If you are going to buy AI-102 learning materials online, and concern the privacy protection, you can choose us. We respect private information of you. If you choose us, your private information will be protected well. Once the order finishes, your personal information such as your name and email address will be concealed. Moreover, AI-102 Exam Materials contain both questions and answers, and it's convenient for you to have a check after practicing. We offer you free update for one year for AI-102 training materials, and the update version will be sent to your email address automatically.

Microsoft AI-102 certification exam is an excellent way for professionals to demonstrate their knowledge and skills in designing and implementing Microsoft Azure AI solutions. Designing and Implementing a Microsoft Azure AI Solution certification exam is intended for individuals who have experience in developing and deploying AI solutions on the Microsoft Azure platform. AI-102 exam is designed to test the candidate's ability to design and implement AI solutions that meet business needs.

The AI-102 certification exam covers a wide range of topics related to Azure AI, including designing AI solutions that use cognitive services, machine learning, and other AI technologies. AI-102 exam also covers topics such as data preparation, natural language

processing, and computer vision. Designing and Implementing a Microsoft Azure AI Solution certification exam is intended for professionals who are looking to build their skills in AI and machine learning, and who want to demonstrate their expertise in this area to potential employers.

Microsoft AI-102 Exam is designed for individuals who want to demonstrate their expertise in designing and implementing AI solutions in Microsoft Azure. AI-102 exam covers a wide range of topics, from machine learning and NLP to computer vision and business strategy. By passing AI-102 exam, candidates can validate their skills and enhance their career prospects in the rapidly growing field of AI.

Free AI-102 Exam Questions & AI-102 Unlimited Exam Practice

AI-102 practice material contains questions & answers together with explanations. You can do your AI-102 study plan according to your actual test condition. If your time is limited, you can remember the questions and answers for the AI-102 preparation. While, if your time is enough for well preparation, you can study and analyze the answers with the help of the AI-102 Exam explanations. No matter in which way you study for the Microsoft certification, our AI-102 valid pdf dumps will ensure you 100% pass.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q198-Q203):

NEW QUESTION # 198

You have an Azure OpenAI model.

You have 500 prompt-completion pairs that will be used as training data to fine-tune the model.

You need to prepare the training data.

Which format should you use for the training data file?

- A. JSONL
- B. XML
- C. TSV
- D. CSV

Answer: A

Explanation:

For Azure OpenAI fine-tuning, training data must be provided as a JSON Lines (.jsonl) file. Each line represents one example.

Because your data is described as prompt-completion pairs, the required shape is typically:

```
{"prompt": "<your prompt>", "completion": "<ideal completion>"}
```

(Chat model fine-tuning instead uses a messages array per line, but the file format is still JSONL.) JSONL is the only accepted format for upload to the fine-tuning job.

Microsoft References

* Azure OpenAI Service - Fine-tuning: data preparation and formats (JSONL; prompt-completion and chat messages).

* Azure OpenAI Service - How to fine-tune models (training files must be .jsonl).

NEW QUESTION # 199

You are creating an enrichment pipeline that will use Azure Cognitive Search. The knowledge store contains unstructured JSON data and scanned PDF documents that contain text.

Which projection type should you use for each data type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

<https://docs.microsoft.com/en-us/composer/how-to-send-cards?tabs=v1x>

NEW QUESTION # 201

You have a library that contains thousands of images.

You need to tag the images as photographs, drawings, or clipart.

Which service endpoint and response property should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 202

You have the following data sources:

- * Finance: On-premises Microsoft SQL Server database
- * Sales: Azure Cosmos DB using the Core (SQL) API
- * Logs: Azure Table storage
- * HR: Azure SQL database

You need to ensure that you can search all the data by using the Azure Cognitive Search REST API. What should you do?

- A. Migrate the data in Sales to the MongoDB API.
- B. Ingest the data in Logs into Azure Sentinel.
- **C. Mirror Finance to an Azure SQL database.**
- D. Configure multiple read replicas for the data in Sales.

Answer: C

Explanation:

Explanation

On-premises Microsoft SQL Server database cannot be used as an index data source.

Note: Indexer in Azure Cognitive Search: : Automate aspects of an indexing operation by configuring a data source and an indexer that you can schedule or run on demand. This feature is supported for a limited number of data source types on Azure.

Indexers crawl data stores on Azure.

- * Azure Blob Storage
- * Azure Data Lake Storage Gen2 (in preview)
- * Azure Table Storage
- * Azure Cosmos DB
- * Azure SQL Database
- * SQL Managed Instance
- * SQL Server on Azure Virtual Machines
