What is used to run fit-to-standard workshops during the design phase?

- A. Template roadmaps
- **B. Best practice content**
- C. Simplification lists
- D. Compatibility lists

Answer: B

Explanation:

Fit-to-standard workshops rely on SAP Best Practice content to demonstrate standard business processes. This content includes ready-made process models, configuration guides, test scripts, and role definitions that help validate whether standard processes meet business requirements. Simplification and compatibility lists are used for system conversion impact analysis, not for fit-to-standard design activities. What ensures that architecture documentation is aligned with business capability goals?

- A. RACI Grid Builder
- B. Fact Sheet Owners
- C. Lifecycle Milestones
