505 exam question provide the automatic correcting system to help customers understand and correct the errors. If you are finding a study material in order to get away from your exam, you can spend little time to know about our C_BCBDC_2505 Test Torrent, it must suit for you.

SAP C_BCBDC_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SAP Business Data Cloud: This section of the exam measures the skills of Data Analysts and covers core concepts of the SAP Business Data Cloud. Candidates are expected to understand its key components, integration mechanisms, and how it functions as a foundation for unified data management across SAP and non-SAP environments. The focus is on enabling data connectivity and providing governed access to data across the enterprise.
Topic 2	<ul style="list-style-type: none">SAP Datasphere: This section of the exam measures the skills of Solution Consultants and covers a comprehensive understanding of SAP Datasphere. Candidates should demonstrate knowledge of data modeling, transformation, and harmonization using SAP Datasphere tools. It evaluates how well they can work with data layer structuring, semantic modeling, and integration to support real-time data access for various business applications.

Topic 3	<ul style="list-style-type: none"> • SAP Analytics Cloud: This section of the exam measures the skills of Data Analysts and covers the use of SAP Analytics Cloud in data visualization, story building, and dashboard creation. Candidates should be familiar with its planning and predictive capabilities, along with how to utilize data insights to drive business decision-making. It also includes managing user access and collaborating through shared analytics assets.

SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q68-Q73):

NEW QUESTION # 68

What source system can you connect to with an SAP Analytics Cloud live connection that is provided by SAP BDC?

- A. SAP Datasphere
- B. SAP SuccessFactors
- C. SAP ERP
- D. SAP Business ByDesign Analytics

Answer: A

Explanation:

Within the context of SAP Business Data Cloud (BDC), the primary and most central source system for an SAP Analytics Cloud (SAC) live connection is SAP Datasphere. SAP Datasphere serves as the comprehensive data foundation for SAP's business data fabric, integrating data from various SAP and non-SAP sources, and providing a harmonized, semantically rich data layer. SAP BDC is built upon and extends the capabilities of SAP Datasphere, making it the strategic hub for analytics and data management. Therefore, to ensure data consistency, governance, and real-time access to the integrated and harmonized business data managed within the BDC ecosystem, SAP Datasphere is the recommended and primary live connection source for SAC. While SAC can connect to other SAP systems like S/4HANA or BW, within the specific architecture of SAP BDC, SAP Datasphere plays the pivotal role as the integrated data platform.

NEW QUESTION # 69

In SAP Analytics Cloud, into which elements can you import data?

There are 3 correct answers to this question.

Response:

- A. Models
- B. Datasets
- C. Stories
- D. Dimensions

Answer: A,B,D

NEW QUESTION # 70

What are the some purposes of SAP Business Data Cloud?

There are 2 correct answers to this question.

Response:

- A. To act solely as a data storage solution without analytics capabilities
- B. To provide mainly manual data integration scenarios
- C. To provide foundational services for data and analytics scenarios
- D. To provide a homogeneous system landscape for data, functions, and use cases

Answer: C,D

NEW QUESTION # 71

An international bank wants to provide regional analysts with business-ready data models without granting direct access to raw data sources. What features should be implemented?

There are 3 correct answers to this question.

Response:

- A. Data Catalog to organize and tag shared models
- B. Direct SQL access to source systems
- C. Business Content Import from SAP NetWeaver
- D. Role-based permissions to restrict access
- E. Business Builder to define and expose semantic views

Answer: A,D,E

NEW QUESTION # 72

What do you use to write data from a local table in SAP Datasphere to an outbound target?

- A. Transformation Flow
- B. Replication Flow
- C. Data Flow
- D. CSN Export

Answer: C

Explanation:

To write data from a local table in SAP Datasphere to an outbound target, you primarily use a Data Flow. A Data Flow in SAP Datasphere is a powerful tool designed for comprehensive data integration and transformation. It allows you to extract data from various sources (including local tables within Datasphere), perform various transformations (like joins, aggregations, filtering, scripting), and then load the processed data into a specified target. This target can be another local table, a remote table, or an outbound target like an external database or a file system. While a Replication Flow (C) is used for ingesting data into Datasphere, and a Transformation Flow (A) is not a standalone artifact for outbound writes (often part of a Data Flow), the Data Flow provides the complete framework for extracting, transforming, and loading data, including sending it to external destinations.

NEW QUESTION # 73

.....

With PassCollection's help, you do not need to spend a lot of money to participate in related cram or spend a lot of time and effort to review the relevant knowledge, but can easily pass the exam. Simulation test software of SAP C_BCBDC_2505 Exam is developed by PassCollection's research of previous real exams. PassCollection's SAP C_BCBDC_2505 exam practice questions have a lot of similarities with the real exam practice questions.
