It means that our 1Z0-947 test questions are very useful for all people to achieve their dreams, and the high quality of our 1Z0-947 exam prep is one insurmountable problem.

Oracle GoldenGate 19c Implementation Professional Sample Questions (Q55-Q60):

NEW QUESTION # 55

You are concerned that the process report generation in your production environment will become too large and not contain useful statistics.

- A. Use the parameter **REPORTROLLOVER**.
- B. GoldenGate automatically generates a new report when the processes start.
- C. Use the ADD EXTTRAIL command option MEGABYTES.
- D. Use the parameter REPORT.

Answer: A

Explanation:

The REPORTROLLOVER parameter lets you automatically rotate and archive GoldenGate process report files based on size, time, or process restarts, preventing them from growing too large and cluttering with old data.

NEW QUESTION # 56

Invisible columns are columns that are part of a table but not part of the results in a select. When Data Definition Language (DDL) replication is enabled, invisible and virtual columns created in the source environment are replicated in the target environment. What parameter in Extract will exclude invisible columns from replication when using the Integrated Extract?

- A. NOHIDDENCOLUMNS
- B. **EXCLUDEHIDDENCOLUMNS**
- C. NOINVISIBLECOLUMNS

Answer: B

Explanation:

"Oracle GoldenGate supports replication of invisible columns in Extract.

If you want to exclude them, use the EXCLUDEHIDDENCOLUMNS parameter."

NEW QUESTION # 57

What is the purpose of the DiscardFile?

- A. **To log failed operations Replicat couldn't process**
- B. To discard unused trail files
- C. To backup configuration changes
- D. To store Replicat cache

Answer: A

Explanation:

It identifies operations that could not be processed by Replicat.

NEW QUESTION # 58

If you were to create a target-initiated Distribution Path, which of the following must you provide?

- A. The name of the Extract
- B. The name of the GoldenGate deployment
- C. The name of the database transaction logs where database data changes were recorded
- D. **The target URI**

Answer: D

Explanation:

When creating a target-initiated Distribution Path in Oracle GoldenGate Microservices, the Receiver Service initiates the connection to the source's Distribution Service. This requires specifying the target URI, which includes details like the source host, port number, and trail name. The Extract name is not directly required in this configuration.

NEW QUESTION # 59

The filter clause provides the ability to include or exclude data to process. What is true with this filter clause: Filter (ON UPDATE, ON DELETE, @Compute(PRODUCT_PRICE * PRODUCT_AMOUNT) > 10000)

- A. Data processing will include rows for delete if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000
- **B. Data processing will exclude rows for update if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000**
- C. Data processing will include rows for insert if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000
- D. Data processing will exclude rows for delete if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000

Answer: B

Explanation:

The FILTER clause with @Compute and ON UPDATE, ON DELETE includes only those rows where the computed value is greater than 10000. If not, the row is excluded from processing - specifically for UPDATE and DELETE operations.

NEW QUESTION # 60

.....

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our 1Z0-947 learning questions in this website.
