最新更新的最新PTC-AMCA考證及資格考試領導者和免費PDF Medical Technology AMCA Phlebotomy Technician Certification Exam

VCESoft不僅為你提供優秀的資料，而且還為你提供優質的服務。如果你購買了VCESoft的考古題，VCESoft將為你提供一年的免費更新。這樣你就可以一直擁有最新的PTC-AMCA試題資料。而且，萬一你用了PTC-AMCA考古題以後，考試還是失敗的話，VCESoft保證全額退款。這樣一來，你還擔心什麼呢？VCESoft對自己的資料有足夠的信心，你也要對VCESoft有足夠的信心。為了你的考試能夠成功，千萬不要錯過VCESoft這個網站。因為如果錯過了它，你就等於錯失了一次成功的機會。

最新的 Medical Technology Exams PTC-AMCA 免費考試真題 (Q216-Q221):

問題 #216

According to the ADA, to ensure accessibility to patients on crutches or in wheelchairs, at least one space next to the phlebotomy chair must have a minimum area of:

- A. 20 × 30 inches
- B. 48 × 72 inches
- C. 36 × 60 inches
- D. 30 × 48 inches

答案：D

解題說明：

According to the Americans with Disabilities Act (ADA), to ensure accessibility to patients on crutches or in wheelchairs, at least one space next to the phlebotomy chair must have a minimum area of 30 x 48 inches. Space should be available for a wheelchair to turn 180°. There must be adequate space on either side of the phlebotomy chair for transfers to and from gurneys, wheelchairs, or stretchers, and both sides must allow access to the patient. A bariatric phlebotomy chair should be available for large patients.

問題 #217

All of the following statements regarding tourniquet application are true EXCEPT:

- A. A tourniquet should not be applied over an open sore.
- B. The patient should be told to pump his fist.
- C. Two tourniquets may be used together.
- D. A tourniquet may be applied over the patient's sleeve.

答案：B

解題說明：

When applying a tourniquet, fist pumping should be discouraged, as it may make vein location more difficult or cause changes in blood components that may affect test results. A tourniquet may be applied over a patient's sleeve if the sleeve is too tight and cannot be rolled up far enough. Because a tourniquet may have a tendency to roll or twist on the arm of an obese patient two tourniquets may be stacked and used together. A tourniquet should never be placed over an open sore.

問題 #218

For blood collection with the butterfly infusion set in a child, the phlebotomist should use a:

- A. 23-gauge needle with a 2-mL tube
- B. 23-gauge needle with a 5-mL tube
- C. 21-gauge needle with a 5-mL tube

- D. 22-gauge needle with a 2-mL tube

答案： A

解題說明：

For a pediatric patient a 23-gauge needle with a 2-mL tube should be used for blood collection using a butterfly infusion set. Use of a 5-mL tube with a 23-gauge needle may cause vein collapse or hemolysis of the specimen.

問題 #219

A sample being designated as QNS means that:

- A. The quality is nonsterile.
- B. The quality is not standardized.
- C. The quantity is not standardized.
- D. The quantity is not sufficient.

答案： D

解題說明：

If a sample is designated as QNS, the quantity is not sufficient for the test that has been ordered. In this case, the sample is rejected and another sample must be obtained. QNS is a common reason for rejecting chemistry specimens. The phlebotomist should review requirements for tests to ensure that the volume of the specimen is adequate. Reasons for QNS may include using expired tubes (resulting in decreased vacuum) and not ensuring complete filling of the tube before changing tubes. QNS may also occur if a patient has difficult-to-access veins.

問題 #220

A sign with a picture of falling leaves may be used to indicate:

- A. Do not resuscitate order
- B. No venipuncture in right arm
- C. Fall precautions
- D. Miscarriage

答案： C

解題說明：

A sign with a picture of falling leaves indicates that fall precautions are required for the patient. The letters DNR indicate a "do not resuscitate" order. A pink wristband or sign labeled "restricted extremity" may be used to indicate that the arm should not be used for venipuncture, blood pressures, or other procedures.

問題 #221

.....

VCESoft有最新的Medical Technology PTC-AMCA 認證考試的培訓資料，VCESoft的一些勤勞的IT專家通過自己的專業知識和經驗不斷地推出最新的Medical Technology PTC-AMCA的培訓資料來方便通過Medical Technology PTC-AMCA的IT專業人士。Medical Technology PTC-AMCA的認證證書在IT行業中越來越有份量，報考的人越來越多了，很多人就是使用VCESoft的產品通過Medical Technology PTC-AMCA認證考試的。通過這些使用過產品的人的回饋，證明我們的VCESoft的產品是值得信賴的。
