熱門的CCFR-201b考題免費下載&頂尖的 CrowdStrike認證培訓 - 有用的 CrowdStrike Certified Falcon Responder

如果你要參加CrowdStrike的CCFR-201b認定考試，NewDumps的CCFR-201b考古題是你最好的準備工具。這個資料可以幫助你輕鬆地通過考試。這是一個評價很高的資料，有了它，你就不用再擔心你的考試了。因為這個考古題可以解決你在準備考試時遇到的一切難題。在購買NewDumps的CCFR-201b考古題之前，你還可以下載免費的考古題樣本作為試用。這樣你就可以自己判斷這個資料是不是適合自己。

最新的 CrowdStrike CCFR CCFR-201b 免費考試真題 (Q115-Q120):

問題 #115

From a detection, what is the fastest way to see children and sibling process information?

- A. Right-click the process and select "Follow Process Chain"
- B. Select the Event Search option. Then from the Event Actions, select Show Associated Event Data (From TargetProcessId_decimal)
- C. Select Full Detection Details from the detection
- D. Select the Process Timeline feature, enter the AID, Target Process ID, and Parent Process ID

答案： C

問題 #116

To ensure that a malicious file cannot be accidentally executed or accessed by other processes, how are quarantined files stored on the local endpoints?

- A. They are stored in an encrypted format.
- B. They are hidden within the Windows System32 directory.
- C. They are moved to a password-protected ZIP file on the desktop.
- D. They are renamed with a random 32-character extension.

答案： A

問題 #117

Analyze the following process lineage observed during a detection triage on a Windows 10 workstation:
 root > smss.exe > winlogon.exe > userinit.exe > explorer.exe > windows_media_player_y35s21-4ak.exe.
 Based on the fact that the suspicious process originated from the user's desktop shell environment (explorer.exe), what is the most likely entry vector for this attack?

- A. User execution via a Phishing email or drive-by download
- B. Malicious persistence via a WMI event subscription
- C. Remote exploitation of a system service
- D. Credential theft through a compromised Domain Controller

答案： A

問題 #118

In the 'Graph View' of a detection, processes are connected by arrows. Which of the following does a yellow arrow connecting two processes indicate?

- A. A Thread Injector-Injectee relationship (Process Injection).
- B. A Network connection was established between the two processes.
- C. A file was written by the first process and read by the second.
- D. A standard Parent-Child relationship.

答案： A

問題 #119

A responder decides to set a specific Custom IOA to the 'Monitor' action. Which of the following sentences best describes the technical result of this choice?

- A. The sensor will automatically isolate the host from the network.
- B. The sensor will log the activity in the audit logs but will not generate a detection.
- C. The sensor will block the activity and alert the user with a pop-up.
- D. The sensor will create detections with 'Informational' severity but will not block the activity.

答案： D

問題 #120
