1z1-809 Guaranteed Questions Answers | 100% Free Pass-Sure Java SE 8 Programmer II PDF Download

In this website, you can find three different versions of our 1z1-809 guide torrent which are prepared in order to cater to the different tastes of different people from different countries in the world since we are selling our 1z1-809 test torrent in the international market. Most notably, the simulation test is available in our software version. With the simulation test, all of our customers will have an access to get accustomed to the 1z1-809 Exam atmosphere and pass easily in the real 1z1-809 exam

Oracle Java SE 8 Programmer II Sample Questions (Q201-Q206):

NEW QUESTION # 201

Given the structure of the STUDENT table:

Student (id INTEGER, name VARCHAR)

Given:

```
public class Test {
    static Connection newConnection = null;
    public static Connection get DBConnection () throws SQLException {
        try (Connection con = DriverManager.getConnection(URL, username, password)) { newConnection = con;
        }
        return newConnection;
    }
    public static void main (String [] args) throws SQLException {
        get DBConnection ();
        Statement st = newConnection.createStatement();
        st.executeUpdate("INSERT INTO student VALUES (102, 'Kelvin')");
    }
}
```

Assume that:

The required database driver is configured in the classpath.

The appropriate database is accessible with the URL, userName, and passWord exists.

The SQL query is valid.

What is the result?

- A. The program executes successfully and the STUDENT table is NOT updated with any record.
- B. A SQLException is thrown as runtime.
- C. A NullPointerException is thrown as runtime.
- D. The program executes successfully and the STUDENT table is updated with one record.

Answer: C

NEW QUESTION # 202

Given:

```
class Student {
    String course, name, city;
    public Student (String name, String course, String city) {
        this.course = course; this.name = name; this.city = city;
    }
    public String toString() {
        return course + "!" + name + "!" + city;
    }
}
```

and the code fragment:

```
List<Student> stds = Arrays.asList(
    new Student ("Jessy", "Java ME", "Chicago"),
    new Student ("Helen", "Java EE", "Houston"),
    new Student ("Mark", "Java ME", "Chicago"));
stds.stream()
    .collect(Collectors.groupingBy(Student::getCourse))
    .forEach(src, res -> System.out.println(src));
```

What is the result?

- A. A compilation error occurs.
- B. [Java ME: Jessy:Chicago, Java ME: Mark:Chicago]

[Java EE: Helen:Houston]

- C. Java EE
Java ME
- D. [Java EE: Helen:Houston]
[Java ME: Jessy:Chicago, Java ME: Mark:Chicago]

Answer: C

NEW QUESTION # 203

Given:

```
class MyException extends Exception {  
    String msg;  
    public MyException() {  
        msg = "MyException is thrown. ";  
    }  
}
```

ORACLE®

```
public class App {  
    public static void main(String[] args) {  
        int a = 100;  
        try {  
            if (a <= 100) {  
                throw new MyException();  
            } else {  
                throw new Exception("Exception is thrown.");  
            }  
        } catch (MyException | Exception me) {  
            System.out.println(me);  
        }  
    }  
}
```

What is the result?

- A. A compile-time error occurs.
- B. The program prints nothing.
- C. MyException is thrown.
- D. Exception is thrown.

Answer: C

NEW QUESTION # 204

Given:

```
IntStream stream = IntStream.of(1,2,3); IntFunction<Integer> inFu = x -> y -> x*y; //line n1  
IntStream newStream = stream.map(inFu.apply(10)); //line n2  
newStream.forEach(System.out::print);
```

Which modification enables the code fragment to compile?

- A. Replace line n1 with:
IntFunction<IntUnaryOperator> inFu = x -> y -> x*y;
- B. Replace line n1 with:
IntFunction<UnaryOperator> inFu = x -> y -> x*y;
- C. Replace line n1 with:
