

Perfect Reliable OGEA-103 Dumps Pdf Covers the Entire Syllabus of OGEA-103

Download Valid OGEA-103 Exam Dumps For Best Preparation

1. What is presented as "striking a balance between positive and negative outcomes resulting from the realization of either opportunities or threats?"

- A. Agile development
- B. Architecture Security
- C. Transition Management
- D. Risk Management

Answer: D

Explanation:

Risk Management is the process of identifying, assessing, and responding to risks that may affect the achievement of the enterprise's objectives. Risk Management involves balancing positive and negative outcomes resulting from the realization of either opportunities or threats.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.3 Risk Management.

2. Which of the following are the four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository?

- A. General Foundational Subordinate and Superior Architecture
- B. Segment, Capability, Enterprise and End-to-end Target Architecture
- C. Avant-Garde Big-Bang, Discreet and Cohesive
- D. Strategy Portfolio Project Solution Delivery

Answer: D

Explanation:

Strategy Portfolio Project Solution Delivery are the four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository. They correspond to different levels of abstraction and granularity in the architecture development process.

Reference: The TOGAF® Standard, Version 9.2 - The Open Group, Section 2.4 Architecture Repository.

3. Complete the sentence Business Transformation Readiness Assessment is _____.

- A. a joint effort between corporate staff lines of business and IT planners
- B. to ensure the active support of powerful stakeholders
- C. a way to put building blocks into context thereby supporting re-usable solutions
- D. widely used to validate an architecture that is being developed

Answer: A

Explanation:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative.

Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

4. Complete the following sentence. In the ADM documents which are under development and have not undergone any formal review and approval process are _____.

- A. Called "draft"
- B. Invalid

OGEA-103 Book Pdf | Exam OGEA-103 Actual Tests

Quality of OGEA-103 learning quiz you purchased is of prior importance for consumers. Our OGEA-103 practice materials make it

easier to prepare exam with a variety of high quality functions. The quality function of our OGEA-103 exam questions is observably clear once you download them. We have three kinds of OGEA-103 Real Exam moderately priced for your reference: the PDF, Software and APP online. And you can choose any version according to your interests and hobbies.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q65-Q70):

NEW QUESTION # 65

What are the following activities part of?

- . Risk classification
 - . Risk identification
 - . Initial risk assessment
-
- A. Risk Management
 - B. Phase A
 - C. Phase G
 - D. Security Architecture

Answer: A

Explanation:

Risk management is a generic technique that can be applied across all phases of the Architecture Development Method (ADM), as well as in the Preliminary Phase and the Requirements Management Phase2.

Risk management involves the following steps1:

*Risk identification: This step involves identifying the potential risks that may affect the architecture project, such as technical, business, organizational, environmental, or legal risks. The risks can be identified through various sources, such as stakeholder interviews, workshops, surveys, checklists, historical data, or expert judgment.

*Risk classification: This step involves categorizing the risks based on their nature, source, impact, and priority. The risks can be classified according to different criteria, such as time, cost, scope, quality, security, or compliance. The classification helps in prioritizing the risks and allocating resources and efforts to address them effectively.

*Initial risk assessment: This step involves assessing the likelihood and impact of each risk, and determining the initial level of risk. The likelihood is the probability of the risk occurring, and the impact is the severity of the consequences if the risk occurs. The initial level of risk is the product of the likelihood and impact, and it indicates the urgency and importance of the risk. The initial risk assessment helps in identifying the most critical risks that need immediate attention and mitigation.

NEW QUESTION # 66

Consider the diagram showing a classification model for Architecture Landscapes.

What are the items labelled A, B and C?

- A. A-Strategy Architecture. B-Tactic Architecture, C-Operational Architecture
- B. A-Corporate Capability. B-Portfolio Capability. C-Project Capability
- C. A-Enterprise Strategic Architecture. B-Segment Architecture. C-Capability Architecture
- D. A-Architecture Vision. B-Business Architecture. C-Architecture Development

Answer: C

NEW QUESTION # 67

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Logical and Physical
- B. Capability and Segment
- C. Information and Data
- D. Application and Data

Answer: D

Explanation:

These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology¹². Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain¹².

The other options are incorrect because:

* Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system³.

* Information and Data are not distinct architecture domains, but rather aspects of the same domain. Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data⁴.

* Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus⁵.

NEW QUESTION # 68

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To identify and understand business requirements
- B. To classify architecture and solution assets
- C. To coordinate with the other management frameworks in use
- D. To describe how an architecture addresses stakeholder concerns

Answer: B

NEW QUESTION # 69

Which section of the TOGAF template for Architecture Principles should describe the relationship to other principles?

- A. Name
- B. Rationale
- C. Implications
- D. Statement

Answer: C

NEW QUESTION # 70

.....

Just the same as the free demos of our OGEA-103 learning quiz, we have provided three kinds of versions of our OGEA-103

preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our OGEE-103 Study Guide.
