ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q22-Q27):

NEW QUESTION # 22
The Project management application supports two types of external dependencies. What are they?
Choose 2 answers

- A. Change Dependency.
- B. Task Dependency.
- C. Milestone Dependency.
- D. Soft Dependency.
- E. Hard Dependency.

Answer: D,E

Explanation:
Explanation
The Project Management application supports two types of external dependencies: hard dependency and soft dependency. A hard dependency is a dependency that must be met before a task can start or finish. A soft dependency is a dependency that is preferred but not mandatory for a task to start or finish. You can find more information about these dependency types in the Product Documentation for ServiceNow.

NEW QUESTION # 23
If a lens has four entities, which entity within the lens structure would not have a parent reference?

- A. Second-level entity
- B. Bottom entity
- C. Third-level entity
- D. Top-level entity

Answer: D

Explanation:
Explanation
According to the ServiceNow documentation1, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 24

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im_idea_core
- B. im_category
- C. dmn_demand
- D. im_module

Answer: B

Explanation:
Explanation
According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn_demand table stores the demand records that are created from the approved ideas. The im_module table stores the idea modules that are used to group ideas by different criteria. The im_idea_core table stores the core fields of the idea records.

NEW QUESTION # 25

Where is planned cost calculated from when requesting resources from a group and when resource role is specified?

- A. The hourly rate of the specified role.
- B. The task rate cards.
- C. The CI rate cards.
- D. The distribution costs

Answer: A

Explanation:
Explanation
According to the ServiceNow documentation1, when requesting resources from a group and when resource role is specified, the planned cost is calculated from the hourly rate of the specified role. The system uses the rate card associated with the resource plan to determine the hourly rate for each role. The other options are incorrect because:
A: The distribution costs: The distribution costs are the costs that are distributed across the project tasks based on the resource plan allocation2.
B: The task rate cards: The task rate cards are the rate cards that are applied to the project tasks, not the resource plan3.
D: The CI rate cards: The CI rate cards are the rate cards that are applied to the configuration items, not the resource plan4.
