These JN0-336 exam questions braindumps are designed in a way that makes it very simple for the candidates. Each and every JN0-336 topic is elaborated with examples clearly. Use PrepAwayExam top rate Juniper JN0-336 Exam Testing Tool for making your success possible. JN0-336 exam preparation is a hard subject. Plenty of concepts get mixed up together due to which student feel difficult to identify them. There is no similar misconception in JN0-336 Dumps because we have made it more interactive for you. The candidates who are less skilled may feel difficult to understand the JN0-336 questions can take help from these braindumps. The tough topics of JN0-336 certification have been further made easy with examples, simulations and graphs. Candidates can avail the opportunity of demo of free JN0-336 dumps.

If you care about your certification JN0-336 exams, our JN0-336 test prep materials will be your best select. We provide free demo of our JN0-336 training materials for your downloading before purchasing complete our products. Demo questions are the part of the complete JN0-336 test prep and you can see our high quality from that. After payment you can receive our complete JN0-336 Exam Guide soon in about 5 to 10 minutes. And we offer you free updates for JN0-336 learning guide for one year. Stop to hesitate, just go and choose our JN0-336 exam questions!

Quiz Juniper - JN0-336 - Perfect Examcollection Security, Specialist (JNCIS-SEC) Questions Answers

In the era of information explosion, people are more longing for knowledge, which bring up people with ability by changing their thirst for knowledge into initiative and "want me to learn" into "I want to learn". As a result thousands of people put a premium on obtaining JN0-336 certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar worker, getting a JN0-336 Certification may be draining. Therefore, choosing a proper JN0-336 study materials can pave the path for you which is also conductive to gain the certification efficiently.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q75-Q80):

NEW QUESTION # 75

Exhibit

Referring to the SRX Series flow module diagram shown in the exhibit, where is application security processed?

- A. Screens
- B. Forwarding Lookup
- C. Services ALGs

- D. Security Policy

Answer: C

NEW QUESTION # 76

Which two features are configurable on Juniper Secure Analytics (JSA) to ensure that alerts are triggered when matching certain criteria? (Choose two.)

- A. events
- B. tests
- C. assets
- D. building blocks

Answer: B,D

Explanation:

Building blocks in JSA are reusable components that define specific attributes or behaviors in the network traffic. They can be used to create complex criteria for alerts. By combining multiple building blocks, you can specify detailed conditions under which alerts should be triggered, such as combinations of events or specific sequences of actions within the network.

Tests in JSA are conditions or rules that analyze log or flow data to detect unusual or malicious activity.

You can configure tests to evaluate the data against predefined criteria, which, when met, will trigger alerts. These tests are essential for identifying potential security incidents and ensuring that relevant alerts are issued in a timely manner.

NEW QUESTION # 77

You want to show tabular data for operational mode commands. In this scenario, which logging parameter will provide this function?

- A. session-init
- B. permit
- C. session-close
- D. count

Answer: D

Explanation:

The logging parameter that will provide the function of showing tabular data for operational mode commands is count. The count parameter displays the number of packets and bytes that match a security policy and the action taken by the policy. The count parameter can be used with the show security policies hit-count command to display the policy counters in a tabular format. The count parameter can also be used with the show security flow session command to display the session counters in a tabular format. Reference: = show security policies hit-count, show security flow session

NEW QUESTION # 78

Which two statements about SRX chassis clustering are correct? (Choose two.)

- A. SRX chassis clustering supports active/active for the control plane.
- B. SRX chassis clustering supports active/passive and active/active for the data plane.
- C. SRX chassis clustering only supports active/passive for the data plane.
- D. SRX chassis clustering supports active/passive for the control plane.

Answer: B,D

Explanation:

SRX chassis clustering allows for both active/passive and active/active configurations for the data plane.

In an active/passive setup, one node is active (handling traffic) while the other remains passive (idle and waiting to take over in case of failure). In an active/active setup, both nodes can handle traffic simultaneously, distributing different traffic flows or services between them for load balancing and redundancy.

For the control plane, SRX chassis clustering typically operates in an active/passive mode. This means one node actively handles the control plane responsibilities, such as managing routing tables and maintaining sessions, while the other stands by ready to take over

these tasks if the active node fails.

NEW QUESTION # 79

Which two statements are correct about App Track? (Choose two.)

- A. App Track can only be configured in the main logical system on an SRX Series device.
- B. App Track identifies and blocks traffic flows that might be malicious regardless of the ports being used.
- C. App Track collects traffic flow information including byte, packet, and duration statistics.
- D. App Track can be configured for any defined logical system on an SRX Series device.

Answer: C,D

Explanation:

AppTrack is a feature that allows you to monitor and analyze the application traffic on your SRX Series device. It can be configured for any defined logical system, which is a virtual router or switch within a physical device. AppTrack collects statistics such as bytes, packets, and duration for each application flow and displays them in reports or logs. AppTrack does not identify or block malicious traffic, that is the function of AppSecure or IDP/IPS. Reference: = JNCIS-SEC Certification, Open Learning - Security, Specialist (JNCIS-SEC), Application Security Theory

NEW QUESTION # 80

.....

The second form is Security, Specialist (JNCIS-SEC) (JN0-336) web-based practice test which can be accessed through online browsing. The JN0-336 web-based practice test is supported by browsers like Firefox, Microsoft Edge, Juniper Chrome, and Safari. You don't need to install any plugins or software to attempt the JN0-336 web-based practice test. This online Juniper JN0-336 exam is also compatible with all operating systems.
