Download Updated Appian ACD201 Exam Questions and Start Exam Preparation

The price for ACD201 training materials is quite reasonable, and no matter you are a student or you are an employee at school, you can afford it. ACD201 exam dumps are edited by experienced experts, therefore the quality can be guaranteed. ACD201 training materials contain both questions and answers, and it's convenient for you to check the answers after finish practicing. In addition, ACD201 Exam Dumps cover most knowledge points of the exam, and you can also improve your ability in the process of learning.

Appian Senior Developer Sample Questions (Q41-Q46):

NEW QUESTION # 41

You need to select a plug-in to meet a specific requirement and several plug-ins can do the job. What are three key factors to consider? (Choose three.)

- A. Who is the creator of the plug-in?
- B. **What are the compatible Appian versions?**
- C. **Is the plug-in approved for use in the Cloud?**
- D. What is the size of the plug-in?
- E. **What are the limitations of the plug-in?**
- F. Is the plug-in open source or proprietary?

Answer: B,C,E

Explanation:

Limitations of the plug-in help you understand constraints or potential issues that could impact your implementation.

Compatible Appian versions ensure the plug-in will work correctly in your current and future environments.

Cloud approval status is essential for Appian Cloud environments, as only approved plug-ins are permitted for deployment.

NEW QUESTION # 42

You receive a warning about approaching the 2,000,000 row limit with synced records in your Production environment. What are two ways to efficiently address this warning to prevent reaching the limit? (Choose two.)

- A. **Apply one or more source filters to limit the number of rows synced in Agpian.**
- B. **Keep only necessary data and plan to move the archived data to an audit table in a longer run.**
- C. Design the process to write data in batches of 1,000.
- D. Disable data sync immediately to prevent user facing-front end issues.

Answer: A,B

Explanation:

Keeping only necessary data and moving archived data to an audit table reduces the number of synced rows, addressing the limit efficiently.

Applying source filters limits the data that is synced, preventing the total row count from exceeding the limit.

NEW QUESTION # 43

You're developing a record view for a case management system that enables users to upload files to a specific location within an external records application.

Your requirements are:

In this record view, there should be a record action that allows the user to upload a file to the interface and configure the metadata (name, author, file size) before submitting.

If the file is larger than 250MB, the user will be notified that the file will be uploaded overnight.

Once the file has been successfully uploaded, the file will appear on the record view and the user can interact with the file.

Which two pieces of user-facing information must be captured from this business process so that you can develop this record view? (Choose two.)

- A. How the user wishes to interact with these files in the record view - as a grid or a series of card layouts.
- B. The email of the system administrator so that an email can be sent to them if the integration fails.
- C. The time of file upload if the file is less than 250MB.
- D. The location of where the file will be uploaded to in the external records application.

Answer: A,D

Explanation:

You need to know the target location in the external records application to properly upload the file.

Understanding how users want to interact with files (grid or card layout) is essential for designing the record view interface.

NEW QUESTION # 44

You need to create a read-only grid that displays support case information. Data for the support cases is mapped to the "Case" record type with data sync enabled.

Within the record, there are fields named "createdDateTime" and "resolvedDateTime". These two fields store the timestamps for when a case is created and resolved, respectively.

The grid includes a column indicating the number of hours between when the case was created and when it was resolved. This column must be sortable within the grid.

How should you calculate the hour value that will display in the column?

- A. Create a custom record field that evaluates in real-time, and calculates the number of hours between when the case was created and when it was resolved.
- B. Within the grid column, utilize an Appian function to calculate the number of hours between when the case was created and when it was resolved.
- C. Create a custom record field that evaluates at sync-time, and calculates the number of hours between when the case was created and the current date and time.

Answer: A

Explanation:

A custom record field that evaluates in real-time and calculates the hours between "createdDateTime" and "resolvedDateTime" ensures the calculated value is available as a sortable field within the read-only grid.

NEW QUESTION # 45

You're creating a support case record type while working on a support case management system. You want to track support case status changes.

You want to use record events to track this information.

Which record data source type is the most appropriate for you to use?

- A. Database source with data sync enabled
- B. Process Model source with data sync enabled
- C. Web service without data sync enabled

Answer: A

Explanation:

A database source with data sync enabled is required to use record events for tracking support case status changes, as Appian record events are only supported for synced record types with a database as the data source.

NEW QUESTION # 46

Some candidates say that they prepare for ACD201 exam using some exam materials from other site but fail. If you still do not know how to pass exam, our Appian ACD201 actual test will be a clever choice for you now. You will know both dump price and exam quantity should not take into key account. The most key consideration is the quality of ACD201 Actual Test. If you are afraid of failure please rest assured to purchase our exam questions, I am sure that our ACD201 actual test will help you pass exam.
