

CLT Prüfungs - CLT Deutsche Prüfungsfragen

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION 33

Which of the following statements about a Segment Routing SID is FALSE?

- A. Adjacency-SID values are taken from the SRGB configured for the routing protocol.
- B. An Adjacency-SID does not have to be configured.
- C. A Node-SID is usually associated with a router's system interface.
- D. A Prefix-SID can be configured directly as a label value or indirectly as an index.

Answer: B

Explanation:

An Adjacency-SID does not have to be configured; this statement is not true. An Adjacency-SID is associated with a neighbor router, it is used to identify an adjacency between two routers. An Adjacency-SID must be configured to identify the adjacency.

NEW QUESTION 34

Examine the exhibit.

ITZert ist eine Website, die den Traum der IT-Fachleute erfüllen kann. ITZert bietet den Kandidaten die gewünschte Materialien, mit den Sie die Prüfung bestehen können. Machen Sie sich noch Sorgen um die MSSC CLT Zertifizierungsprüfung? Haben Sie schon mal gedacht, die relevanten Kurse von ITZert zu kaufen? Die Schulungsunterlagen von ITZert wird Ihnen helfen, die Prüfung effizienter zu bestehen. Die Fragen von ITZert sind den realen Prüfungsfragen ähnlich, fast mit ihnen identisch. Mit den genauen Prüfungsfragen und Antworten zur MSSC CLT Zertifizierungsprüfung können Sie die Prüfung leicht bestehen.

MSSC CLT Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"> • Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.
Thema 2	<ul style="list-style-type: none"> • Packaging and Shipping: This section of the exam measures skills of the Certified Logistics Technician and covers the necessary techniques for securing goods safely for transit, selecting the right containers, and correctly labeling them for outbound transportation.

Thema 3	<ul style="list-style-type: none"> • Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.
Thema 4	<ul style="list-style-type: none"> • Inventory Control: This section of the exam measures skills of the Certified Logistics Technician and covers the methods used to track stock levels, perform cycle counts, and reconcile inventory discrepancies to maintain high accuracy and prevent shortages or overstock.
Thema 5	<ul style="list-style-type: none"> • Teamwork and Good Workplace Conduct to Solve Problems: This section of the exam measures skills of the Certified Logistics Associate and covers the professional behaviors and collaborative techniques needed to work effectively with colleagues and resolve common operational issues as a team.
Thema 6	<ul style="list-style-type: none"> • The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.
Thema 7	<ul style="list-style-type: none"> • Order Processing: This section of the exam measures skills of the Certified Logistics Technician and covers the steps required to accurately manage and fulfill customer requests, including picking and preparing the correct items for dispatch.
Thema 8	<ul style="list-style-type: none"> • Evaluation of Transportation Modes (Truck, Air, Rail, Water): This section of the exam measures skills of the Certified Logistics Technician and covers the ability to compare and select the most appropriate transportation methods based on factors like cost, speed, and the nature of the freight being moved.
Thema 9	<ul style="list-style-type: none"> • Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.
Thema 10	<ul style="list-style-type: none"> • Dispatch and Tracking Operations: This section of the exam measures skills of the Certified Logistics Technician and covers the procedures for organizing shipments, coordinating carriers, and monitoring the progress of goods in transit until they reach their destination.
Thema 11	<ul style="list-style-type: none"> • Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.
Thema 12	<ul style="list-style-type: none"> • Safe Material Handling and Equipment Operation: This section of the exam measures skills of the Certified Logistics Associate and covers the proper methods for safely moving materials and the correct operation of common handling equipment like forklifts and pallet jacks.
Thema 13	<ul style="list-style-type: none"> • Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.
Thema 14	<ul style="list-style-type: none"> • Quality Control Principles: This section of the exam measures skills of the Certified Logistics Associate and covers the fundamental concepts used to monitor and ensure that goods and processes meet required quality standards and customer expectations.

CLT Deutsche Prüfungsfragen & CLT Exam

Möchten Sie Ihre Freizeit ausnützen, um die Zertifizierung der MSSC CLT zu erwerben? Mit der PDF Version von MSSC CLT Prüfungsunterlagen, die von uns geboten wird, können Sie irgendwann und irgendwo lesen. Außerdem bieten wir Online Test Engine und Simulierte-Software. Sie sind auch inhaltsreich und haben ihre eingene Überlegenheit. Sie können Demos unterschiedlicher Versionen von MSSC CLT gratis probieren und die geeignetste Version finden!

MSSC Certified Logistics Technician (CLT) 4.0 CLT Prüfungsfragen mit Lösungen (Q22-Q27):

22. Frage

An outbound order must be checked for all of the following EXCEPT

- A. customer address
- B. item and count accuracy
- C. correct dock for loading
- D. damaged condition

Antwort: C

Begründung:

In the MSSC Certified Logistics Technician (CLT 4.0) standards, the final inspection of an outbound order focuses on product condition, item accuracy, and shipping documentation. Before an order leaves the facility, warehouse staff must confirm that all items are in good condition (free from visible damage), the counts match the packing list or manifest, and that the customer address and shipping labels are accurate. These checks ensure that shipments meet quality expectations and reduce costly returns or claims. However, confirming the correct dock for loading is a facility-level logistics coordination task, not part of the order verification process. Dock assignment is typically controlled by dispatch or the warehouse management system (WMS) to optimize carrier scheduling and loading efficiency. The CLT curriculum distinguishes between quality assurance tasks (verifying accuracy, packaging, and labeling) and logistical operations (assigning docks, sequencing trailers). Therefore, verifying the correct dock is not a required outbound order check, making option D the correct answer.

This aligns with CLT's Packaging and Shipment and Dispatch and Tracking key activities, which emphasize product verification, documentation accuracy, and load integrity before release-not dock allocation management.

23. Frage

Facilities that store HAZMATs must do all of the following EXCEPT

- A. post a Safety Data Sheet (SDS) in the area
- B. clearly mark where HAZMATs are stored
- C. notify OSHA of the storage locations
- D. use the proper PPE when handling

Antwort: C

Begründung:

MSSC CLT states that storage areas for hazardous materials must be clearly labeled, have accessible SDS (or a binder nearby), and enforce use of proper PPE when handling. There is no requirement under OSHA or DOT to notify OSHA of the exact storage locations of nonbulk hazmat-such notification is not standard in CLT training. The facility must provide access to hazard communication and train employees, but not a specific "notify OSHA of storage." Reference:

24. Frage

Which of the following forms contains the address of the shipper, the address of the consignee, and the gross weight of the shipment?

- A. Task List
- B. Pick Ticket
- C. Inventory List
- D. Air Waybill

Antwort: D

Begründung:

The Air Waybill (AWB) is the official transportation document for air freight shipments. The CLT "Dispatch and Tracking" section lists it as a non-negotiable contract of carriage issued by an air carrier or freight forwarder. It includes essential details such as shipper and consignee addresses, shipment weight, contents, and routing information. Unlike a pick ticket or task list, which are internal warehouse documents, the Air Waybill serves as legal evidence of the transport agreement and as a receipt for goods accepted by the carrier. It also contains tracking numbers and payment terms. CLT stresses that proper completion of an Air

Waybill ensures compliance with international shipping regulations and enables accurate freight movement visibility through global tracking systems.

25. Frage

Which of the following can improve order picking accuracy and productivity without implementing advanced technology?

- A. Pick-to-light systems
- B. Bar codes
- C. Voice technology
- **D. Pick task simplification**

Antwort: D

Begründung:

Pick task simplification is a key principle in CLT's "Order Processing" section that improves performance using process design rather than new technology. Simplifying tasks can involve standardizing pick paths, organizing items by frequency of use (ABC slotting), or minimizing travel distance through efficient layout design. These low-cost improvements yield significant gains in accuracy and throughput. Unlike technology-driven methods such as barcoding, voice, or light-directed picking, simplification focuses on reducing cognitive load and motion waste. CLT emphasizes lean principles-eliminating unnecessary steps and improving ergonomics-to create a more efficient, error-resistant workflow. Facilities that standardize labeling, bin locations, and sequence picking logically achieve higher accuracy with lower training requirements.

26. Frage

Before unloading, it is essential to ensure that the vehicle is safely secured. Which of the following is true when safely securing a truck for unloading?

- **A. The wheels of the truck are chocked.**
- B. The driver applies the parking brake.
- C. The ultimate responsibility of these safety checks lies with the warehouse supervisor.
- D. The trailer should be able to move freely.

Antwort: A

Begründung:

Safety in receiving operations is a primary CLT competency. Before dock workers enter a trailer, it must be physically restrained to prevent motion. The correct procedure includes chocking the wheels, applying dock locks or restraints, and verifying dock plates are properly secured. Chocking provides mechanical stabilization, preventing the vehicle from rolling during loading or unloading. While the driver applies the parking brake, the CLT standards emphasize redundancy-mechanical wheel chocks or dock locks are mandatory for safety compliance. The supervisor oversees adherence but is not solely responsible for the act. Allowing trailer movement is a serious safety violation.

27. Frage

.....

Die Zertifizierung der MSSC CLT zu erwerben bedeutet mehr Möglichkeiten in der IT-Branche. Wir ITZert haben schon reichliche Erfahrungen von der Entwicklung der MSSC CLT Prüfungssoftware. Unsere Technik-Gruppe verbessert beständig die Prüfungsunterlagen, um die Benutzer der MSSC CLT Prüfungssoftware immer leichter die Prüfung bestehen zu lassen.
